

Климат США.
The climate of
the USA.

Semenova Varvara
8 «V»

- The U.S. territory is so large and diverse that it can be seen in a variety of climate zones. The main factor determining the climate in the USA, is the atmospheric jet for transporting air masses and moisture from the North Pacific ocean to the continent.

Colorado

To the West, in the States of Texas, Kansas, Nebraska, South Dakota, North Dakota, New Mexico, Colorado, Wyoming, Montana, Arizona, Utah, Idaho, Washington and Oregon area is semi-arid (arid) climate. It is characterized by dry summers and relatively wet winters.

Nevada desert. Пустыни Невады

In Nevada, Utah, Arizona and California are US desert with an arid climate. Precipitation is hardly known here, summer temperatures can exceed 45°C, winter night to fall to 0°C.

Florida. Флорида.

For the southern coast of Florida has a tropical wet (monsoon) climate. Warm all year round, the summers are hot and humid, and winters are short, warm and dry.

Нaвaиi.
Гaвaйи.

Tropical climate
and Hawaii. There
is no dry season,
hot and humid all
year round.

Alaska. Аляска.

In Alaska, the northernmost state in the United States, the climate varies from Maritime on the coast of the Pacific ocean to subarctic and Arctic in the North of the Peninsula.

The END.
