

# MARS ONE

---

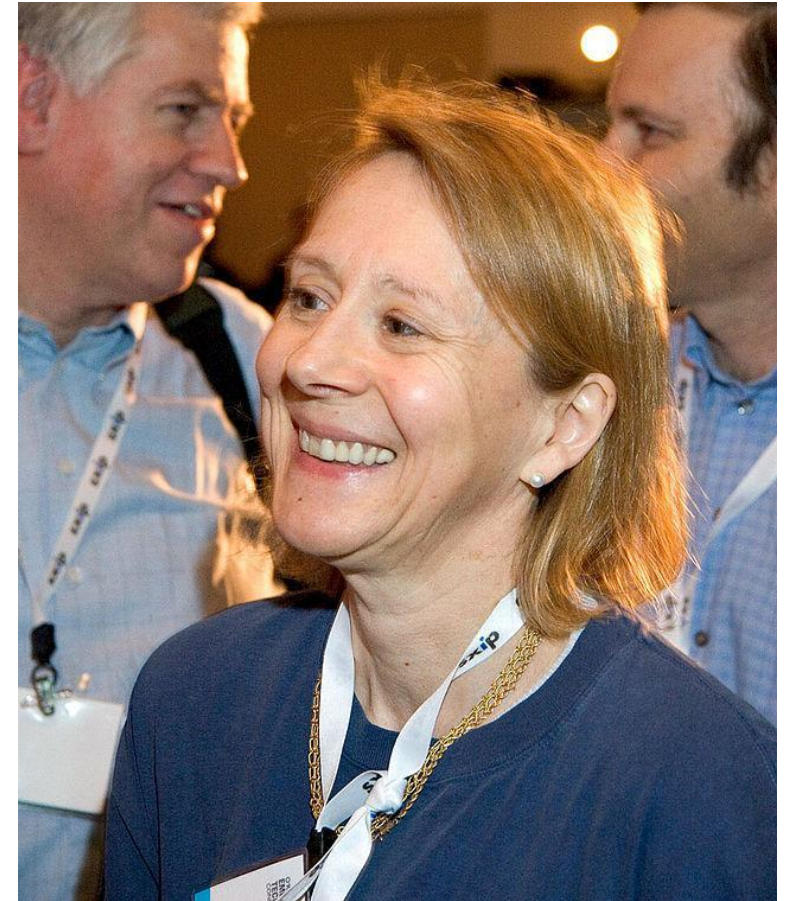

CHISTOGOV M.D.

# What do you think about leave our planet and begin life on Mars?

---

*“I joined the Mars One advisory board because I plan to retire on Mars... but not too soon! I want to help send some healthy settlers on ahead to get the place ready for me.”*

Esther Dyson (USA), investor and chairman of EDventure Holdings

# Do you know them?

---

Bas Lansdorp

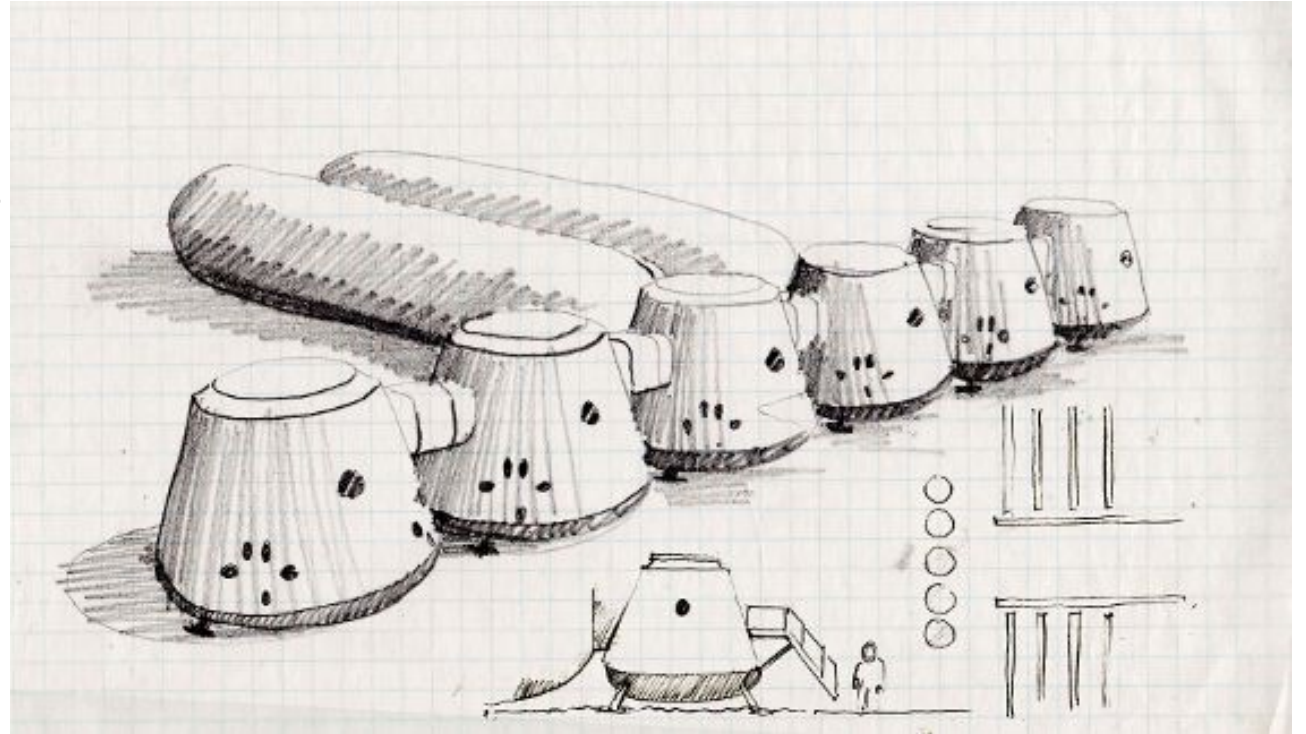

Arno Wielders

# Mars One team

---

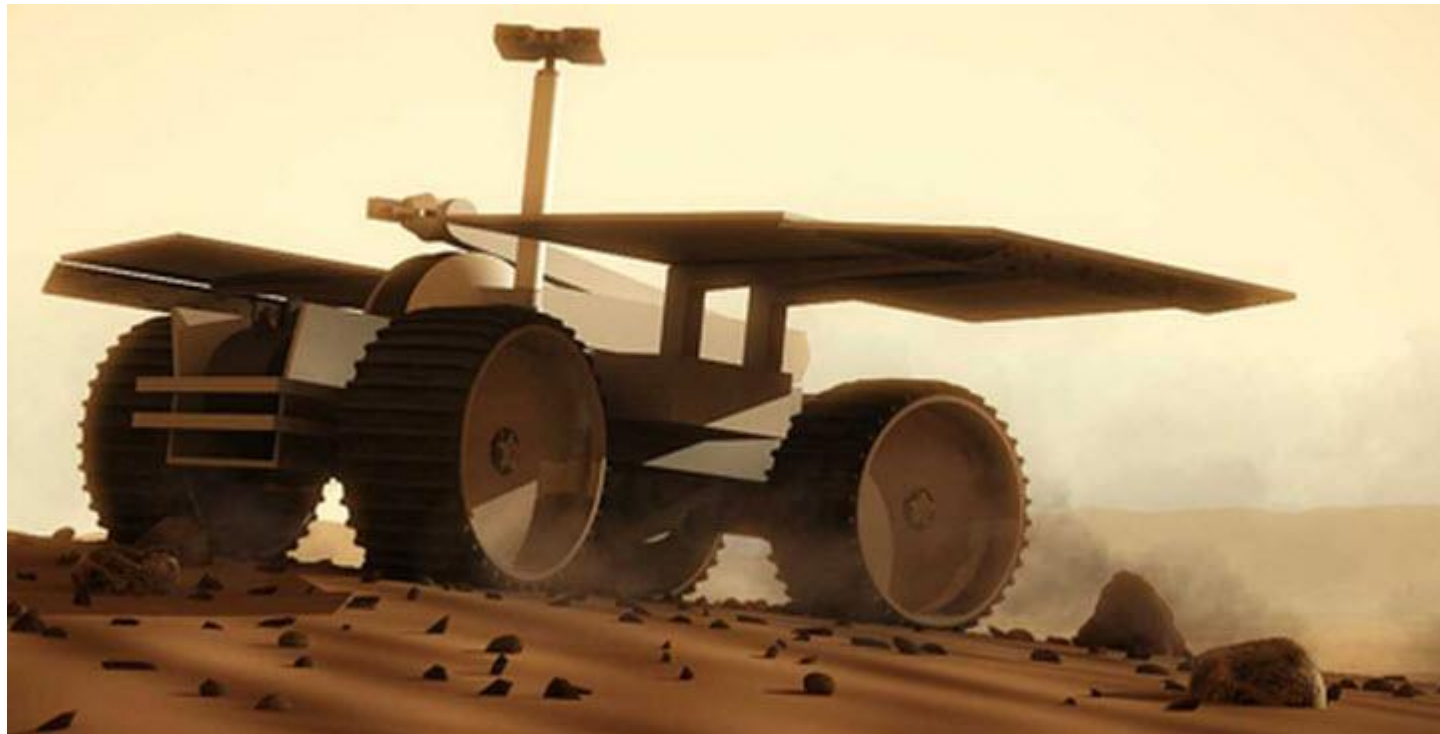

- Mars One founding in 2011
- Bas and Arno developed a strategic plan for placing the first humans on Mars
- Founded international team

# The purpose of humanity

---

In 2018 a rover will land on Mars. While the general location of the outpost will be known, the rover's task is to find the best spot in that area. You will be able to join it on its mission thanks to the live video being streamed back to Earth.

# Preliminary dates

---

- Mars One has developed a realistic plan to establish a permanent settlement on Mars.
- 2018 mission will be the first in preparation for human landing.
- The first Mars One crew is scheduled to land in 2025

# Mars One research

---

After launch and landing on Mars and placing the satellite in orbit, the mission will prove numerous other technologies which will be important for our 2025 human mission.
