Roma,

This article is about the 1986 nuclear plant accident in Ukraine. For other uses, see [Chernobyl \(disambiguation\)](#).

The **Chernobyl disaster**, also referred to as the **Chernobyl accident**, was a [catastrophic](#), was a catastrophic [nuclear accident](#). It occurred on 26 April 1986

Operator error

Взрывы привели к полному разрушению реактора и его активной зоны, систем охлаждения, а также здания реакторного зала.

На крышу машинного зала, на территорию вокруг АЭС были выброшены железобетонные и металлоконструкции, графитовые блоки и их куски.

The explosions led to the complete destruction of the reactor and its active zone, cooling systems, and building the reactor hall.

On the roof of the turbine hall, to the territory around the plant was thrown out of reinforced concrete and steel structures, graphite blocks and pieces of them.

Mutations after Chernobyl

After disaster, the animals living in the area had mutated into monsters.
