TECHNOLOGY IN OUR LIFE

By Abdulla Abbasov, Sahib Babeyev
for Teacher M.Melekxanim

People can hardly imagine their lives without modern technologies nowadays. It is almost impossible to go out without a mobile phone or an MP3 player, for example.

These devices have become an important part of our life. Moreover, almost every day either a new technology is being invented or an old one is being improved. To stay up-to-date people keep buying newer items. Soon our houses and work places will look like electronic stores.

Technology is all around us. First of all, we need it for work. All modern offices are equipped with computers, scanners, printers, and other useful machines.

One of the most important devices today is the wi-fi modem as it provides Internet. Secondly, technologies surround us at home, in cars and everywhere. It includes TVs, radios, refrigerators, vacuum-cleaners, washing machines, CD-players, e-books, cameras and else.

Perhaps, the most important thing about technological progress is that it allows us to do many things which would be impossible without it. For example, we can communicate with friends from other countries with the help of computers. We can even see them and have a live conversation.

There are many people who are against new technologies. In my opinion, technological progress has made our lives more interesting and bright. Thanks to computers and Internet I find more educational resources. Such electronic items as vacuum-cleaner, washing machine, microwave, dish washer, blender and some others have made my mum's life easier. So I'm sure that new technologies are for good.

Of course we need to mention technologies used in medicine. They help save lives or improve lives of those who suffered from accidents or were born with some abnormalities. Technologies help us travel in quicker ways. The list of advantages can go and on.

But does technology have disadvantages? It definitely does. The speed with which modern technologies develop and our attempts to catch up with it make our lives more stressful. We have become more isolated, as more and more people replace real relations with social media ones. We virtually don't need to go out to satisfy our basic needs like food, medicine etc.

Technology definitely improves our lives but only when used in moderation.
