# General description of the project

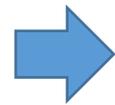

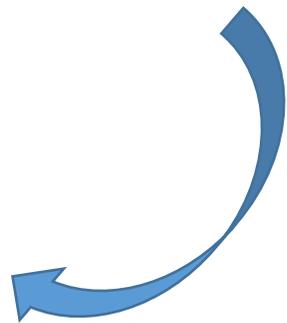

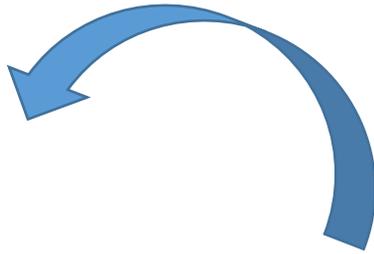

Источник: Tech Pro Research

**Goal:** Development of client-server application which is intended for health care.

**Objectives:** Create a MVP of project as client-server application on Django and IOS platform.

**The societal vision:** Creation of a application that will help in monitoring of well-being a person and give a predict value about personal data.

**Solved problems:** Storage, access and visualization of medical data, and analysis and design of expert recommendation systems for decision making using machine learning algorithms and time series analysis.

# HealthAgent

## Human resource:

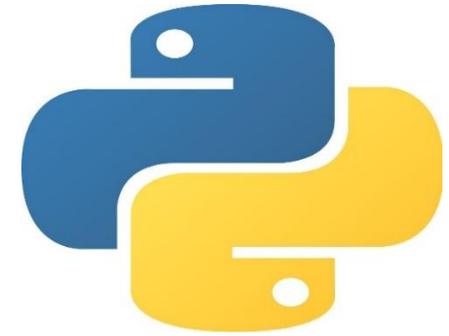

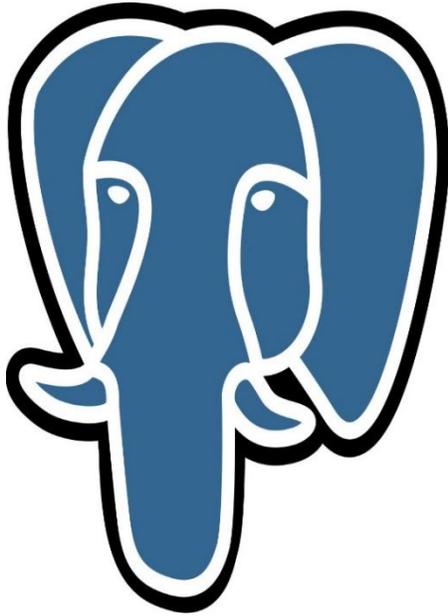

### -Team member:

Kazhenbayeva Gulnaz (IOS-developer)  
Alimbayeva Zarina (back-end developer)

### -mentors:

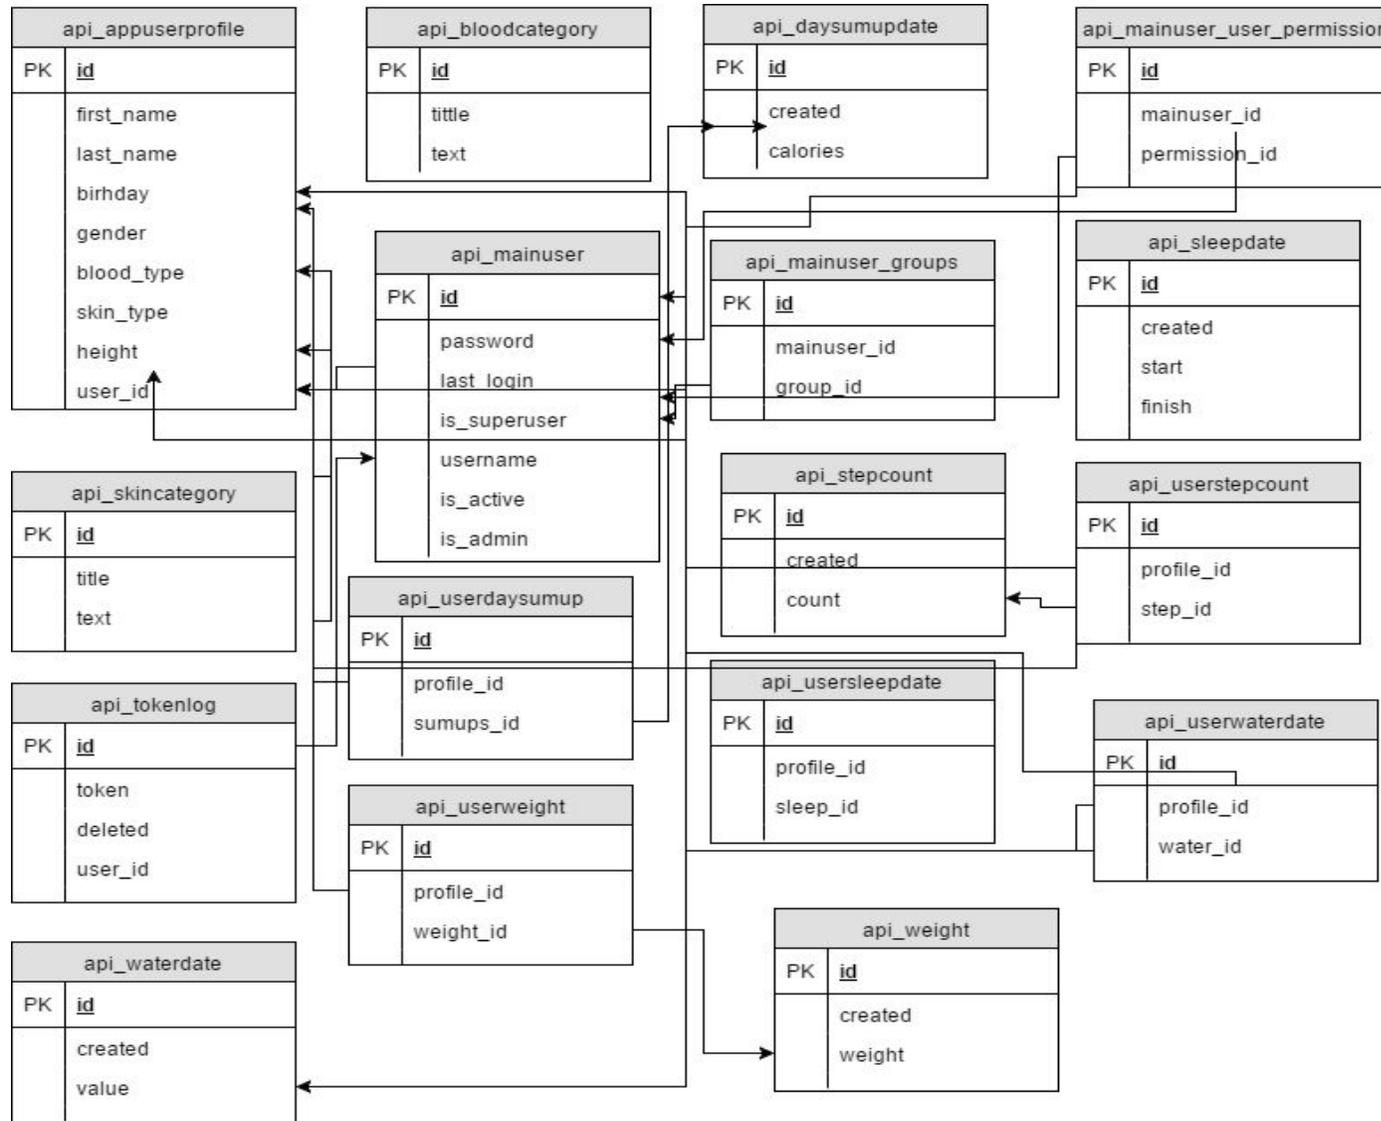

KBTU teachers

# Used technologies

**django**

# Implementation of web-API

# Economic estimations

|                            |                 |
|----------------------------|-----------------|
| <b>Profitability Index</b> | <b>1.43</b>     |
| Revenue                    | 8 136 000 (KZT) |
| Payback Period             | 0.7             |
| Profit                     | 2 443 640 (KZT) |
| Cost                       | 5 692 360 (KZT) |

# Success criteria

- ✓ Profitability Index = 43%
- ✓ In market has no competitors
- ✓ Has a big opportunities for changing health care sphere
- ✓ Originality and relevance in today
- ✓ Users get a motivation lead a healthy lifestyle

**Thank you for a  
attention!!!**
