DECENTRALIZED

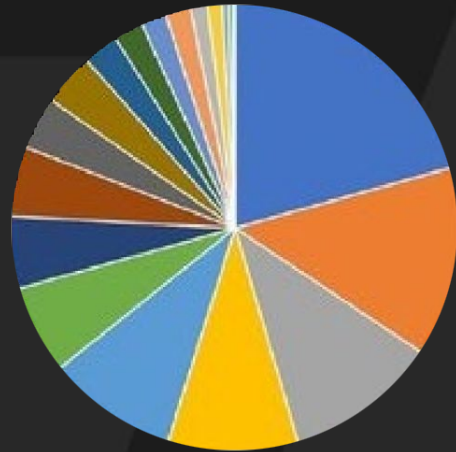

≠

CENTRALIZED

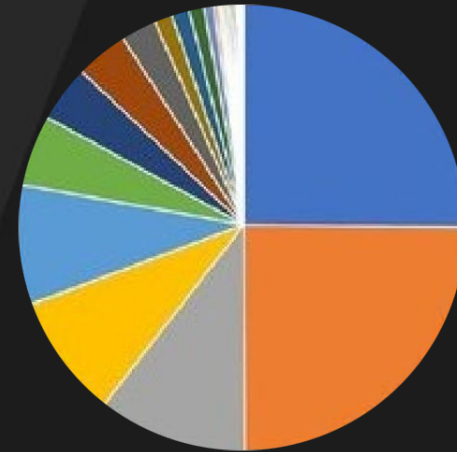

BITSHARES (DPOS)

BITCOIN (POW)

ETHEREUM (POW)

If you want something to get done, do it yourself.

2 WAYS of building the system:

- own blockchain with own consensus, or Graphene implementation (time and finance consuming, many risks and uncertainties)
- BTS fork (lack of liquidity)
- *WORKING TOGETHER within one BTS ecosystem (we have both useful instruments for the community, as well as proposals for committee)*

Problems with BTS ecosystem

- Low liquidity
- Sophisticated GUI
- Lack of tools for technical analysis
- Not very precise documentation
- Small community
- Lack of applications
- Lack of marketing
