An advertisement for the Senstone app. It features a dark blue background with a subtle pattern of small white dots. On the left, a silhouette of a person's head is shown in profile, facing right. A red audio waveform extends from the mouth area towards the center. In the middle, there is a stylized, metallic-looking mouth icon. To the right of this icon, the text "Senstone converts your voice memos into text" is written in a small, red font. Further right, a smartphone is shown vertically, displaying the app's interface. The screen shows the word "Completed" at the top, followed by a red audio waveform, and then the text "You just recorded a memo". At the bottom of the screen, there is a small "X" icon. The overall aesthetic is modern and tech-oriented.

## SO,

If you're going to talk to yourself, you might as well remember what you're saying — and the Senstone wants to help you. It's a piece of jewelry that combines form and function, serving as a 21<sup>st</sup> century

note-taking device — **because**  
**pen and paper are so last**  
**century.**

THANK YOU FOR YOUR ATTENTION
