COLLECTION 2021

Next Generation n Hunters

We have dreams about going places, explore new hunting grounds and change the way hunting gear is made, how it looks and what it costs. We are the next generation hunters.

We don't fear failing, we fear not trying. Because we know we can never go places if never take a step. We are curious and listen to our hunting friends when developing our products. We try a lot and believe in being brave about product development.

We are conscious about nature and streamlined in our production. We have taken all the unnecessary away, so that everything that is left – is a high quality, clean looking piece of hunting gear with a good price.

Technologie

S

Hi-Dry™+

Hi-Dry™ treatment makes the outer fabric water and dirt repellent. The material also dries quickly and maintains its exceptional lightness.

High-performance microfiber polyester fabric that keeps the hunter cool, dry and comfortable.

Brushed microfiber fleece that retains energy and prevents heat loss. Maximum insulation from cold with minimal weight and bulk.

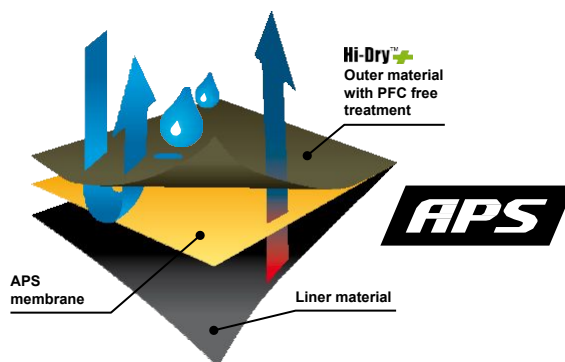

Amazingly soft merino wool is naturally breathable and warm material. It feels nice and cool when needed and it also dries very quickly.

RAIN-STOP® – membrane technology

- » Waterproof
- » Windproof
- » Breathable

Rain-Stop® equipped products are waterproof, windproof and breathable. Rain- Stop® membrane is used for outerwear and Rain-Stop® X-PROOF for footwear.

APS – Alaska Performance Shell membrane technology

- » Extra waterproof
- » Extra breathable
- » Fluorocarbon-free treatment

APS membrane uses the latest membrane technology providing extra waterproofness and breathability. All products equipped with APS membrane are made with fluorocarbon-free treatment.
