

Nord Stream 2 – Enhancing the EU's long-term energy security >

Pipeline Routing - Minimised for Length and Optimised for Least Environmental Impact >

- The Nord Stream 2 twin pipeline will run roughly parallel to the existing Nord Stream Pipeline
- The pipelines will be approximately 1,200 km long, starting at the Southern Coast of the Gulf of Finland in Russia and ending near Greifswald, Germany
- After examination of a number of possible route corridors, the shortlisted options cross Russian, Finnish, Swedish, Danish and German waters
