The map of Great Britain

There are four countries in United Kingdom of Great Britain: England, Scotland, Wales and Northern Ireland. These countries are colored in different colors. The capital of England is London, the capital of Scotland is Edinburgh, the capital of Wales is Cardiff and the capital of Northern Ireland is Belfast.

Flora and Fauna of the British Isles.

The warm and wet climate of Great Britain is very good for plants. That is why the country looks like a beautiful garden. Centuries ago there were a lot of forests on the British Isles but now you can find big forests only in a few parts of the country- the North of Scotland and the South-west of England. The most common trees in England are oaks, elms, and beeches while Scotland has a lot of pines, firs, and birches.

The fauna or animal life on the British Isles is like in the north-west of Europe. Many larger animals such as bears and wolves don't live on the British Isles anymore but there are a lot of smaller animals: foxes, rabbits, hares and hedgehogs.

Deer live in the forests of Scotland and England too. There are also different kinds of fish, snakes, lizards, frogs, butterflies and dragonflies.

More than two hundred species of birds live on the British Isles and about two hundred kinds are visitors of the place. Many of them are song birds in spring the land rings with their singing.

There are also plant symbols of the country: the red rose is the national emblem of England, the thistle is the national emblem of Scotland, the yellow daffodil and the leek are emblems of Wales and shamrock is the emblem of Ireland.
