

Clinical Case 06-2019

Here is where your
presentation begins

Contents of This Template

Here's what you'll find in this **Slidesgo** template:

- A slide structure based on a clinical case presentation, which you can easily adapt to your needs. For more info on how to edit the template, please visit **Slidesgo School** or read our **FAQs**.
- An assortment of illustrations that are suitable for use in the presentation can be found in the **alternative resources** slide.
- A **thanks** slide, which you must keep so that proper credits for our design are given.
- A **resources** slide, where you'll find links to all the elements used in the template.
- **Instructions for use.**
- Final slides with:
 - The **fonts and colors** used in the template.
 - More **infographic resources**, whose size and color can be edited.
 - Sets of **customizable icons** of the following themes: general, business, avatar, creative process, education, help & support, medical, nature, performing arts, SEO & marketing, and teamwork.

You can delete this slide when you're done editing the presentation.

Introduction

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury

01

About the Patient

You could enter a subtitle here if you need it

Identifying Information

Neptune

Neptune is the fourth-largest planet by diameter in our Solar System

Saturn

Saturn is the ringed one. It's a gas giant, composed mostly of hydrogen and helium

Mercury

Mercury is the closest planet to the Sun and the smallest one in our Solar System

Identifying Information

Venus

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

Mercury

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god

Patient Medical History

- ❑ Age: 25-35
- ❑ Gender: female
- ❑ Allergies: none
- ❑ Location: Madrid, Spain
- ❑ Habits: unhealthy eating, sedentary lifestyle

○ 2008

Neptune is the fourth-largest planet by diameter in our Solar System

○ 2013

Saturn is the ringed one. It's a gas giant, composed mostly of hydrogen and helium

○ 2019

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot

Review of Systems

01

Neptune

Neptune is the farthest planet from the Sun

02

Saturn

Saturn is composed mostly of hydrogen and helium

03

Mercury

Mercury is the smallest planet in our Solar System

04

Jupiter

This gas giant is the biggest planet in our Solar System

05

Mars

Despite being red, Mars is actually a cold place

Physical Examination

Neptune

45%

To change the size of the graph, click the arc of the circle and drag one of the orange handles

Saturn

12%

Yes, Saturn is the ringed one. It's a gas giant, composed mostly of hydrogen and helium

Mars

78%

Mars is a cold place full of iron oxide dust, which gives the planet its reddish cast

Venus

36%

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot

Mercury

62%

Mercury is the closest planet to the Sun and the smallest one our the Solar System

Results

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god

Discussions

“Neptune is the farthest planet from the Sun and the fourth-largest in our Solar System”

Dr. John Doe

“Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot”

Dr. Jenna James

“Mercury is the closest planet to the Sun and the smallest one in our Solar System”

Dr. Daniel Patterson

Discussions Summary

01

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot and its atmosphere is extremely poisonous

02

Jupiter is a gas giant and the biggest planet in our Solar System. It's also the fourth-brightest object in the sky

03

Mercury is the closest planet to the Sun and also the smallest one in our Solar System. It's only a bit larger than our Moon

03

Diagnosis

You could enter a subtitle here if you need it

Diagnosis

Neptune

Neptune is the fourth-largest planet by diameter in our Solar System

Saturn

Saturn is the ringed one. It's a gas giant, composed mostly of hydrogen and helium

Venus

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot

Mercury

Mercury is the closest planet to the Sun and the smallest one in our Solar System

Mars

Despite being red, Mars is actually a cold place. It's full of iron oxide dust

Jupiter

It's the fourth-brightest object in the sky and the biggest planet in our Solar System

Comparison

Words

05

Patient Monitoring

You could enter a subtitle here if you need it

Patient Monitoring

Week 1

Venus has a beautiful name and is the second planet from the Sun

Week 2

To change the size of the graph, click the circle and drag the colored handle

Week 3

Mercury is the closest planet to the Sun

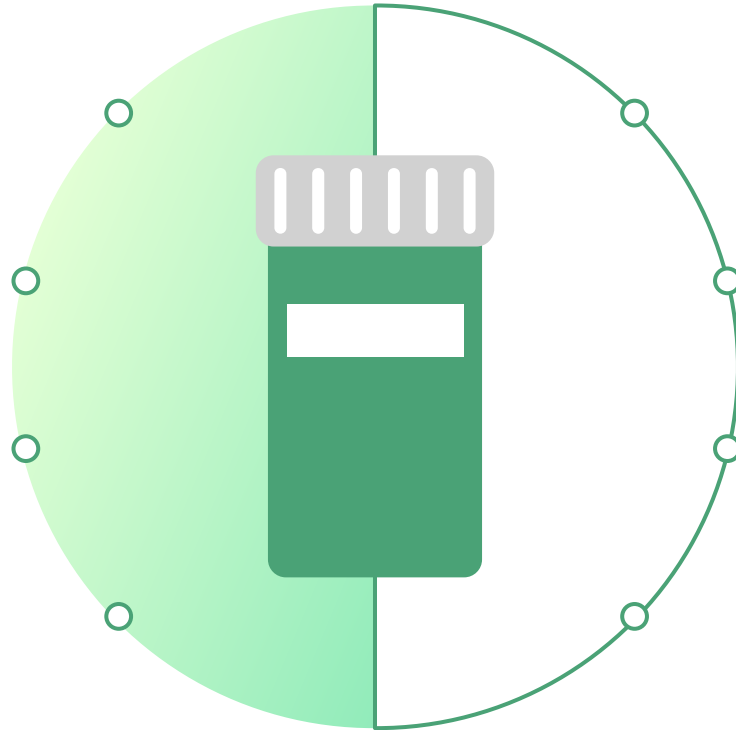

Contraindications - Indications

Saturn is the ringed one. It's a gas giant, composed of hydrogen and helium

Jupiter is a gas giant and the fourth-brightest object in the sky

Venus has a beautiful name and is the second planet from the Sun

Mercury is the closest planet to the Sun and the smallest in our Solar System

Despite being red, Mars is actually a cold place. It's full of iron oxide dust

Neptune is the fourth-largest planet in our Solar System

Pluto is in the Kuiper belt and is considered a dwarf planet since 2006

Ceres is a dwarf planet and the biggest object in the asteroid belt

Post-prevention

Jupiter is a gas giant and the biggest planet in our Solar System

Jupiter

Mercury

Mercury is the smallest planet in our Solar System

Venus is terribly hot and its atmosphere is extremely poisonous

Venus

Mars

Despite being red, Mars is actually a cold place

Neptune is the fourth-largest planet in our Solar System

Neptune

Saturn

It's a gas giant, composed mostly of hydrogen and helium

Case Timeline

Phase 1

Neptune is the fourth-largest planet in our Solar System

Phase 2

Saturn is the ringed one. It's a gas giant, composed of hydrogen and helium

Phase 3

Venus has a beautiful name and is the second planet from the Sun

Phase 4

Mars is full of iron oxide dust, which gives the planet its reddish cast

Conclusions

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury
