services

SEO

Step 1

ANALYSIS

The site must be optimized for search engine algorithms. To do this, you need to analyze the resource

Step 2

STRATEGY

For each site you need to develop a strategy

Competitors:

<https://www.northwesternplastics.com/the-medspa/>

<https://www.spaderma.com/>

<https://www.goldcoastmedspa.com/>

<https://oldtownmedspa.com/>

<https://www.naturalbeautymedspa.com/>

Table of comparison:

Position	Google Page Speed	Mobile	Desktop	SSL	Ref.domains	Ref.links	Indexed Page	Mobile Friendly	Age	Keywords
1	https://www.northwesternplastics.com/	23	77	YES	279	1400	488	YES	2010	1600
2	https://www.spaderma.com/	13	65	YES	96	562	171	YES	2006	4900
3	https://www.goldcoastmedspa.com/	32	87	YES	64	237	234	YES	2002	304
4	https://oldtownmedspa.com	4	20	YES	39	378	473	YES	2016	638
5	https://www.naturalbeautymedspa.com/	93	99	YES	52	193	159	YES	2009	392
OUR	https://www.soluxmedspa.com/	32	37	YES	33	2000	112	YES	2010	252

The site clearly lags behind the niche leader <https://www.spaderma.com/> that collects 10 times more traffic than our website <http://prntscr.com/p1mx0x> and for comparison, our <http://prntscr.com/p1mxgu> .

It is quite realistic to catch up with the leader of the niche, as he can reach the main SEO metrics.

Growth point:

- redo the current site, or do it from scratch
- to work on the usability of the site
- working with the link profile of the site
- expansion of the site structure, creation of profile landing pages for all offered services

ELIT  WEB

SUCCESS STORIES OF OUR CLIENTS

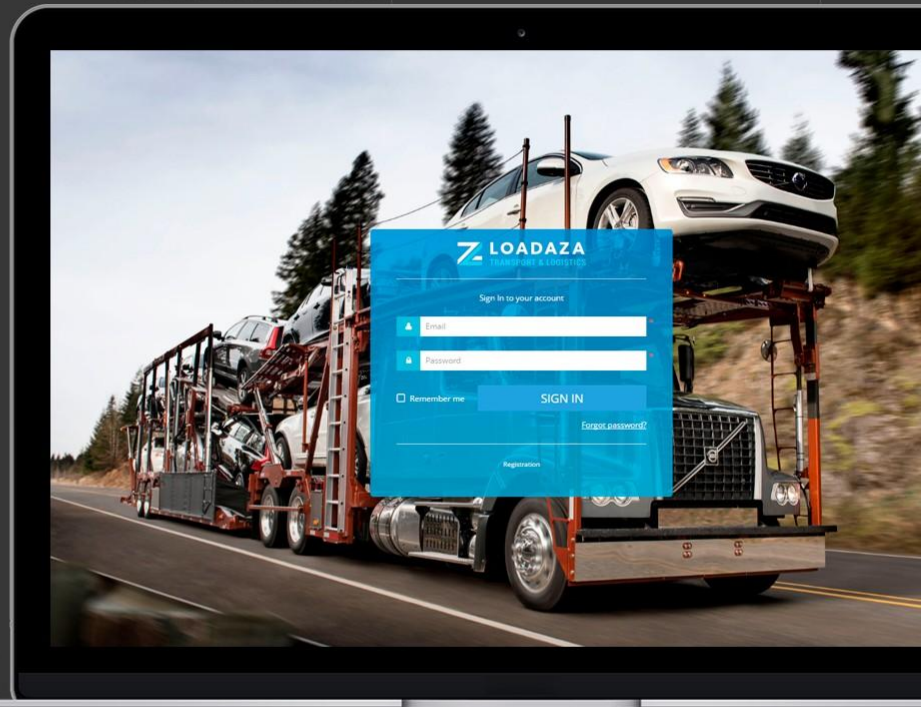

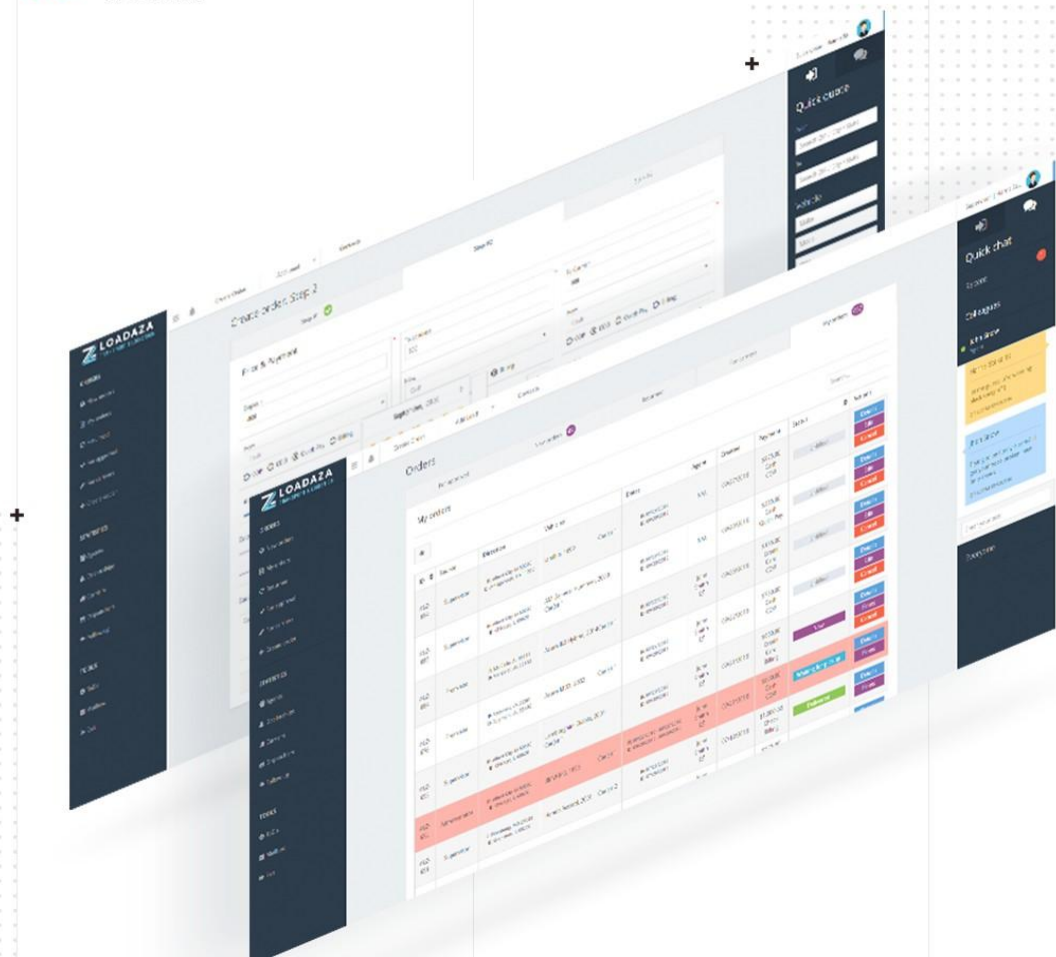

LOADAZA TRANSPORT & LOGISTICS

An app for vehicle shipping requests aggregation
in the USA

Project type
WEB

Field
LOGISTICS, STAFF MANAGEMENT

Customer

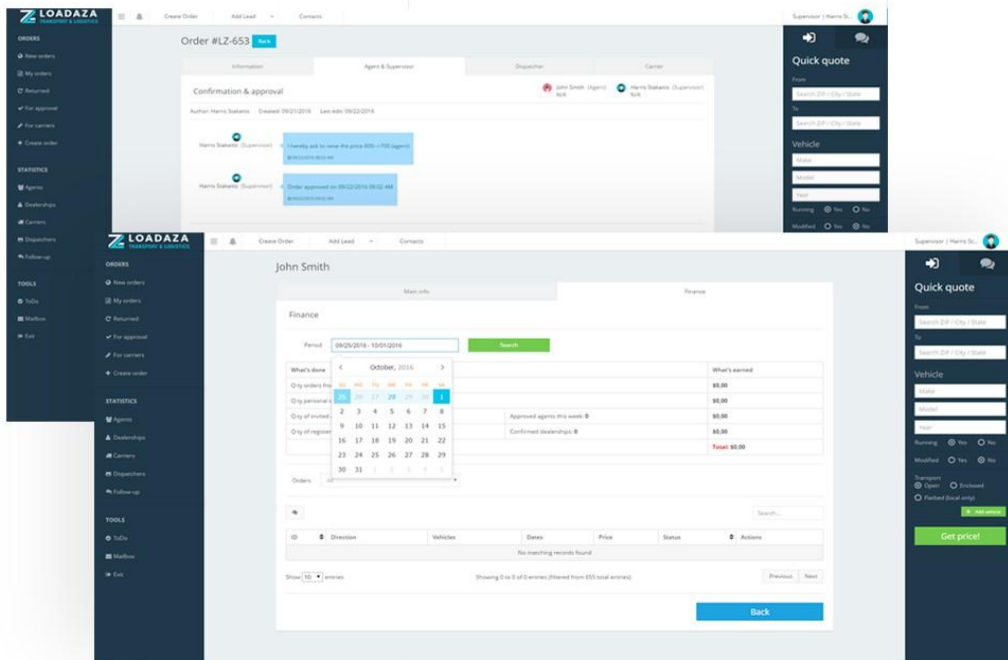

Aleksandr Nikolaichuk, Chicago entrepreneur

Aim

To organize the collection of shipping requests for customer's company and provide an opportunity to act as a mediator transmitting orders to other carriers

Team

Designer, Front-end, Back-end (5 experts), QA, planner

Solution

As a result, we developed two projects. The first one allows customers to make requests and fulfills such functions:

01

Automatically calculate order cost

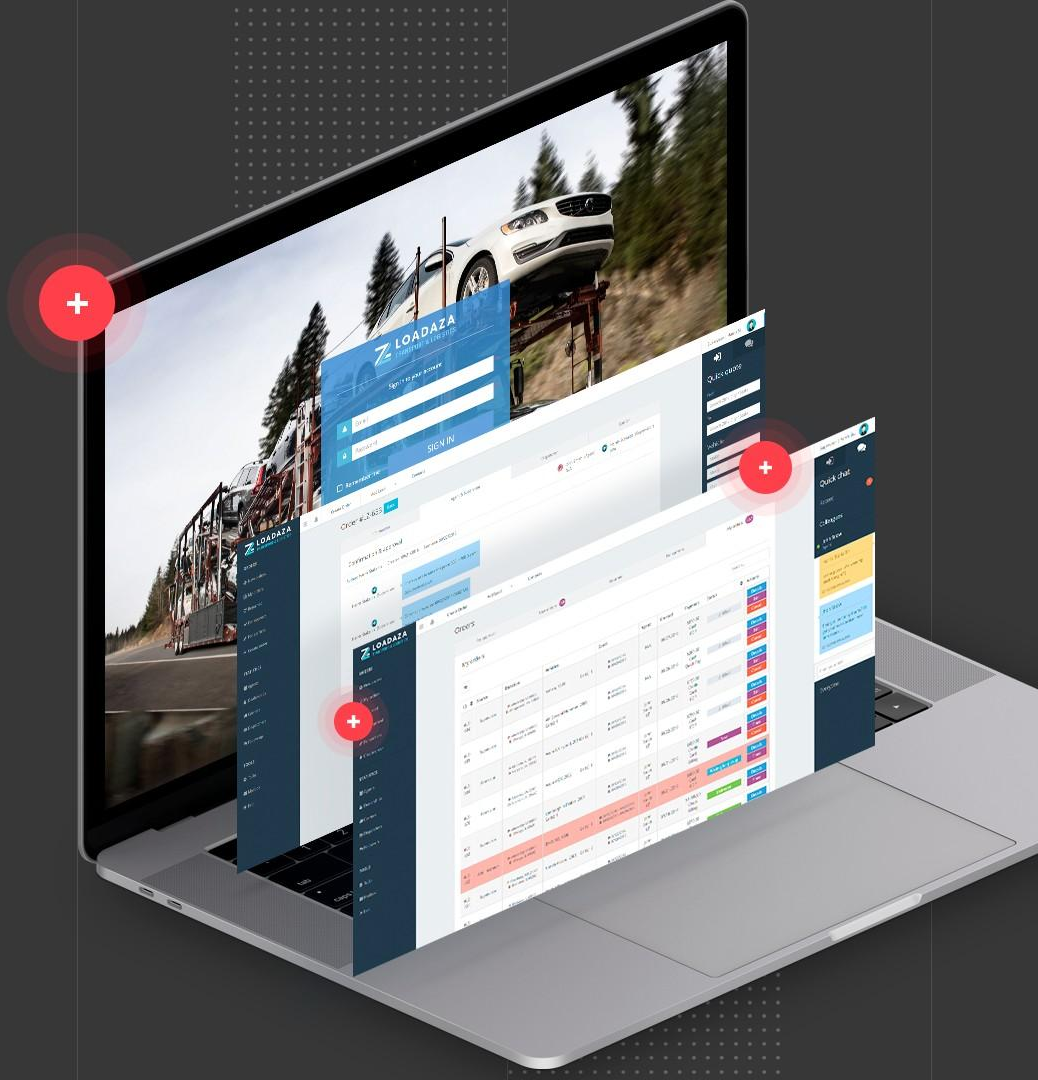

02

Keep a record of shipping requests

The second project is a back-office management system that allowed automating the majority of personnel management processes.

Result

The project gave the customer an opportunity to extend his range of services and to profit by mediation in transactions, as well as to automate the process of personnel management

EXAMPLES OF DEVELOPMENT SOLUTIONS

Cases

ELIT WEB

ЖК “SPASSKY”

Spas Sky - from the Ukrainian State Housing Corporation «UKRBUD». We have released the convenient interface for navigating through the floors, and a very simple and clear filter allows to choose a flat for any taste.

The layout of every floor we performed in digital vector form, that made it possible to implement interactive animations when choosing a flat.

Since every page is overloaded with visual elements, we have implemented smooth transitions between pages, which in turn is hiding the effect of content uploading and making transitions softer and more pleasing to look at.

ПОСТАШУВАННЯ

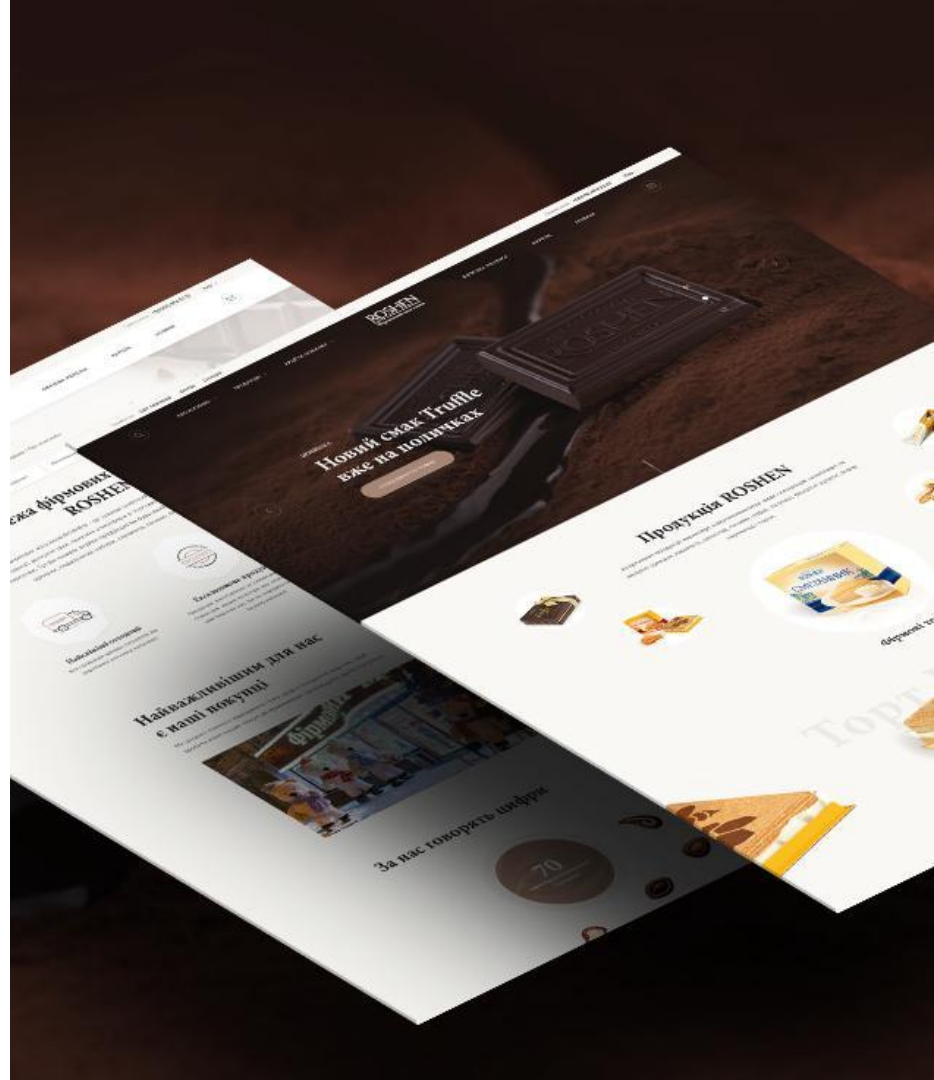

АРХИТЕКТУРА

ROSHEN

The website development for chain of retail candy stores of Roshen Confectionery Corporation with the catalogue of products of exclusive sweets with the opportunity to see on the map the chain stores and choose an alternative route to the nearest convenience store.

The most convenient users section has also been implemented

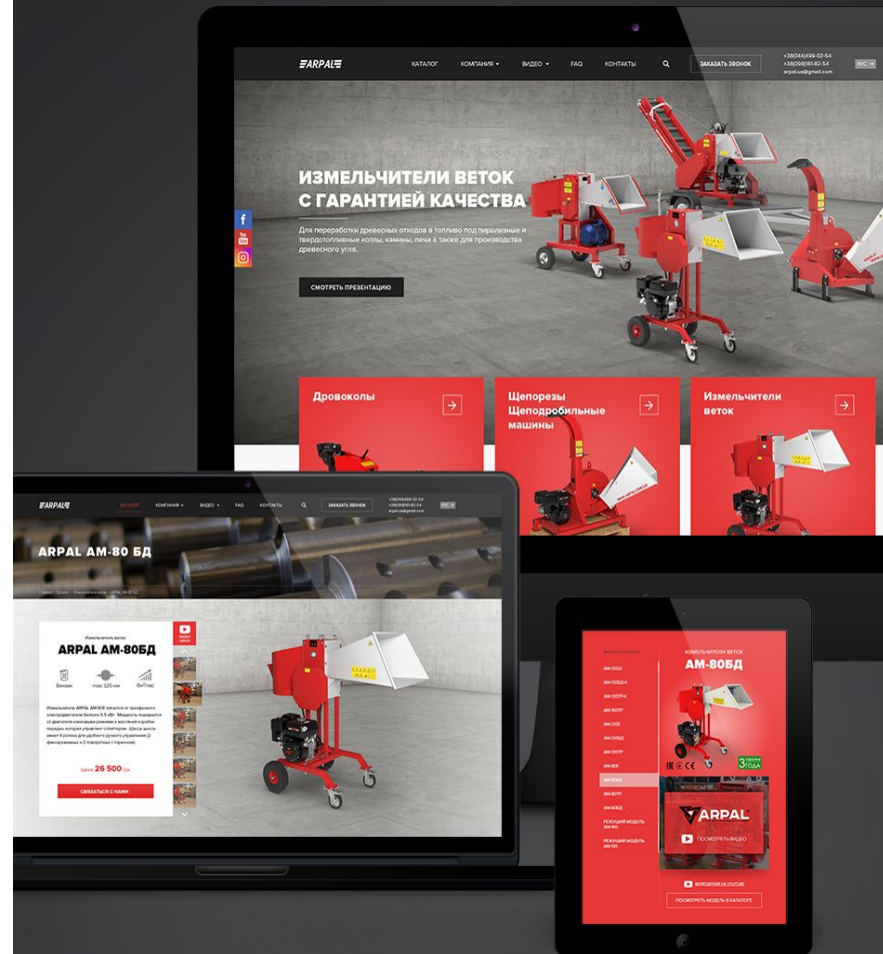

ARPAL

The catalogue site development for manufacturer of branch shredder equipment, splitter and other equipment with 3D modeling realization and opportunity to observe equipment with 360-degree coverage using the plugin.

The primary task of the team was to form the attitudes of consumers about the expertise of the team in the design and manufacturing of equipment through website design, content and structure. To make it possible to understand that the company is inherently unique, all manufactured equipment is protected by patents.

It was necessary to make it as simple and clear as possible to study the technical parameters of the catalog, to see the video reviews of real users.
