# Company Profile

Yantai Hongshun Mining Machinery Co., Ltd.

## Welcome to Yantai Hongshun Mining Machinery Co., Ltd.

- Yantai Hongshun Machinery Co., Ltd. is located in Zhaoyuan City, Shandong Province, China.
- Our company has excellent technology and manufacturing capabilities.
- Mainly provide mining equipment and smelting equipment, mainly gold and other non-ferrous metal ore.
- We solemnly promise you: professional quality, competitive price, perfect technical service..

## Main products

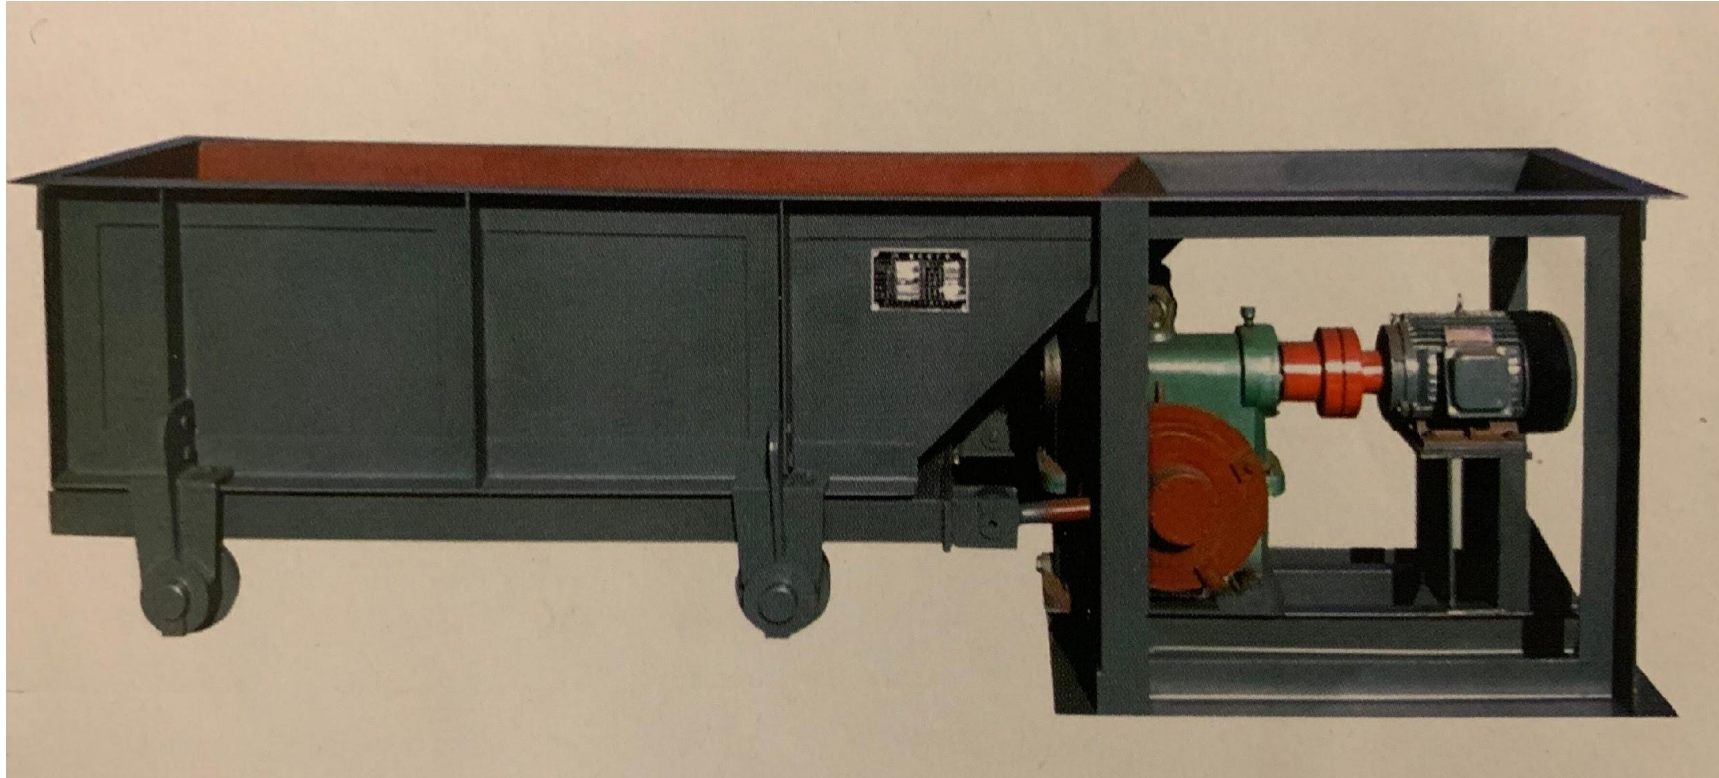

Main products: all kinds of mining machinery and equipment, Crusher machinery, Grinding machinery, Ore sub-level machinery and equipment, Flotation machinery, Cyanide leaching machinery.

An aerial night view of a city skyline, likely Chicago, with numerous skyscrapers illuminated. The sky is a deep blue with scattered clouds. A white rectangular frame is overlaid on the image, containing the text "product description".

# product description

# Ore feeding equipment

## 1. Mining machinery

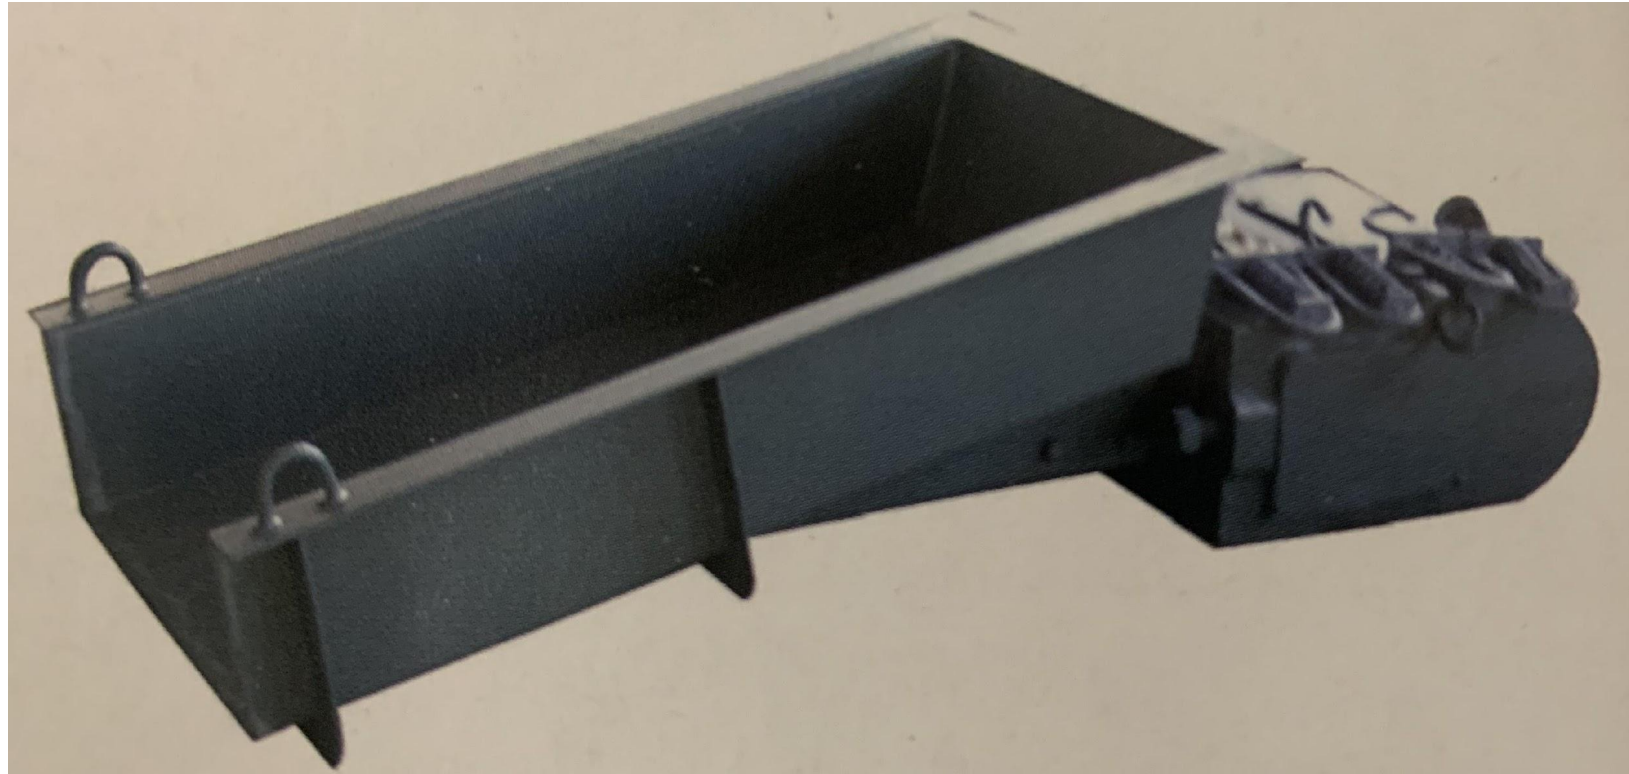

Product features: Trough to mine mine Warehouse general lifting on the discharge port, the groove bottom to reciprocate, to achieve the mine, which rushed 20 ~ 60 times per minute, the stroke of 20 ~ 200mm. The amount of ore is determined by the stroke size.

---

## 2.DZ series motor vibration feeder

---

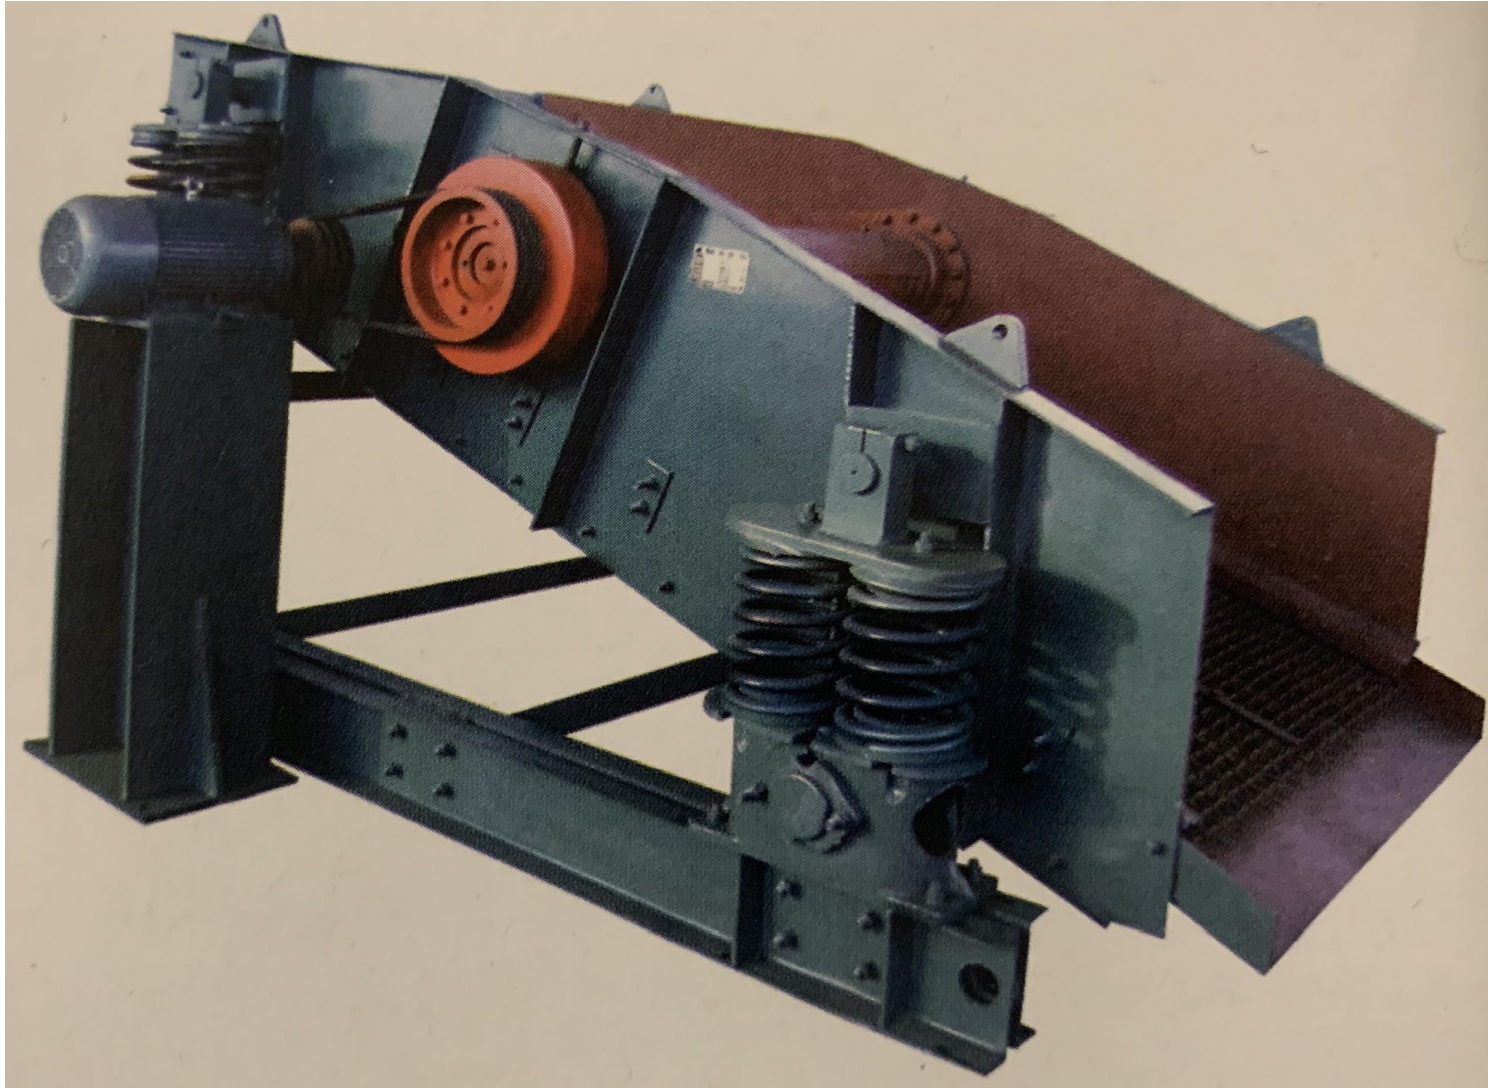

Product features:DZ Series electric motor vibration feeder is a new type of feeding device successfully researched and developed by our engineers and technicians, used in metallurgy, Coal, Chemical Industry, Building Materials, Ceramics, abrasive, grain and food industry. Suitable for mobile batching, quantitative packing and automatic control.

# Screening equipment

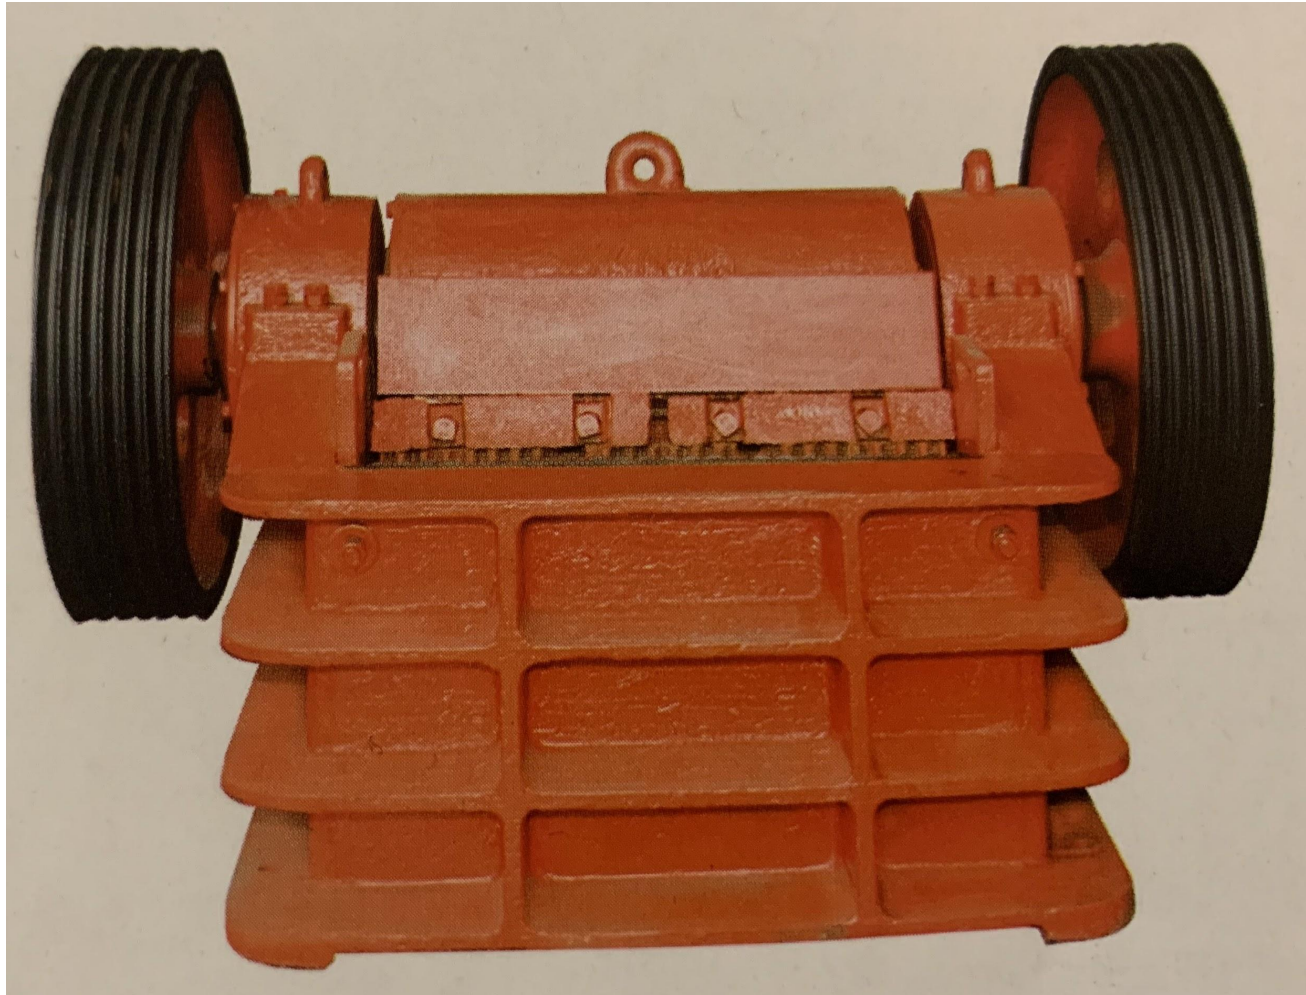

SZZ vibrating screen

Product features: product features: the SZZ type self-centering vibration screen is a circular motion track , which is the most widely used sub-equipment in our country.

# Crushing equipment

## 1. PE type swing jaw crusher

Product features:the crusher has a long history, is a traditional type of crushing equipment, electric motor through the Triangle belt wheel driven eccentric shaft rotation, dynamic cyclic complex swing to produce crushing force. Two kinds of models. The machine structure is simple, low price, reliable, easy to adjust the discharge port, more suitable for breaking moisture wet ore, ore containing clay and more, relatively coarse particle size. Our company has made the following optimization design and practical application of PE400 × 600, PE250 × 750, PE600×900 and other types can be recognized. Fine particle size.

- 1, deep cavity design, crushing ratio, high crushing efficiency, crushing
- 2, improve the eccentric shaft speed, high production capacity .

## 2.PC type hammer crusher

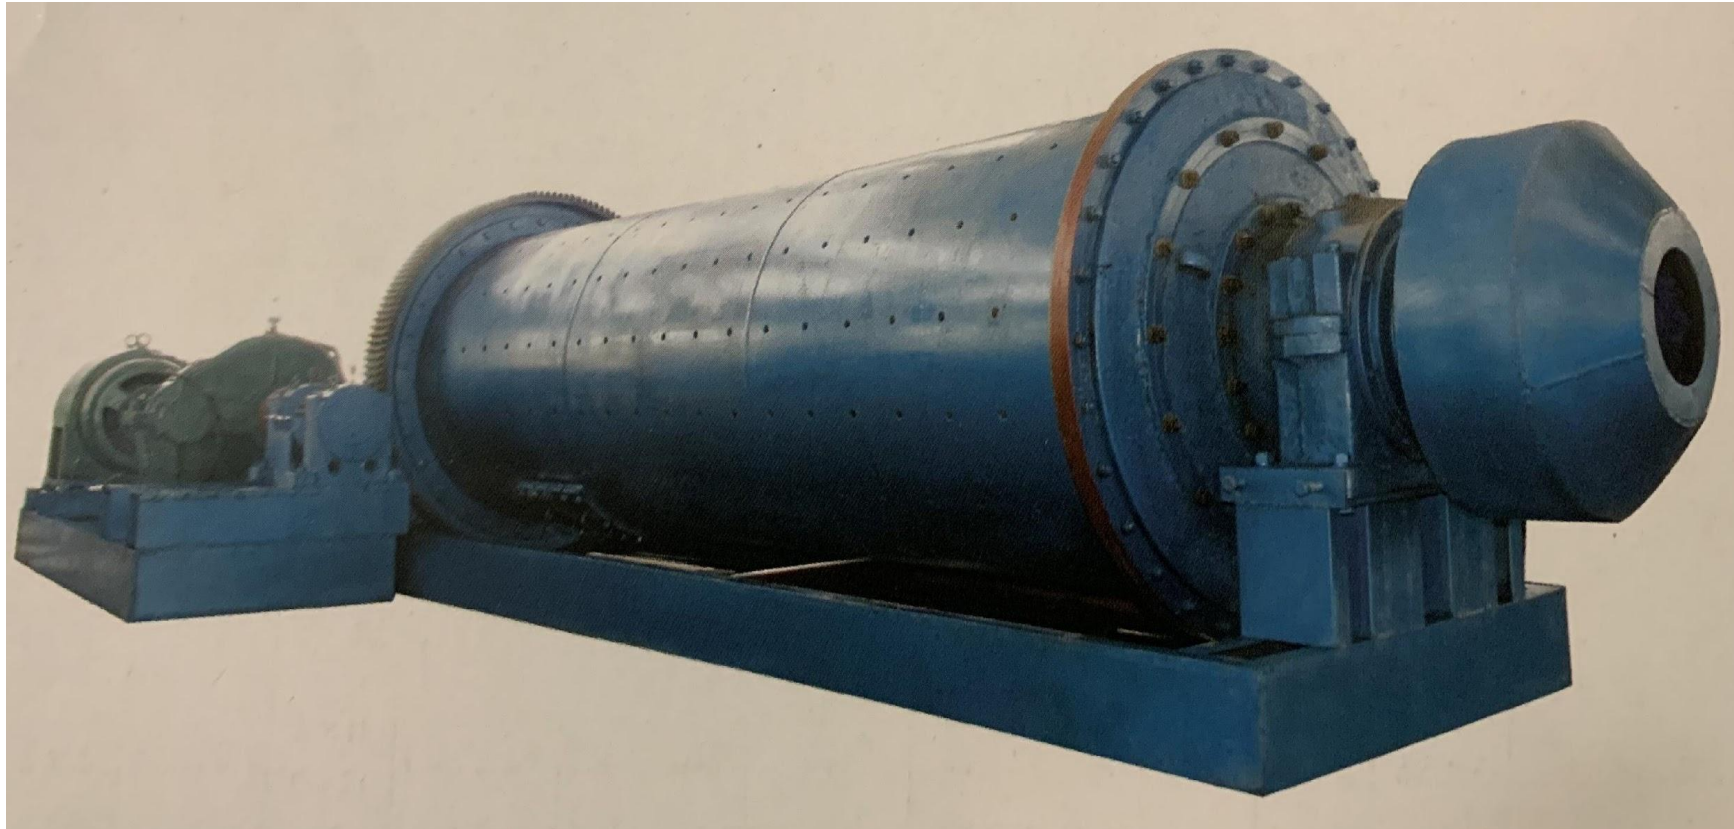

---

Product features: Product point this type crusher is an improved hammer crusher, suitable for crushing frangible material, The Machine volume is small, simple structure, crushing ratio, small energy consumption, uniform discharge granularity, consumable parts consumption, noise, in Non-Metallic Mineral Mountain application widely, metal ore mountain application less .gh

# Grinding equipment

Gzm series conical ball mill

Product features: Product features the series of cone ball mill is a new energy-saving ball mill, after nearly two decades of development, has occupied a leading position in the field of grinding, processing and production has been extended to all areas of the mining field

# Stirred tank

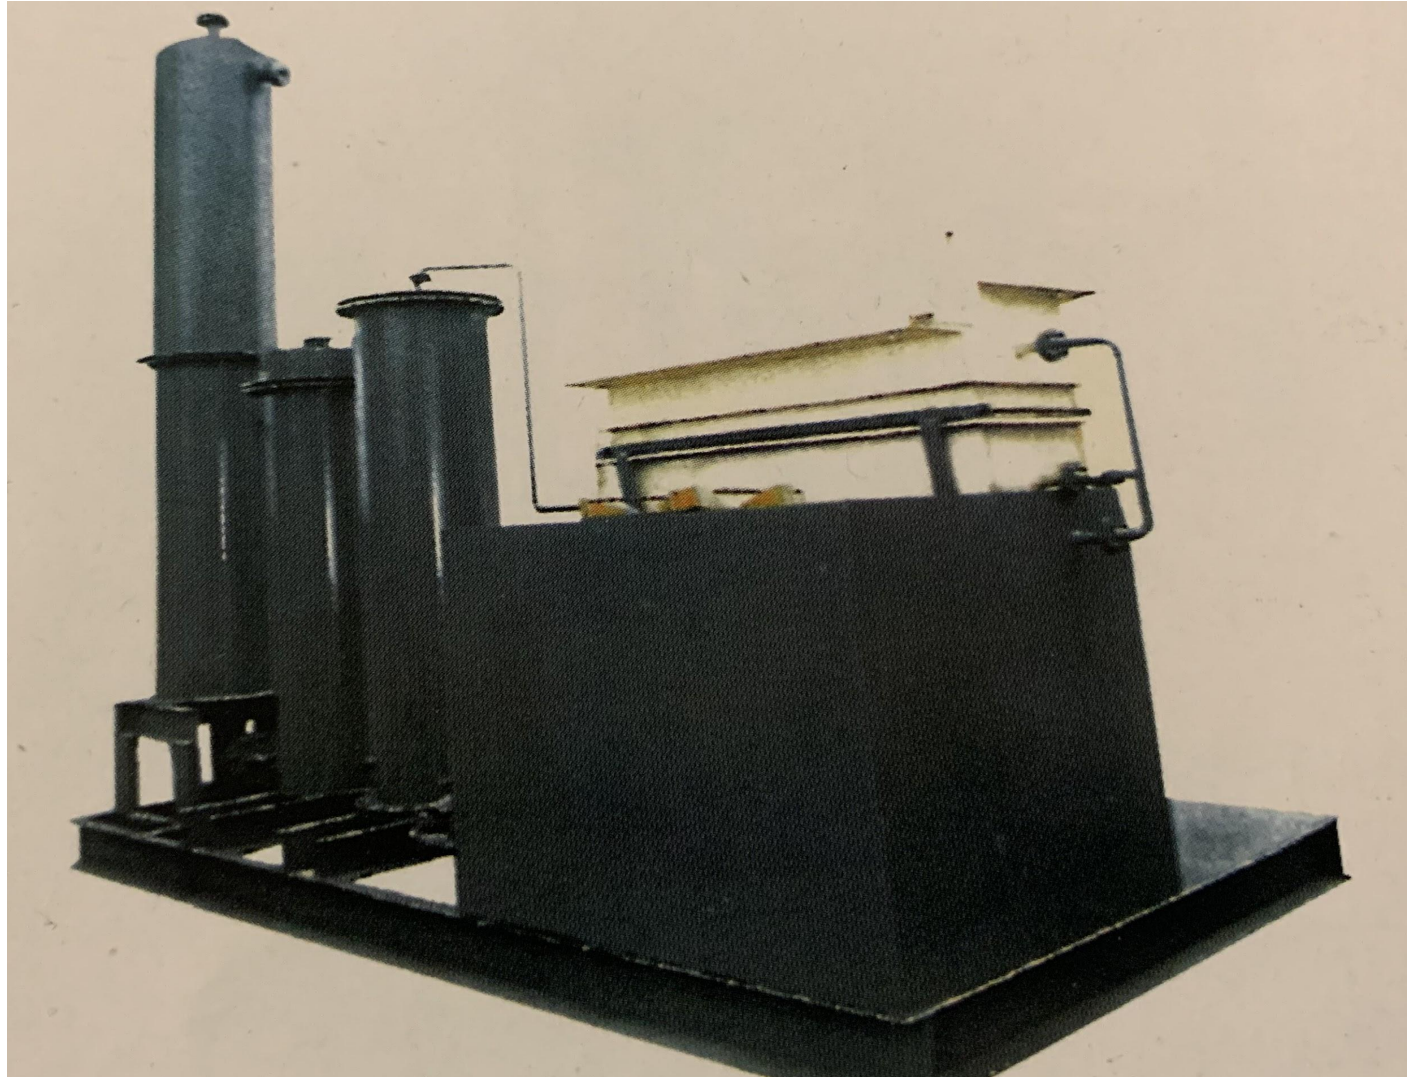

RJ single impeller stirred tank

Product features: the product is generally used in general stirred tank, the circulation pipe is located in the lower opening of the wheel, the pulp, mineral added to the circulation pipe. The company through experiments to design a new impeller is different from the original! Type II stirred tank, stirring speed.

# Cyanidation equipment

Analytical electrolysis equipment

Product features :gold absorption electrolysis equipment is the key equipment of gold cyanide cinder process, by electric heater, desorption Tower, heat exchanger, electrolytic cell, pump and other components. The components of the complete set of equipment forming, compact structure, easy installation, desorption rate greater than 96%, electrolysis rate greater than 99%.

An aerial night view of a city skyline, likely Chicago, with numerous skyscrapers illuminated. A white text box is overlaid on the image, containing the company name in English and Russian. The background shows a dark blue sky with some clouds and a body of water in the distance.
