The Advantage4dealers Tablet application allows our Southwestern Advantage dealers to easily manage their business through an electronic order form application. The application requires an internet connection to function.

For optimum performance and reliability, you should always keep your device at the latest available software version

*** You may need to uninstall previous versions if you are having trouble installing on your device ***

Before downloading the Android app, you will need to allow the device to download from our site. Go to settings, select General, select Security, Device Administration, then check the box next to Unknown sources. For more detailed instructions, click [here](#).

For the latest version of iOS, you will need to verify that you trust our SW App in order to run the program since it is downloaded from our site. For more detailed instructions, click [here](#).

FEATURES

Take a product order electronically, with a mobile device or tablet. This allows for greater flexibility and organization.

Customizable pricing plans can be offered to your customers and applications allows for capture of customer signature.

Ability to capture payments: cash, check, and credit card. Checks can be processed via EFT and credit cards are processed real-time.

The Tablet App also includes integration to RoamData credit card swipe device. The RoamData swipe device and associated account will be issued to you by the Remittance office.

***NOTE:** Some extremely bulky cases may interfere with the swiper being seated into the headphone jack properly. There is a rubber bumper on the swiper you may need to remove. If it still does not seat properly, you will need to purchase an extender. This is an example extender that works well: <http://www.amazon.com/CellPay-Mobile-Audio-Extension-female/dp/B008F9MJOS>

[SkWids.com](#) and [Advantage4Teens.com](#) registration is integrated directly into the order flow.

If you experience any issues with the application, [Click Here](#) for support information.
