

Paper vs Plastic

THE FINAL DECISION

*Paper bags vs. plastic bags:
which is really better?*

We always ask a question when it comes time to decide what to take with you to the store: paper or plastic bag?

On the one hand it's a simple choice, but let's think about these two different things. Each has its advantages and disadvantages. Let's look at what they differ.

Two brown paper bags are shown against a white background. The bag on the left is larger and stands upright. The bag on the right is smaller and also stands upright. The text is overlaid on the bags.

Paper bags

Paper comes from trees. It takes about three tons of wood to get one ton of paper pulp.

Advantages

Paper bags take less time to decompose.

But paper bags for us, in Russia, are not particularly common, such as in the United States. So that we cherish our forests.

Disadvantages

On the other hand, the paper bags have a number of drawbacks. The main disadvantage of the paper due to the fact that it is afraid of water. Using lamination helps a little.

Another and very significant drawback - the high cost of raw materials and ways to improve it. If you take it to a recycling center it means more energy and chemicals are used.

According to the magazine “National Geographic”, in the manufacturing of paper bags more energy, more water than in the production of plastic bags are used.

According to Howstuffworks.com, papermaking pollutes air 70% more than the production of plastic bags.

Plastic bags

Plastic comes from oil. Everyone of us uses plastic bags in our everyday life.

Advantages

Advantages of plastic bags are undeniable. They are cheap to produce, well tolerate humidity, strong and durable.

Another advantage of the polyethylene to paper - the possibility of long-term use. Plastic bag, which served as a time, can be used for a long time.

Disadvantages

Plastic is a very useful material, which is very important in modern life, but the problem is that it can lie on the ground or swim in the water for decades.

In fact, in the UK, for example,
they recycle only 1
in 200 plastic bags.

Besides , plastic bags cause over 100,000 sea turtles and other marine animals to die every year, when animals mistake them for food.

Who is the winner then?

The best way to carry your shopping and protect the environment at the same time is to choose a reusable fabric bag.

Reusable Bio bag.

Some steps have been already made

Conclusions.

- Both plastic and paper bags are harmful for our environment.
- Paper bags are even more unhealthy than plastic ones.
- Its preferable to use fabric bags or the so-called Bio bags.
