# Oil and gas transportation

---

Most oil and gas fields are far from where they are refined, so fast and economical delivery of them is very important for the development of the industry.

# Types of transportation

- ❖ Railway
- ❖ Water
- ❖ Pipeline
- ❖ Automotive
- ❖ Air

# Railway transport

- It is the most common type of transportation.

# Water transport

River

Transported  
in barges and  
river tankers.

Marine

Transported  
in sea tankers.

# Pipeline transport

It is carried out through special pipelines from the places of production to the places of consumption.

# **Automotive transport**

**It is the main type  
of transport  
for delivering oil  
and gas products.**

# Air transport

# Conclusion:
