

# The systems of education

in Great Britain and Kazakhstan

## Education in Great Britain

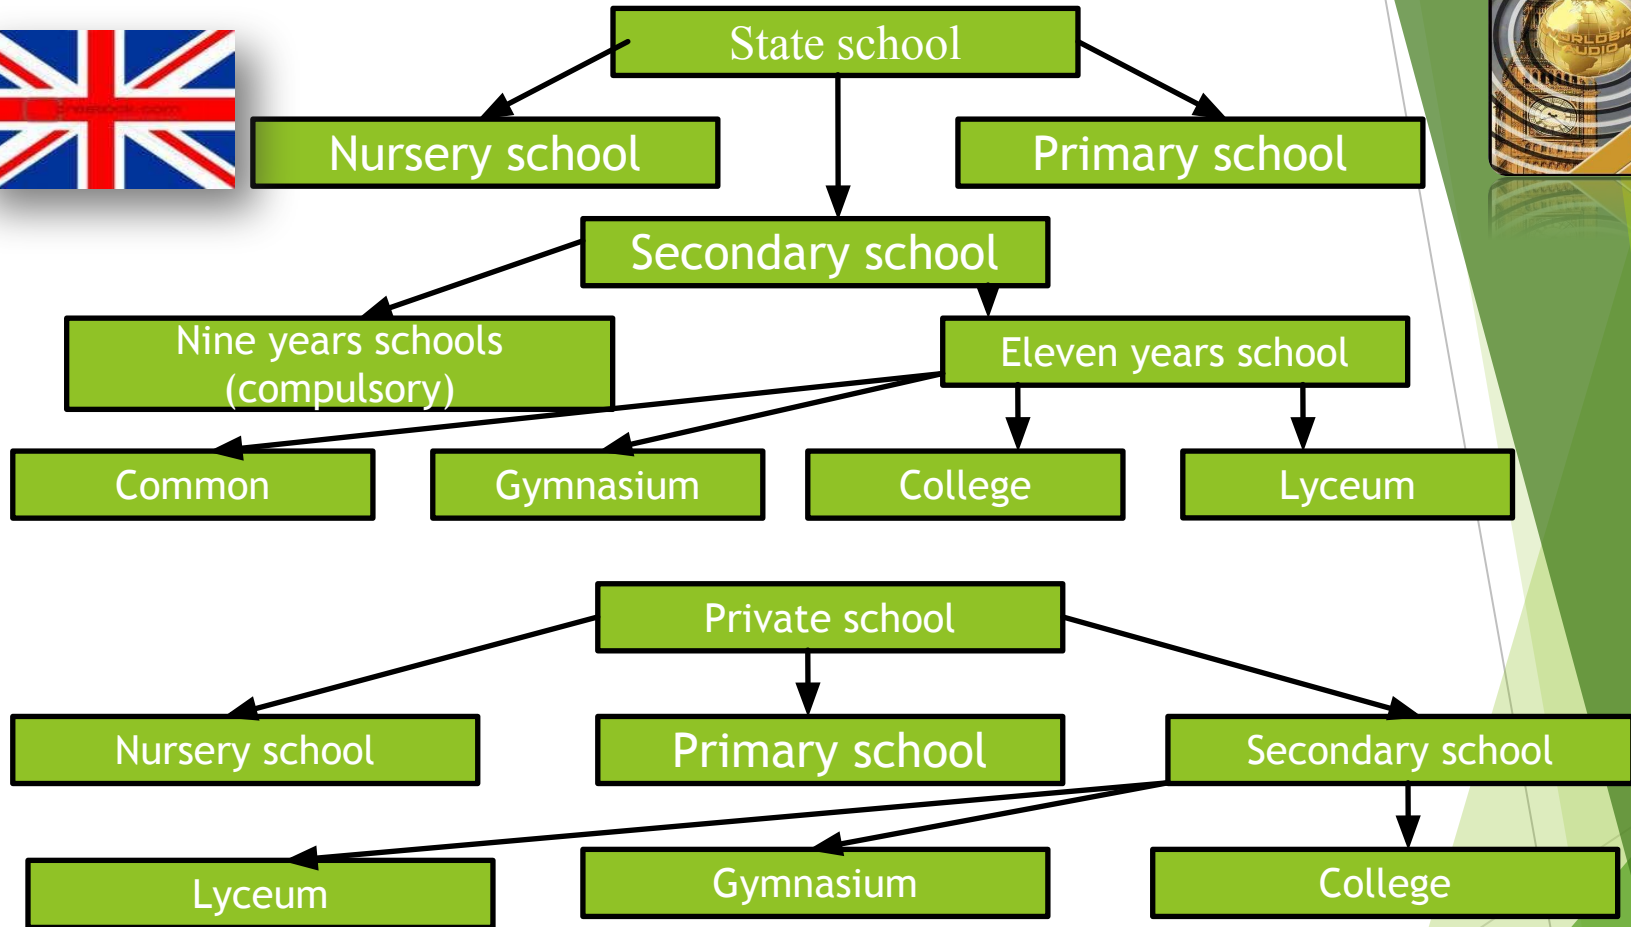

In Great Britain children start going to school when they are five and continue studying until they are 16 or older. Compulsory education begins at the age of five when they go to primary school. Primary education lasts for six years. First they attend the infant school from five to seven. In infant schools children don't have real classes.

## Education in Kazakhstan

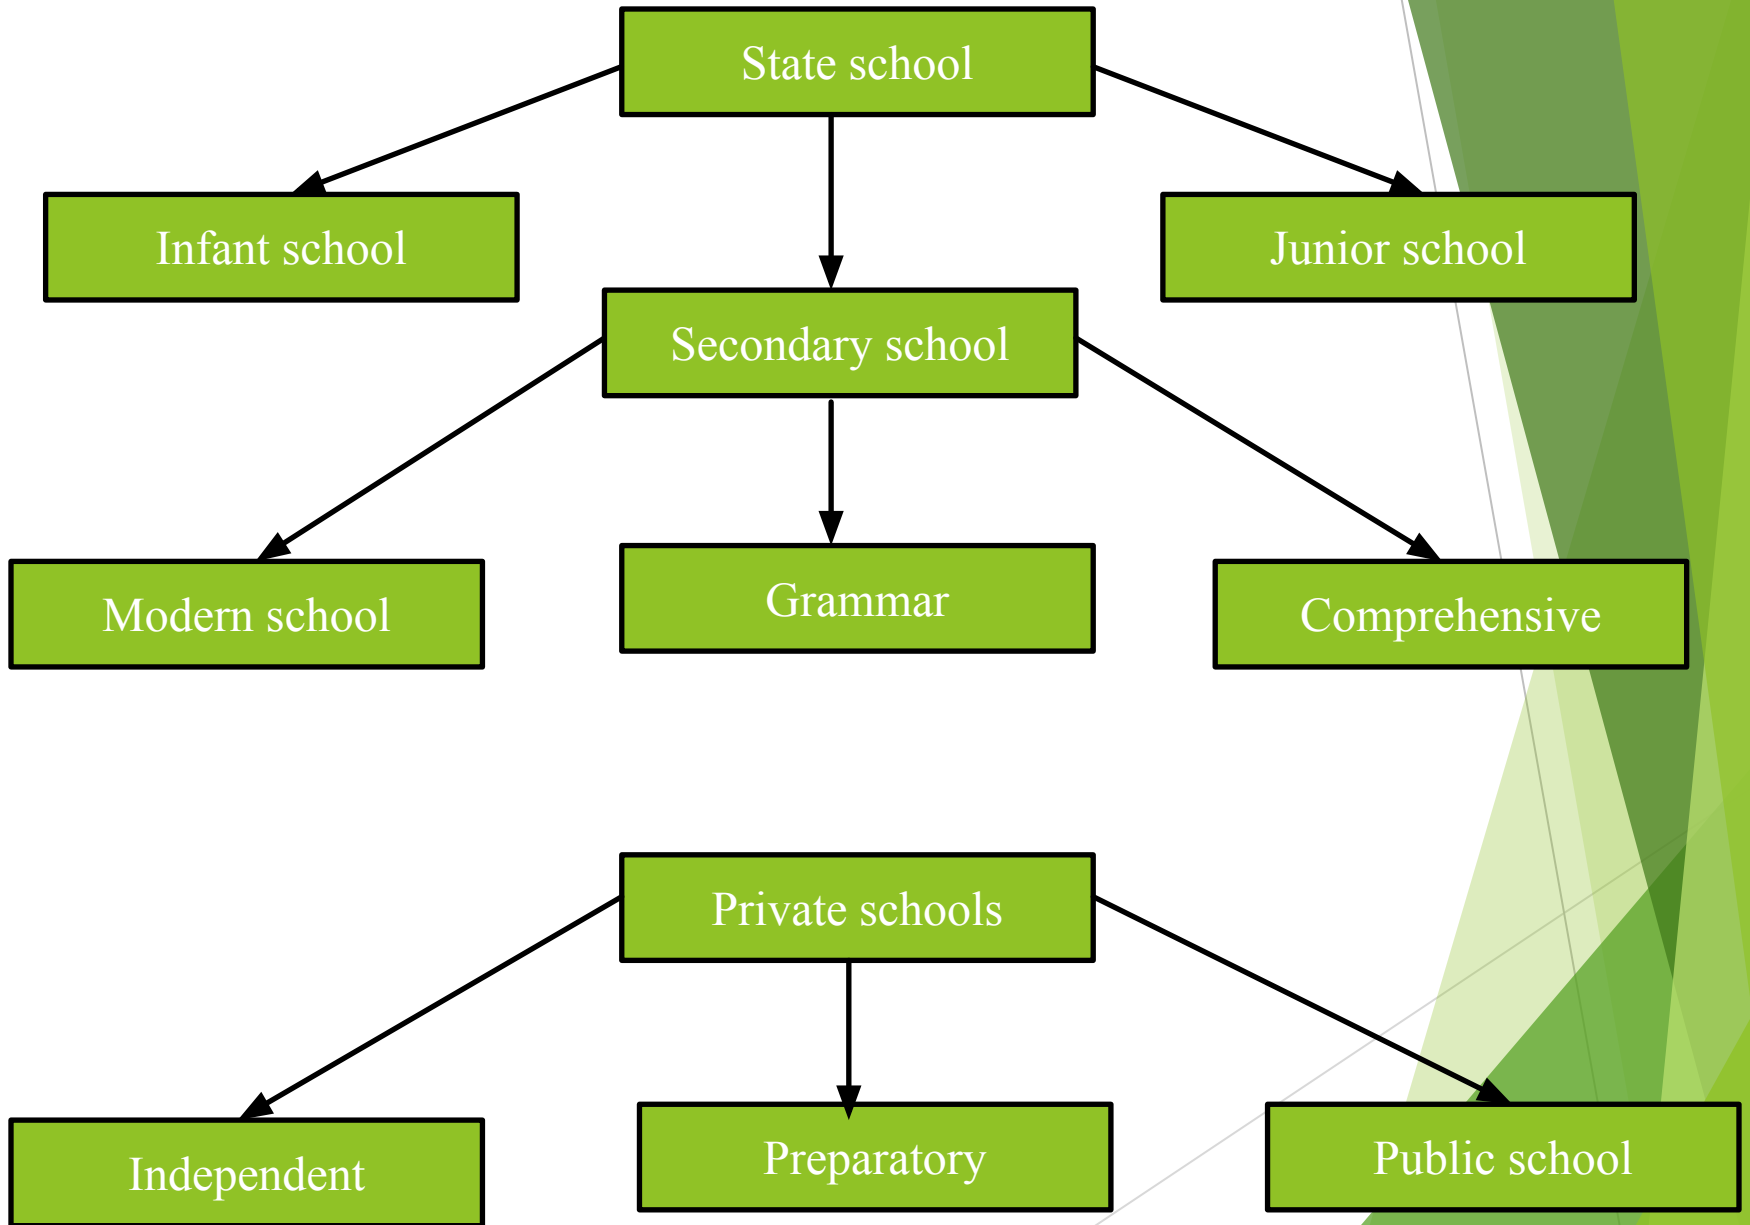

We started school at the age of seven. After four years of primary school we went to secondary school. Primary and secondary schools together comprise eleven years of classes are compulsory in our republic.

# Higher education in Great Britain

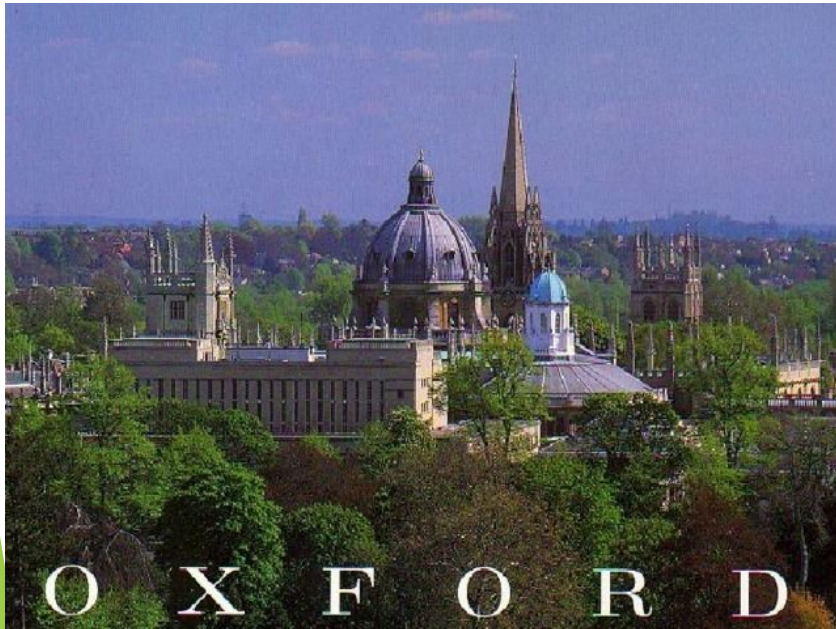

**Higher education in Britain** has a long and distinctive history. The system of higher education in Britain includes universities, colleges of higher education and advanced courses in the further education. The British educational system on the higher level is still more selective and class-divided than secondary education, particularly so far as the oldest universities are concerned.

**There are 91 universities and 47 colleges of higher education today.**

The two oldest universities in England are **Oxford and Cambridge**. These date from the Middle Ages. Oxford is the oldest of these two universities, it is more philosophical, classical, theological. The history of Oxford began in 1168 that of Cambridge – in 1209 Among the English universities Oxford and Cambridge have a special eminence, and they are different from the others.

# The Best U.K. Universities

- University of Cambridge
- University of Oxford
- University of Birmingham
- University of Manchester
- University of Leeds
- Durham University
- University of Edinburgh
- University of Warwick
- University College London
- University of Southampton

**All British Universities are private institutions. Every university is independent, autonomous and responsible only to its own governing council. Although they all receive financial support from the state, the Department of Education and Science has no control over their regulations, curriculum, examinations, appointment of staff, or the way they spend money. The number and type of faculties differ from university to university. Each university decides each year how many students it supposes to admit. The admission to universities is by examination or selection (interviews).**

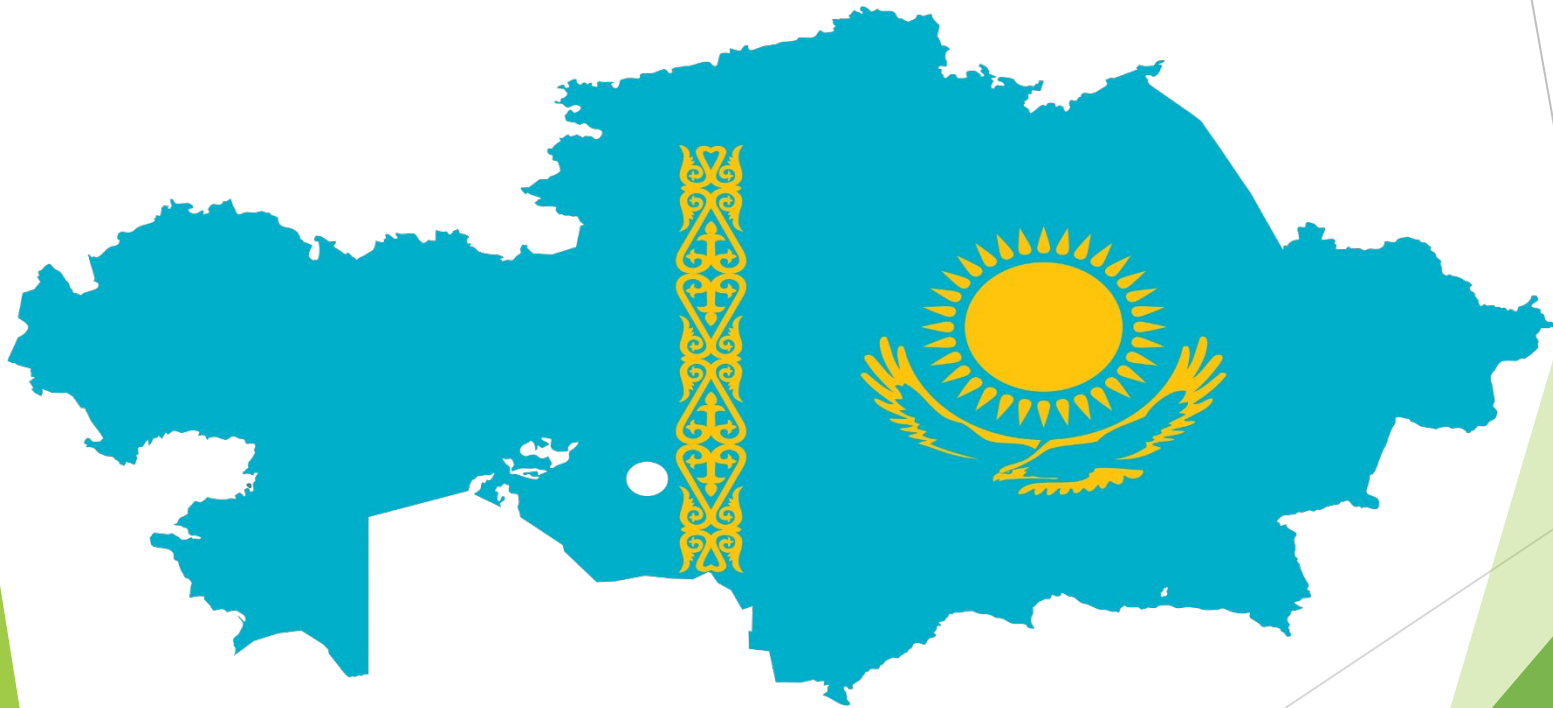

**The general pattern of teaching is similar throughout Britain-a combination of lectures, small group seminars or tutorials with practical classes where necessary. The students receive grants. They have to pay fees and living costs but every student may receive from the local authority of the place where he lives a personal grant which is enough to pay lodging and food – unless his parents are rich. Most students take jobs in the summer for about six weeks, but they do not normally do outside work during the academic session.**

**Students who pass examinations at the end of three or four years of study get Bachelor's degree. The first postgraduate degree is normally that of Master conferred for a thesis based on at least one year's fulltime work. Universities are centers of research and many postgraduates are engaged in research for higher degree, usually Doctorates.**

**The British government does not think to build more new universities. There is a tendency to expand the older ones.**

**The basic purpose of the higher education is to give a first-class education and to enable their students to reach a high standard of creativeness, criticism and flexibility. They teach how to increase and employ knowledge.**

# Higher education in Kazakhstan

**Higher education in Kazakhstan is acquired on the basis of secondary education. For admission to university graduates of schools and pass final exams in the form of uniform national testing (ENT) or complex testing (for graduates of previous years).**

# Universities of Republic of Kazakhstan

- ▶ - **Total - 175 universities**
- ▶ - **119 - private**
- ▶ - **Number of students - more than 768000**
- ▶ - **Number of students on 10 000 of population - 512**
- ▶ - **Number of university specialities**
  - 129 – bachelor**
  - 137 - master**

## **University objectives in KZ:**

- Ensuring active positioning of the university in the global educational space and in the international labor market;**
  - Ensuring the integration of education, science and industry;**
  - Conducting scientific research aimed at the needs of the cluster sectors of the economy;**
  - Creation of a transfer of knowledge, developments and technologies;**
  - Provision of a wide range of educational services, a wide variety of educational programs;**
  - Providing a high standard of teaching fundamental and applied disciplines;**
  - Implementation of an effective management system.**

**All conditions for study, work and rest of students, postgraduates, staff and teachers have been created in Kazmkpu. The continuous process of training and implementation of research and innovation activities is carried out in 3 educational buildings, equipped with all the necessary equipment and software.**

**Comfortable lecture halls, laboratories equipped with control and measuring equipment, computer classes with modern software, diploma design offices meet the most stringent requirements. Every September, a special commission determines the readiness of the university for the new academic year, paying special attention to the sanitary and hygienic and aesthetic condition of classrooms, laboratories, office premises, halls and recreation, to ensure the requirements of labor protection and safety. During the year, all existing premises are repaired, decorated, equipped with the necessary furniture and inventory.**

**The university is connected by a local network with Internet access, WI-FI stations distribute high-speed Internet throughout the university. In each of the buildings, in which the scientific and educational process is carried out, there is a conference room or special rooms for events that gather a large number of participants, an assembly hall, etc. A video surveillance system is installed throughout the university. There are special rooms for web-seminars and online conferences.**

**The conditions created at the university make it possible to train highly qualified specialists in each direction, conduct scientific research at a high level, and get satisfaction from the work performed. Thanks to the developed internal infrastructure, the university has become the most comfortable place for learning, sports and creative development of students.**

**Thank you for your  
attention!**
