

# MY FAVORITE ATHLETE.

Author of the presentation:  
Kamalieva Aizilya

Football is not just a game, it is useful for the body and mind, for developing logical thinking, developing a strategy and the ability to apply it in a stressful situation. If a person begins to engage in this sport professionally, they automatically need to develop a huge number of qualities, such as dexterity, good reaction, and the ability to make the right decisions.

Therefore, my favorite athlete has such a profession. He is a football player. And he is Cristiano Ronaldo dos Santos Aveiro.

Cristiano was born on February 5, 1985 in Funchal, Portugal. The passion for football in the biography of Cristiano Ronaldo manifested itself in childhood. In 1993, Cristiano began playing for the Andorinha team, then in 1995 for the Nasunal club. A further career step among youth clubs in the biography of Cristiano Ronaldo was the signing of a contract with sporting.

For one season, Cristiano Ronaldo in the biography managed to play in the reserve and main team of the sporting team. He also played for the Portuguese national team at the European youth championship.

After the 2003 sporting – Manchester United game, the talented player was noticed by coach Alex Ferguson. He signed a contract (transfer – 12.24 million pounds) with Cristiano when the 2002-2003 season was over. Since 2003, Ronaldo has been playing for Manchester United. In the same year, he joined the national team.

In his first season with the team in 2003-2004, Ronaldo scored 6 goals, in the season 2004-2005 – 9, 2005-2006 – 12. Then his figures were significantly increased, in the season 2006-2007, he brought the team 23 goals, in 2007-2008 – 42. Manchester won The Premier League in 2006-2007, 2007-2008, the FA Cup in 2004, the League Cup in 2006, 2009.

The team also won the UEFA Champions League in 2008, the FA super Cup in 2007, 2008, and the club world Cup in 2008. For his biography Cristiano Ronaldo twice became the best football player in England, in 2008 he became the best football player, striker according to UEFA, the best football player in the world, Europe. Cristiano also has many other significant awards and titles.

Now, with a height of 183 cm, the player weighs 83 kg, and in the team plays in the position of extreme midfielder.

Cristiano Ronaldo's eldest son, Cristiano Jr., celebrated his 8th birthday this year. The boy was born under mysterious circumstances, we only know that, according to the famous football player, he is from a surrogate mother.

Cristiano Jr. is also an avid fan of football, and although he is not yet trained in any of the sports schools, still, his father's genes take their toll.

He plays football and makes good progress. Interestingly, the boy's idol is not his father, but another equally popular football player — the Argentine Lionel Messi.

One of the twins, Cristiano Ronaldo's son MATEO, was born in 2017. The famous Portuguese football player again used surrogacy. It is not known who is the surrogate mother of the twins, only that she is Mexican.

The athlete's mother supports her son, and is also insanely happy that she has so many grandchildren. Recall that Cristiano Ronaldo was born and raised in a poor family with many children, but his parents tried to make sure that the children did not need anything. Some people think that all these children of the Portuguese football player – another opportunity to promote, on the other hand, Cristiano Ronaldo does not need PR, because his name is already on everyone's lips

The second twin, Cristiano Ronaldo's daughter Eva, is now one year old. The public is still at a loss why a world-famous football player needed the services of surrogate mothers, and twice. What is the point, both the press and fans of the athlete are trying to understand. After all, he is a young, rich, famous and beautiful athlete, who would agree to give birth to children of tens of thousands of girls who are pining for him. Although, most likely, it's just the same in the girl he was looking for so long and with whom he wanted to have children. Fans are fans, and true love, especially for such a famous person, is a delicate matter.

Cristiano Ronaldo's wife, Georgina Rodriguez, is not officially married yet, but the Spanish model's engagement ring has long been noticed by the press. Well, perhaps in the near future, one of the most desirable male athletes of our time will say goodbye to the status of a bachelor.

Georgina Rodriguez is 10 years younger than the football player, but this does not interfere with their happiness and young family. It is known that the girl is engaged in modeling, after meeting Cristiano Ronaldo became very popular and got millions of subscribers in social networks. News number one was the news that Cristiano Ronaldo's girlfriend Georgina Rodriguez is pregnant.
