WHY IS IT WORTH COMING TO THE USA FOR TREATMENT?

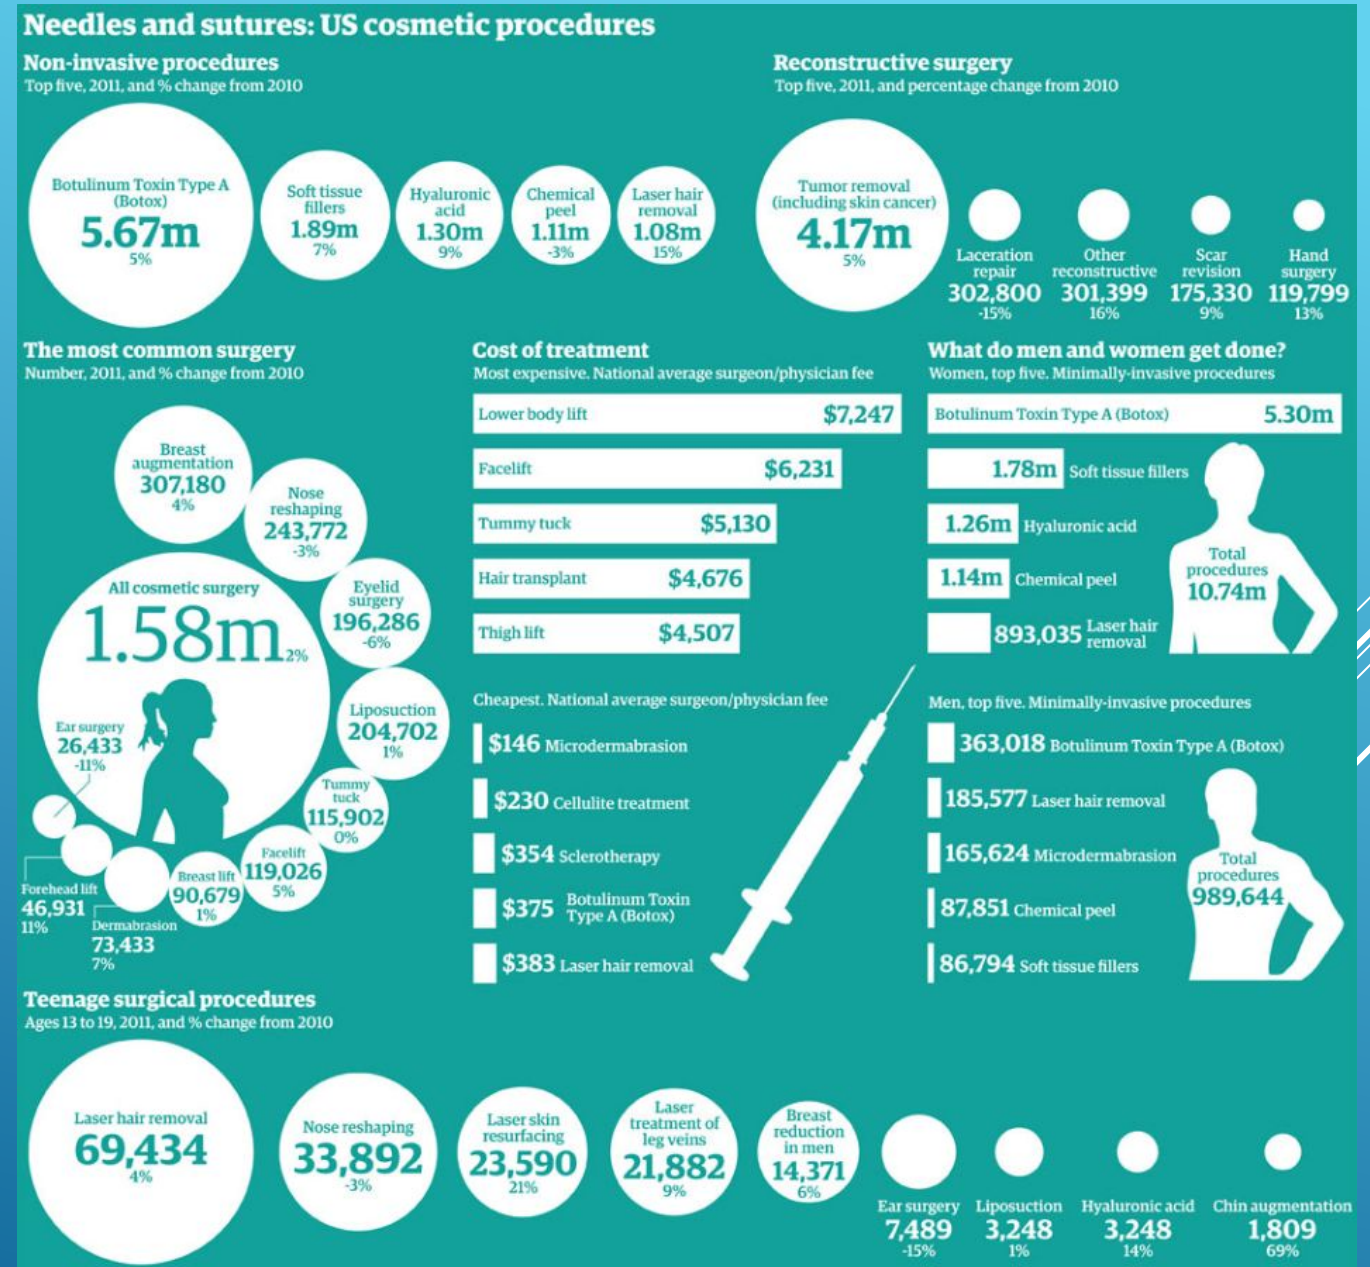

Today, the organization of treatment in the United States is deservedly popular because America is the leader in this industry (is in the TOP-5). There is maximum attention to health care: this can be seen in federal support, improvement of equipment, improvement of pharmaceuticals, research, and staff development.

Now America has the most advanced medical base, so getting rid of the disease in the USA is the easiest. It's worth coming to America for treatment, if only because of the diagnosis.

- ▶ Advances in medicine help identify problems at their earliest stages, quickly and accurately. Even general treatment in the USA is the most modern Innovative and most effective **drugs, the most modernized equipment, doctors of the highest international qualification** - all this with strict compliance with standards and norms. The organization of treatment in the United States is complex: at all stages of the stay in the clinic, the patient receives support, stays in comfortable conditions, and is surrounded by care. Related household issues are easily resolved, language barriers are erased thanks to the services of an interpreter, prevention is provided - you can focus exclusively on restoring health.

- ▶ Surgery options are another reason to come to America for treatment
- Operational assistance is provided at the highest level in the world. **The best plastic, vascular, and cardiac surgeons** work in the USA, and work on a narrow specialization, knowing everything in their field, and using state-of-the-art equipment. High-precision brain surgery, a **heart transplant**, a change in appearance - all this and much more is done.

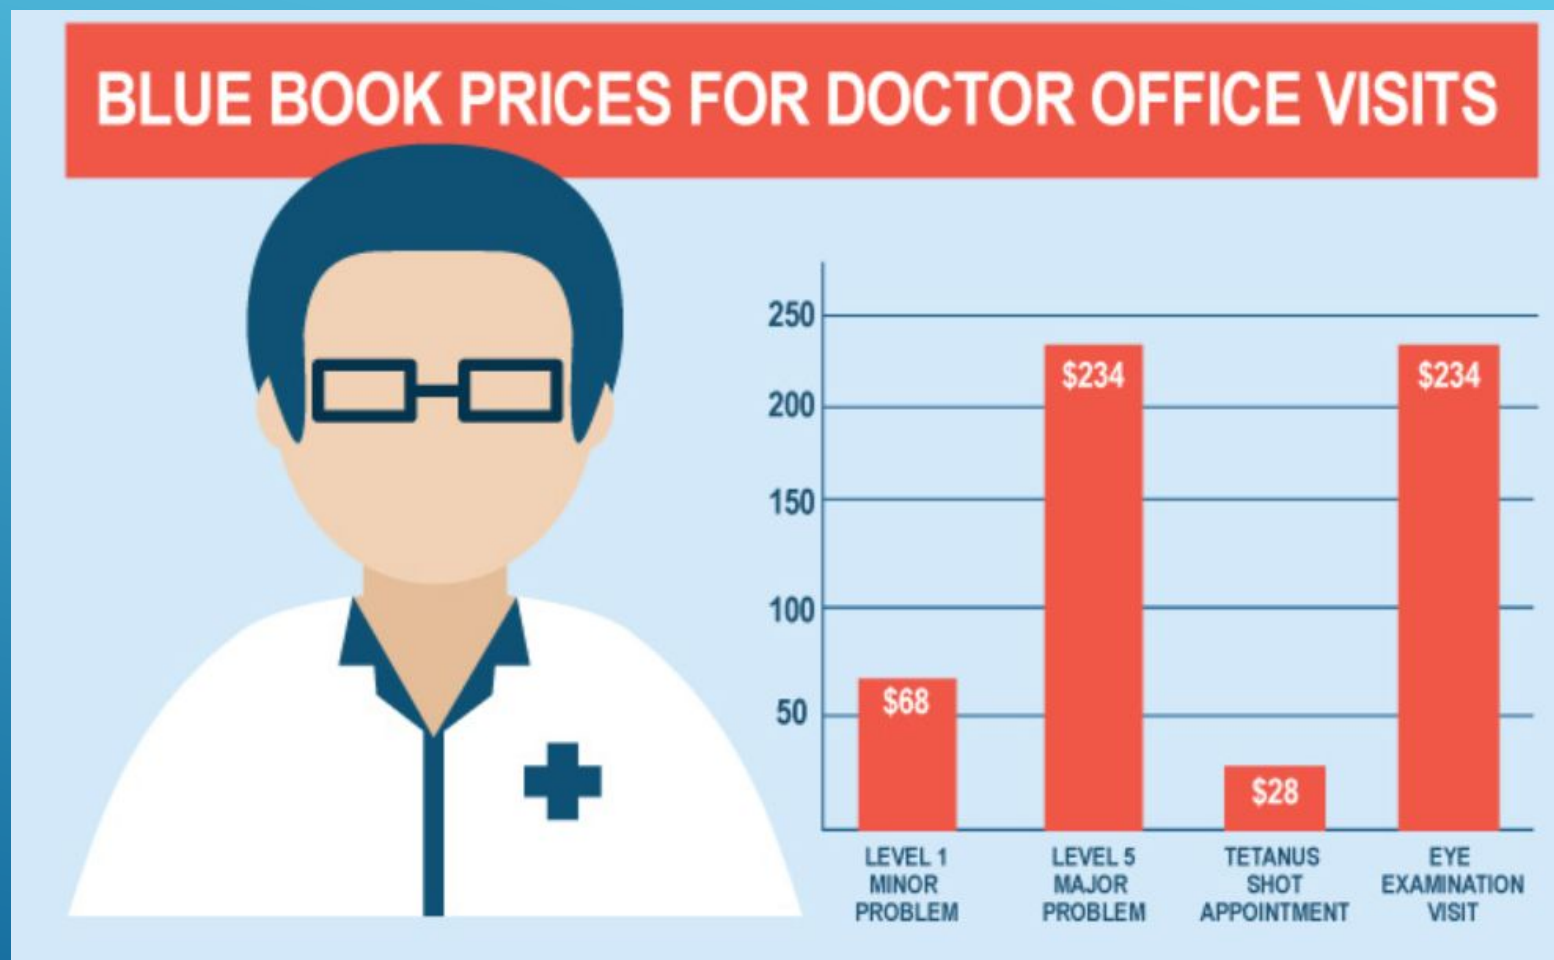

I CAN CONCLUDE WHY YOU SHOULD GO TO THE UNITED STATES FOR MEDICAL TOURISM:

1. There is a very high salary for doctors in the USA, therefore the best specialists work there.
2. To develop innovative technologies in the United States, enormous resources are allocated and all innovations primarily appear there.
3. The United States has the most up-to-date technical base and technology, so that it is possible to detect the disease in the early stages.
4. In the US, comprehensive treatment.
5. Innovative technologies in the USA are regulated, therefore they are so effective. The **FDA is the leader in global standardization**; it sets the standards for the appropriateness of applying certain methods.
6. Researchers work with practitioners, so innovative technology in the United States immediately finds its application.

MINUSES FOR OUR COUNTRY :

- ▶ 1. Price.
- 2. Distance from CIS countries (long flight)
- 3. The visa barrier.

Thanks for attention
and be healthy 😊
