

My future profession

Author: Kulagin Nikita

Group: ZIT-3911

My future profession is a CEO of a big electronic manufacturing company.

—

Electronics is
the key to
success in the
21st century

- The first industrial revolution was agrarian,
 - The second was steam power,
 - The third - electricity.
 - And now it is the combination of electric powered machinery with the information technology.
-

As of today, the sector of electronics consists of many spheres of development at once. This includes

- engineering,
 - manufacturing,
 - production management,
 - software
 - and data science.
-

I am eager to develop new devices.
Nowadays promising advancements seem to be

- 3D printing,
 - robotics,
 - internet of things,
 - neural network and AI based machinery and devices,
 - multifunctional handheld devices and global interaction controllers,
 - human wellbeing environment,
 - space engineering,
 - body augmentations,
 - augmented and virtual reality.
-

Besides in my company will do make any kind of accessories:

- tables
- chairs
- keyboards
- mouses
- and etc

Under my control we will produce product for all people be it the players in games or ordinary worker.
