Industry 4.0 is referred to as the 4-th Industrial Revolution. Revolutionary is certainly an advanced technology, progressively developed intelligent systems, communication and IoT, smart sensors and actuators, or collaborative robots working with people - Cobots.

Originating as the Flexible Advanced System Techniques (FAST) project, FAST/TOOLS today is a comprehensive, fully-integrated SCADA application suite. Powerful and flexible, FAST/TOOLS serves installations ranging from 50-point unit processes to multimillion-point offshore production and pipeline systems that extend over thousands of miles.
