

DRESSING ROOM

DUTIES OF A DRESSING NURSE

Dressing room is a separate specially equipped office for performing dressings and carrying out procedures and manipulations performed for the purpose of their treatment. Injections, punctures, and small-volume surgical interventions can be performed in the dressing room.

1. To ensure the maintenance of the working order and sanitary hygienic regime in the dressing room

2. Prepare the dressing material, put it in boxes and deliver it to the autoclave for sterilization

3. Clean used surgical instruments, prepare them for sterilization and sterilize them in a dry-burning cabinet

4. Cover a sterile table with dressing material and instruments

5. Help the doctor during dressings

6. Apply bandages to patients

7. To direct the work of the dressing nurse
