# Difference ido/ iDo/ iDO

- *ido = Simple is little but sure and Simple is*
- *iDo = Similar is smthng usual and usefull*
- *iDO = Simple is and Great DO like First communication with girl*

## Priority ido:

- *ido* = little project
- *iDo* = middle project
- *iDO* = urgent project

# PROGRAMME

- *DELPHI = THAT`S` IT LANGUAGE IS DOLPHIN (DELPHIN-ДЕЛЬФИН) LANGUAGE*
- *C++ = SUN MICROSYSTEMS AND LIGHT SUN, (СОЛНЫШКО), OTHERS*
- *ТЕТРИС = ВЕРТИКАЛЬНЫЙ ВЗЛЕТ*

# R2D2, C3PO

## R2-D2 & C-3PO

Subservient automatons with varying degrees of intelligence, droids are manufactured in as many different forms as there are tasks. Despite the fact that they are vital to the smooth operation of galactic society, they are often treated as chattel by their owners and generally underappreciated. The protocol droid C-3PO and his counterpart, the astromech R2-D2, excel at their respective functions, and have together served various masters for decades. With rare exceptions, C-3PO and R2-D2 have managed to avoid routine memory wipes, as a result, both have developed idiosyncratic personalities. While C-3PO has a distaste for space travel and a tendency to worry and fuss, R2-D2 is decidedly more adventurous and has an almost fierce streak of independence.

### COGNITIVE MODULE

C-3PO's unique cognitive module has culminated from three different sources: the C-110, the C-100, and the C-120. Each source has its own set of protocols, and the C-120's protocols are the most advanced. The C-120's protocols are the most advanced, and the C-120's protocols are the most advanced.
