News

World stocks break 500 barrier, oil camps at two-and-a-half year high

The global rally in stocks showed no sign of slowing on Tuesday, as upbeat investors pushed the most widely-tracked index of world stocks up for a ninth straight day and sailing past the 500 point barrier. The latest leg of the run came as Japan's Nikkei hit its best level since 1992 [.T], Germany's DAX scored a record high and the rest of Europe gained (.STOXX) as a 2-1/2 year high in oil prices lifted resources stocks again. "You've had almost a perfect backdrop for equities," said Pictet Asset Management's global strategist Luca Paolini.

Yahoo Finance 16 minutes ago

Hate Russia for messing with our elections, but love their cheap stocks

Russia is the cheapest emerging market, and the Russian discount seems unjustified, writes Michael Brush.

Yahoo Finance 21 minutes ago

European shares shrug off disappointing earning updates

European shares rose on Tuesday buoyed by exuberant global markets with sluggishness in the euro boosting the export-oriented DAX (.GDAXI) index to a new record high. The DAX, Germany's country benchmark index, was up 0.3 percent. Enrico Vaccari, fund manager at Consultinvest, said he was upbeat on prospects for European equities because of a strong economic recovery, a favourable monetary policy outlook and a weaker euro.

Widget

Currency converter

Preview mode:

There will be 2 text input fields with select box with an option to select currency from which and to which to convert. There will be no button to trigger a conversion, but it will happen as input parameters are changed. This widget can be styled to our specific needs, since it's a custom functionality programed in the system, and not embedded widget from some other website. Money.js library will be used to handle conversion and data from https://openexchangerates.org API will be used. Here are pricing options: https://openexchangerates.org/signup. Since free plan is not suitable for our needs because it supports only one base currency, and we want to enable user to change base currency to any of supported ones, we need a paid plan. Initially it can be "The developer plan" and we can upgrade as their user base grows.

Widget

Calendar

Preview mode:

Calendar with days where user defined an event. If some of the dates is highlighted, hover over it will display a tool top with list of events on that date. User can navigate trough calendar by going one month back and forward.

Full mode:

List of the latest events will be displayed. Above the list search options will be displayed:

- Time: Today's events, Events for this week, Events for this month - displayed as mutually exclusive filters
- Priority: Important events. (which user has marked as important) - checkbox
- Filter events by category (Family events, Business events, Entertainment events etc. - filtering by elements) - select box where one or many categories can be selected; when category is selected widget types and widget select are reset and only event of selected category/categories are displayed on widget types and widget selects
- Filter events by widget types - select box with widget type names, selecting a widget type resets a widget select and populates it only with widgets of selected type/types
- Filter events from specific widget - select box with a widget name/dashboard name
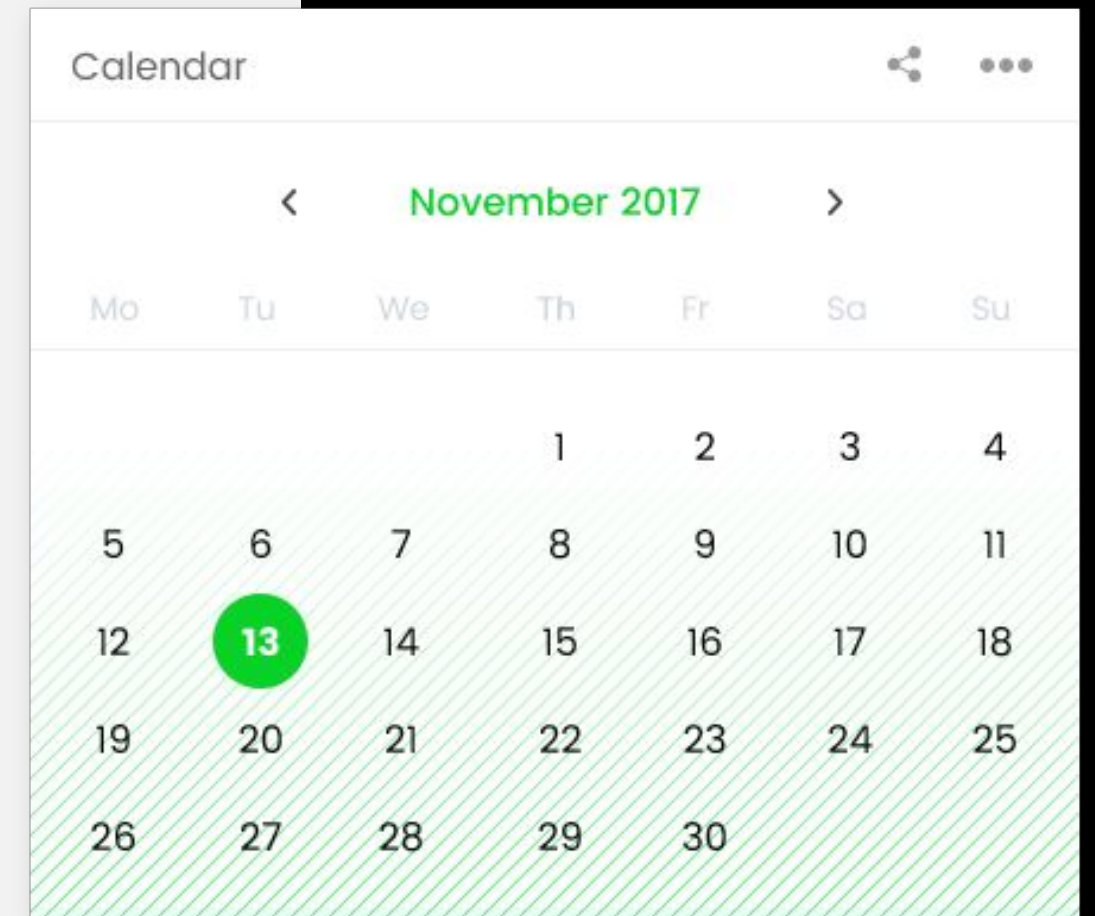

Widget

Social media bookmarks

Preview mode:

Bookmarks to all configured social networks.

Edit mode:

There will be a list of text input fields next to a social network logo. Depending on a social network, user will input their ID or username/email so system can generate URL specific for their needs. If nothing is specified in a text input field, home page of the social network is linked. Also there is a checkbox next to each social network, which indicates if it's going to be displayed at all on the widget. At later phase, this widget type can be updated to actually connect user with a social networks via API, and maybe display number of notification next to icon in the widget, or use some integration.

Coldplay everglow

Coldplay - Everglow

Well, they say people come
The say people go
This particular diamond was extra special
And though you might be gone, and the world may not know
Still I see you, celestial

And I should but I can't let you go
But when I'm cold, I'm cold
Yeah, when I'm cold
Cold
There's a light that you give me when I'm in shadow
There's a feeling within me, an everglow

Like brothers in blood, or sisters who ride
Yeah we swore on that night we'd be friends 'til we die
But the changing of winds, and the way waters flow
Life is short as the falling of snow
And I'm gonna miss you, I know

But when I'm cold, cold
In water rolled, salt
And I know that you're with me and the way you will show
And you're with me wherever I go
And you give me this feeling, this everglow

What I wouldn't give for just a moment to hold
Because, I live for this feeling, this everglow

So if you love someone, you should let them know
Oh, the light that you left me will everglow

Healthy Meal Plan

A healthy eating plan gives your body the nutrients it needs every day while staying within your daily calorie goal for weight loss. A healthy eating plan also will lower your risk for heart disease and other health conditions.

Day One

Breakfast • 1/2 cup oatmeal (dry amount) made with water 1/2 cup strawberries, 6 egg whites cooked with 1 yolk

Snack • Protein shake made w/ 40 g whey protein mixed with one green apple

Lunch • Tuna sandwich made with 6-oz. can tuna in spring water, 2 slices whole-wheat bread, 2 leaves romaine lettuce

Snack • Protein shake made w/ 40 g whey protein mixed with one green apple

Dinner • Chicken salad made with 8 oz. chicken breast, 2 ml. Italian dressing, 1/2 medium tomato, 2 leaves romaine lettuce, 1/2 cup broccoli
