How to Update Norton Antivirus

+1-888-886-0477

Open the Norton anti-virus.

You can find it on your task bar or in start menu

The image shows the Norton Internet Security application window. The title bar reads "Norton Internet Security". Below the title bar is a yellow toolbar with three buttons: "Block Traffic" (with a red prohibition sign), "LiveUpdate" (with a blue signal icon), and "Options" (with a checkmark icon). On the left side, there is a vertical navigation pane with several buttons: "Norton Internet Security", "Norton AntiVirus", "Status", "Scan for Viruses" (highlighted with a red dashed border), "Reports", and "Norton AntiSpam". The main area of the window is titled "Scan for Viruses" and contains the instruction "Click an item to launch a scan". Below this instruction is a list of scan options, each with an icon and a text label:

-  [Scan my computer](#)
-  [Scan all removable drives](#)
-  [Scan all floppy disks](#)
-  [Scan drives](#)
-  [Scan folders](#)
-  [Scan files](#)

+1-888-886-0477

Click on "Options" on the top of the window.

+1-888-886-0477

Enable live update then click on "Apply".
Now all the updates will be downloaded automatically by
Norton.

The screenshot shows the 'Norton AntiVirus Subscription' settings. It includes a table with the following information:

Norton AntiVirus Subscription	
<input checked="" type="checkbox"/> Virus Definitions	11/26/2003
<input checked="" type="checkbox"/> Renewal Date	2/27/2004
<input checked="" type="checkbox"/> Automatic LiveUpdate	On

Other visible text includes 'ports' on the left, 'Monitor you of behavior' and 'More In' on the right, and the Norton AntiVirus logo at the bottom.
