

ASPECTS OF INTERNAL CORPORATE INFORMATION SECURITY POLICIES

**PERFORMED: POTEKINA EKATERINA
GR.18IE1MZ**

PENZA, 2019

Plan

1 The description of information security

2 The problem of studying internal threats to information security

3 The solution of these problems

1 The description of information security

The global penetration of information technology into our lives, the gradual transition to electronic ways of doing business set new information security challenges for market participants.

2 The problem of studying internal threats to information security

Company management should pay particular attention to

own business
coped and
procedures

organizational
culture

technical
environment

3 The solution of these problems

Set the table of values in the company

Organize periodic training for all employees to improve their skills

Determine password requirements and account management policies in corporate systems

Logging, monitoring and auditing real-time employee actions

Use additional warning measures for system administrators and privileged users.
