# CLOUD STORAGE

At this time there are so many cloud storage services. But one of the most versatile is Google Drive from Google Inc.

## Little fact

Google Drive was presented on April 24<sup>th</sup> of 2012 and already in October of 2014 its audience consists of 240 million active users.

# WHAT IS A CLOUD STORAGE?

## Let's ask a Wikipedia

**Cloud storage** is a model of data storage in which the digital data is stored in logical pools, the physical storage spans multiple servers (and often locations), and the physical environment is typically owned and managed by a hosting company. These cloud storage providers are responsible for keeping the data available and accessible, and the physical environment protected and running. People and organizations buy or lease storage capacity from the providers to store user, organization, or application data.

# USABILITY AVAILABILITY SAFETY

- Google Drive is very easy to use.

For example: to download file to your cloud you need only drag it to page and it'll be downloaded automatically

- All faults in the system immediately identified and corrected.

Information leakage can not be.

- To all of your friends or colleagues can browse a document, you can upload it to Google Drive and give them access to it. Now everyone can view files, add new ones and edit old ones
