Stadium Perimeter LED Display System Solution

QSTECH Co.,
LTD

QSTECH LED Products provides display service in
various international sports events

AERS ST

Latest generation of stadium display product
A more specialist perimeter product

The background features a series of overlapping, wavy lines in shades of green and yellow, creating a sense of motion and depth against a dark green backdrop.

Perimeter Product Design

1. ARES ST Application Scenarios

Ares ST perimeter is mainly installed around the competition venue for advertising broadcasting, which realizes easier poster replacement than that of traditional spray painting. Its dynamic effects and simple operation settings can increase advertising revenue by getting higher exposure.

2. Display Panel Size

ARES ST (OUTDOOR)

Display Panel Size: 1600 x 955 x 120mm (W×H×D)

Display Module Size: 400×300mm (W×H)

Product Pixel Pitch: 10mm / 12.5mm

31kg

ARES ST (INDOOR)

Display Panel Size:

1500×800×120/1000×800×120 mm (W×H×D)

Display Module Size: 250×400mm (W×H)

Product Pixel Pitch: 6.25mm

30kg

3. Display Panel Components

4. Convenient Maintenance

- Front and rear access available for display module, enabling fast disassembly and installation

5. High Stability

- Apply hard connection for modules, which can reduce failure rate and save maintenance time.
- IP65 rating and fully waterproof design, ensuring sound operation in any weather.

6. Impact Resistance Design Provides Dual Protection Guarantee

- Each panel top is equipped with a sponge pad.
- Rubber soft mask for panel display surface can effectively alleviate the damage caused by impact.
- Dual protection not only can protect the LEDs, but also will not cause injury to athletes when panel collision happens.

7. High IP Rating Enables Safe And Stable Performance

- Fully waterproof design for outdoor display panel, IP65 rated cabinet, fanless and noise-free operation.
- Leakage protector provides more protection.
- Fan-less cabinet design enables noiseless operation thus to create better arena environment.

8. Wide Viewing Angle

- 160° viewing angle
- Enhance the shooting effect of the lateral camera.
- Promote better advertising revenue.

9. High Refresh Rate

- High refresh rate guarantees stable picture display without smear, flicker, and frame loss phenomenon, which is perfect for television broadcasting needs under the shooting of professional camera and telecamera.
- With efficient optical fiber transmission system, the product can reduce the signal delay caused by the long transmission distance in football field, and ensure the consistency of picture playing.

Low Refresh
Rate

High Refresh
Rate

10. Independent Support Structure

- The foot stand can be retracted to the cabinet bottom.
- With independent support structure design, the panel will not collapse even under strong external impact.

Work Mode

Transportation Mode

11. Efficient Installation

- Panels can be connected quickly from left to right without any tools.
- The slot for wiring are reserved between the panels, ensuring neat product appearance without exposed cables.
- Adjusting valve in the panel bottom can overcome the unsatisfactory splicing seam caused by uneven ground.
- Efficiently save installation time.

Fast Connection Lock

Wire Slot

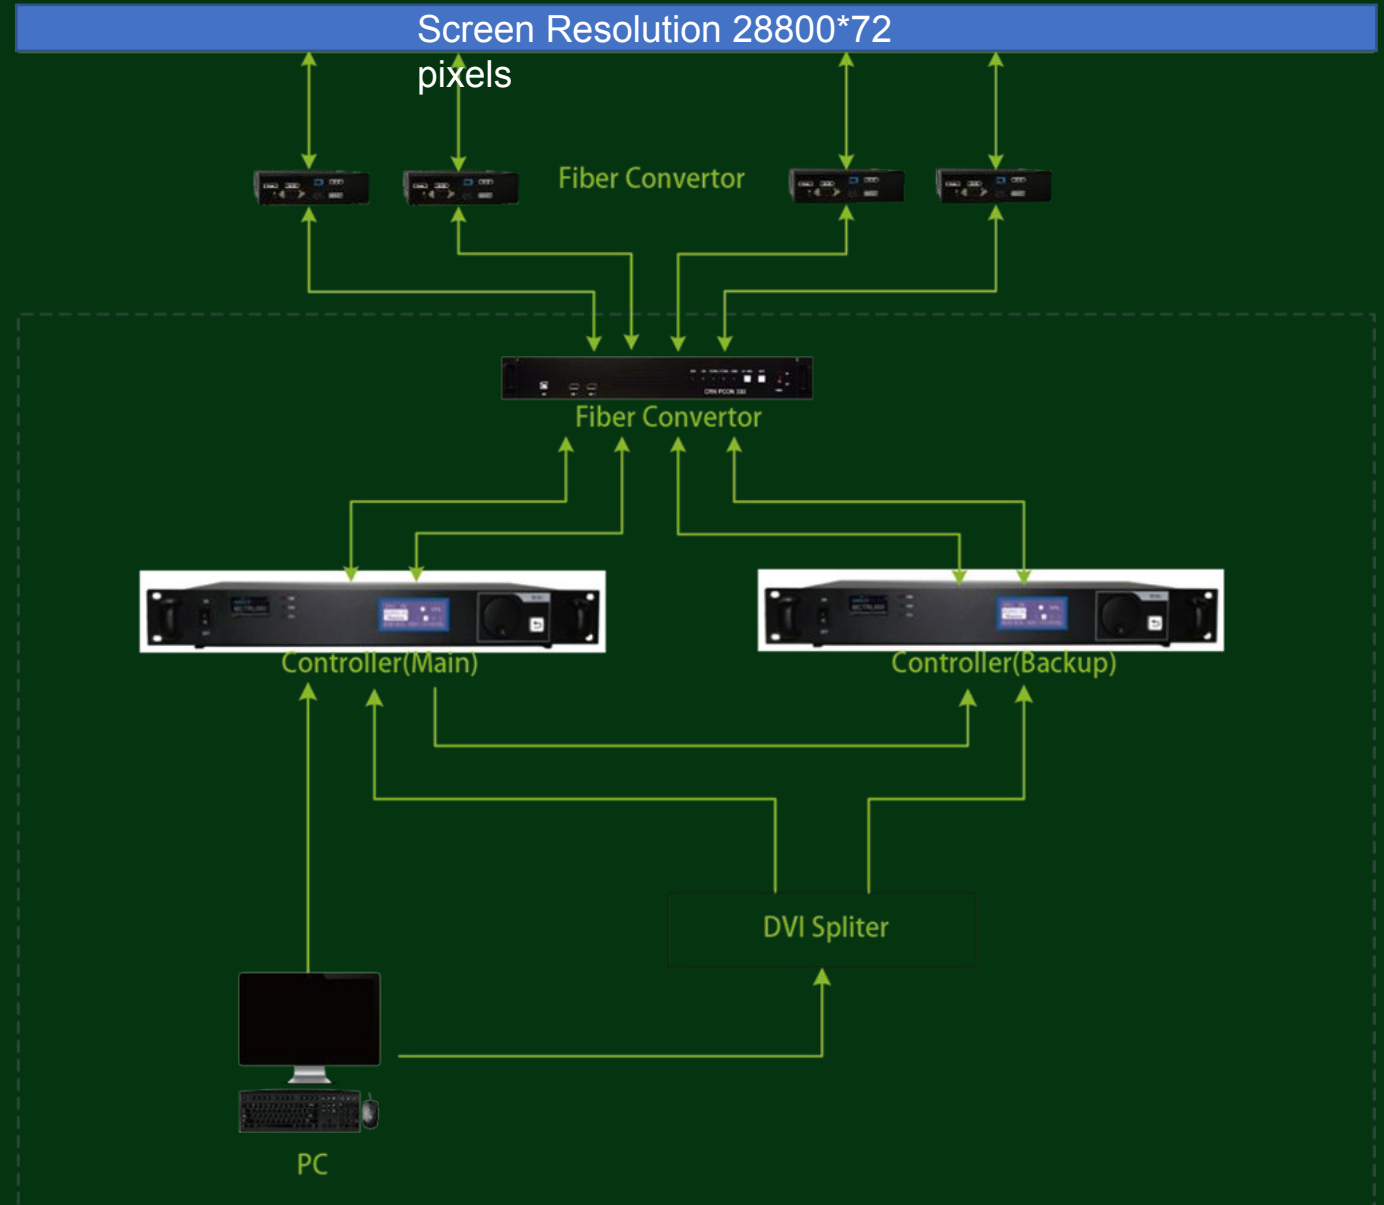

ARES ST (OUTDOOR)

12. Dual backup for signal and power supply (UEFA configuration is available)

- With dual backup function of signal and power supply, two computers can control the LED display at the same time. When one computer fails, another computer can automatically take over the control to ensure the normal operation of display screen.
