

RUSSIAN EDUCATION

- Why not spend a year in Russia and experience life in a Russian secondary school?

SUBJECTS

- In Russia there is a complete education system, which includes all subjects for admission to educational institutions and which may be useful in life. These are such subjects as mathematics, Russian language, literature, music, art, biology, geography, chemistry, history, physical education, physics, foreign languages (English and German), social studies, computer science and technology.

A TYPICAL DAY AT SCHOOL

- I usually get up at 7:10 a.m., brush my teeth, wash my face, get dressed and eat breakfast. After I packed the bag with homework, I go out into the street. School starts at 8:30 and ends at 2 - 3 p.m. Conducted about 6-7 lessons per day for 45 minutes each. The school day leaves at 14:45. Then, finally, I go home. I come home at different times, depending on what I have after school. Teachers give us homework. Therefore, I am doing my homework, which needs to be done at home. This is my daily school routine.

SPORTS & EXTRA-CURRICULAR ACTIVITIES

So, Russian schools are among the best schools in the world. As the girls said earlier, our schools teach all the subjects we need for life. In my opinion, the best teachers work here. With their help, we get the necessary knowledge and information. Although in addition to studying, various events and competitions are held in Russian schools. Also, sports competitions are held, in which children actively participate and take the first places. Thanks to multi-valued awards and active activities, Russian schools are among the best schools in the world.
