

Zhytomyr State University Tehnoholohichnyy

History of origins.

Departments.

1960-1974 years

- Late 50's and early 60's. In the former Soviet Union was marked by the rapid development of the industry, opening new enterprises with modern technological equipment, which in turn required a significant increase in training engineers. This is largely concerned and Ukraine, where industrial development was accelerated. Regarding Zhytomyr, it is in this period began to run enterprises subordinate to the Union: "Elektrovymiryuvach" "Schytavtomatyka" (hereinafter - "Promavtomatika"), "Factory of automatic machines"; reconstructed old factories and factories. To overcome the shortage of engineering personnel Ministry of Higher and Secondary Education of the USSR March 11, 1960 issued a decree №84 "On organization of General faculties" in the country. Order of the USSR Council of Ministers of 11 May 1960 obliges local authorities to create the necessary conditions for training engineers at the evening and correspondence education.

- In general engineering departments relied organization of educational process by distance learning in the first stage (I-III courses) of general and general engineering disciplines and by evening the form of a complete cycle of study.
- Continuing Education at the second stage (IV-VI courses) occurred in other educational institutions of the USSR under the target shifted according to the chosen specialty. Creating extra-base units as components of leading universities guarantee high quality training and research contributed to solving many social problems at the local and regional levels

Faculty of Mechanical Engineering

Faculty of ICT

Faculty of Economics and Management

Hirnycho-Ecological Faculty
