Pocket money

How can teens get pocket money from their parents???

You should understand that there are two types of pocket money parents can give to teens:

- The first type of pocket money is given to you for free
- The second type of pocket money is the type you have to work for

Getting Easy Pocket Money For Teens

If you don't get any pocket money from your parents, but you would like to have, then ask your parents

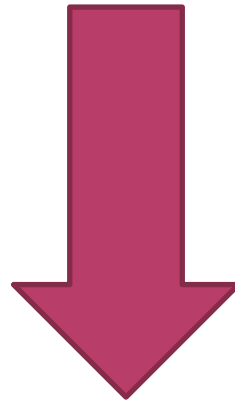

How To Get Money From Your Parents

First, think about how much money you would like to have each week.

So this number must be realistic, and what your parents can afford

How To Get Money From Your Parents

Now that you have a figure in mind, double it! So if you want 100 roubles a week, double it to 200 roubles a week. And..

How To Get Money From Your Parents

your **parents** probably won't agree to this,
and then offer you a lower figure

How To Get Money From Your Parents

One tip when using this tactic is not to ask too much money

If you ask for too much, you might end up getting nothing.

Catch Your Parents In A Good Mood

People in a good mood are far more likely to agree with you than if they are busy or in a bad mood.

**So make them happy before
you ask!;)**

Making Even More Pocket Money For Teens

If you start getting pocket money from
your parents,
don't be stupid by spending it on things that
make them stop giving you money

How To Get Money From Your Parents

You should study well, help your parents at home and do extra work if you want to get more money

In other words, the more useful you can be to your parents (*by helping them out*) the more money you will get.

Make Money With Pocket Money

Pocket money is the best way to make easy money for teens.

And if you're really smart, you will use that money to make more money!
