

**Stockholm
County
Council**

**Green Bond Investor
Presentation**

Disclaimer

This presentation may not be distributed in the United States or to U.S. persons as defined in Regulation S of the U.S. Securities Act 1933, as amended.

The information contained in this Presentation has been prepared exclusively for the benefit and internal use of prospective investors in order for them to evaluate the feasibility of a potential financing for Stockholm County Council ("SCC") and for no other purpose. This Presentation may not be used for any other purposes without the prior written consent of SCC. This Presentation is incomplete without reference to, and should be viewed solely in conjunction with, the oral briefing provided by SCC and other documentation and material made available in connection with a potential financing. The information does not purport to be all-inclusive or to contain all information that a prospective investor may desire. It is understood that each recipient of this Presentation will perform its own independent investigation and analysis of the proposed financing and the creditworthiness of SCC, based on such information as it deems relevant. The information contained herein is not a substitute for the recipient's independent investigation and analysis. Recipients of this Presentation and the information contained herein must check and observe all applicable legal requirements and, for the avoidance of doubt, receipt of this Presentation and the information contained herein may not be taken as discharging the regulatory or statutory responsibilities under applicable legislation of any such recipient.

The distribution of this Presentation and a potential financing for SCC may in certain jurisdictions be restricted by law. Any persons reading this Presentation should inform themselves of and observe any such restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of any such jurisdiction. SCC shall not have any responsibility for any such violations. This Presentation does not constitute an offer to sell or issue, or the solicitation of an offer to buy or subscribe, any securities in any jurisdiction.

This Presentation includes information which is or may constitute forward-looking statements. By their nature, forward-looking statements involve risks and uncertainties and SCC cautions the recipients of this Presentation that forward-looking information and statements are not guarantees of future performance and that its actual results, performance or achievements may differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Any such forward-looking statements and this Presentation are based on current expectations, estimates and projections about [global economic conditions and of the economic conditions of SCC. These expectations, estimates and projections are generally identifiable by statements containing words such as "expects", "believes", "estimates", "targets", "intends", "anticipates" or similar expressions or the negatives thereof. Important factors that could cause actual results to differ materially from those expectations include, among others, [macroeconomic fluctuations, changes in tax levels and tax basis, inflation rate, interest rates], and such other factors as may be discussed from time to time in the Presentation. Although it is believed that such expectations and the Presentation are based upon reasonable assumptions, no assurance can be given that those expectations will be achieved or that the actual results will be as set out in this Presentation. SCC is not making any representation or warranty, expressed or implied, as to the accuracy, reliability or completeness of the Presentation, and neither SCC nor any of its respective directors, officers or employees will have any liability to any recipient of this Presentation or any other persons resulting from such recipient's or other person's use.

Potential investors should not construe the contents of this Presentation as legal, accounting or tax advice. This Presentation has been prepared for information purposes only and should not be conceived as investment advice. In making an investment decision investors must rely on their own examination of SCC including the merits and risks involved. Each prospective investor should consult with its own advisors as to the legal, accounting, tax, business, financial and related aspects of a potential financing for SCC.

Any views contained in this Presentation are based on financial, economic and other conditions prevailing at the date hereof and SCC shall be under no obligation to update this Presentation in the light of changes to such conditions or otherwise.

Key Credit Highlights

Critical part of Swedish economy

- Stockholm County Council ("SCC") incorporates 26 municipalities at the heart of the Kingdom of Sweden's (Aaa/AAA/AAA) capital Stockholm
 - Responsible for over 30% of Swedish Gross Regional Product
 - Home to 23% of Swedish population
- SCC is rated AA+ (stable) by Standard & Poor's

Strong institutional framework

- Predictable and stable regional government policies
- Fiscal policy framework that promotes budgetary discipline

Solid financial position

- Conservative financial policy
- Ability to levy taxes through the income tax rate
- Zero per cent risk weighted by Bank for International Settlements (BIS)

Environmental

- Systematic and goal oriented sustainability work as an integrated part of the SCC tasks.
- The first environmental program was adapted in 1990.

Favourable macro-economic environment

- High employment rate (71,3% Q 3 2015) and strong population growth
- Average Gross Regional Product (GRP) growth of 2,9% between 2001-2013

SCC Responsibilities and Structure

Sweden

- In Sweden, public sector consists of a three-tier system:
 1. Central Government
 - Higher education
 - Police and military
 - National roads
 2. County Councils
 - Healthcare
 - Public transport
 - Regional planning
 - Culture
 3. Municipalities
 - Childcare
 - Compulsory education
 - Upper secondary education
 - Elderly care

Stockholm County Council

- SCC is a legally independent entity
- It is a democratically controlled organisation and has:
 - Its own legislatures, *and*;
 - Its own taxation rights
- It is the largest of Sweden's 20 county councils
 - Includes 26 municipalities
 - Has 2.2 million inhabitants

Strong Institutional Framework

A local government cannot be declared bankrupt in Sweden:

- **The Swedish Court has stated that the local governments in Sweden are NOT covered by the Bankruptcy Act (RH 1996:75) meaning bankruptcy in accordance to the Swedish Bankruptcy Act is not applicable for local governments**
- **This is due to the fact that local governments have constitutional rights to levy taxes and this is also supported by the Swedish Constitution**

Requirement for sound financial management

Local governments must work according to a sound financial management

Law:
"Kommunallagen chapter 8, §1-2 (1991:900)"

Balanced budget requirement

Annual local government budgets should be in balance, imbalances are normally restored within 3 years

Law:
"Kommunallagen chapter 8, §4-5 (1991:900)"

Local government financing principle

If the government alters the tasks of local governments, the government must also neutralise their financial effect

Approved by the parliament and in force since 1993

Financial equalisation

Imbalances between local governments are equalised annually through income and cost equalisation schemes

Law:
"Lagen (2004:773) om kommunalekonomisk utjämning"

Financial prerequisites

2015 January-November in brief

- **The surplus** for the period is SEK 2,016 million.
- **The forecast surplus** for 2015 remains SEK 150 million, compared with the annual budget of SEK 53 million.
- **Operating expenses** for the period increased by 3.3 per cent compared with the same period last year.
- **Investments** for the period total SEK 12,426 million, which is equivalent to a degree of completion of 82 per cent compared with budget.
- **The investment forecast** is SEK 14,618 million compared with a budget of SEK 15,225 million.

2014 revenue

- In 2014, revenues amounted to SEK 82.5 billion
- County council tax was SEK 12.10 per taxable 100 kronor

2014 costs

- In 2014, costs were SEK 82.3 billion

Source: SCC, 2014 financial results and financial results per 2015-11-30

SCC total Investment Plans

Selected major investments

- The plan for future health and medical care
 - **New University Hospital** – A new world class university hospital
 - **Södertälje Hospital**
- **Expanded metro** – 20 kilometres of new track and nine new stations
- **The Red Metro Line** – New signal system and new metro cars

Debt type breakdown

Funding Plans for 2016

2016 Funding Plans

- Budget 2016 including financing plans were approved in June 2015 by the County Council Assembly
- Estimated funding need 2016 is SEK 10 billion (including refinancing)

2016 Funding activities

- Benchmark EUR500mn or sub-benchmark with possibility to tap in green format
- 1-2bn SEK, public issue
- Opportunistic Private Placement
- Bilateral from EIB/NIB

Cash flows will be closely linked to the pace of investments and are assessed on an ongoing basis. Investors are encouraged to contact SCC directly for the latest information

Source: Budget 2016

Strong and Stable Rating

- Rated by S&P since September 1999
- AA+ stable maintained since November 2007
- AA+ with stable outlook since November 2007
- *"The ratings reflect our view of Stockholm County Council's very strong economy and very low contingent liabilities, and Sweden's extremely predictable and supportive institutional framework. The ratings are further supported by our assessments of the county council's strong financial management, budgetary flexibility, and liquidity." (S&P October 16 2015)*

Overarching vision

The County Council's environmental work is groundbreaking, stimulates environmental technology development and inspires other actors

The County Council's activities are climate-efficient, resource-efficient and health-promoting

Environmental work is a fundamental part of the County Council's work for sustainable societal development and for good health

Environmental Challenge – three target areas – 16 interim targets

Climate-Efficient

Improving the efficiency of energy use

Improving the energy efficiency of transport

Increasing the share of renewable energy

Reducing emissions of medical gases that have a climate impact

Increasing the share of foodstuffs with a low climate impact

Regional planning for a lower climate impact per inhabitant

Resource-Efficient

Adopting an eco-cycle approach in the use of goods and services

Streamlining care chains

Planning construction that is adapted to the eco-cycle and low on resource use

Reducing the quantities of waste and improving waste management

Promoting resource-efficiency and accessibility in urban development structure

Health-Promoting Environmental Work

Reducing the environmental and health risks of chemical products and goods

Reducing the environmental risks of medicines

Reducing emissions of air pollutants and noise

Increasing the quantity of organic foodstuffs

Promoting a healthy living environment

Climate Strategy

Improving the efficiency of energy use

Improving the energy efficiency of transport

Increasing the share of renewable energy

Reducing emissions of medical gases that have a climate impact

Increasing the share of food-stuffs with a low climate impact

Regional planning for a lower climate impact per inhabitant

The target area Climate-Efficient is the County Council's climate strategy

Overarching climate strategy

- In 2020, the County Council's total greenhouse gas emissions shall be at least 75 % lower compared with the year 1990
- In 2016, the County Council's total greenhouse gas emissions shall be at least 30 % lower compared with the year 2011

Climate Strategy

OVERARCHING CLIMATE GOAL

In 2016, the County Council's total greenhouse gas emissions shall be at least 30 % lower compared with the year 2011.

Result 2014: 35%

SCC climate figures 2014		
	Carbon dioxide equivalents, ton	2011
Properties	19 546	25 742
Public transport	84 408	140 547
Other transports and vehicles	10 797	10 242
Patient meals	6 720	6 720
Medical gases	4 523	9 545
Total	125 993 -35 % cf 2011	192 796

Climate Strategy

Improving the efficiency of energy use

Improving the energy efficiency of transport

Increasing the share of renewable energy

Reducing emissions of medical gases that have a climate impact

Increasing the share of food-stuffs with a low climate impact

Regional planning for a lower climate impact per inhabitant

Goals for renewable energy

- In 2016, the share of renewable fuels for transport in County Council-funded activities shall be at least 75 per cent
- In 2016, the share of renewable energy for heating, cooling and electricity in premises where County Council-funded activities are conducted shall be at least 95 per cent

Results for renewable energy

- Bus service. 89 percent renewable fuel in volume and 85 per cent of bus fleet is green
- All transports within the county council: 79 per cent renewable fuel
- Buildings: 95 per cent renewable energy (2013: 95 %)
- Locum is planing to build solar cells in at least 20 000 m2, which would make Locum largest in Sweden on solar electricity.

SCC works with sustainability in several areas

A few examples are:

- Hybrid buses
- Electrically powered vessels
- Solar cells

Resource Efficient

Adopting an eco-cycle approach in the use of goods and services

Streamlining care chains

Planning construction that is adapted to the eco-cycle and low on resource use

Reducing the quantities of waste and improving waste management

Promoting resource-efficiency and accessibility in urban development structure

Reduced resource use and closed eco-cycles with respect to goods and services.

Waste as a resource is highlighted.

Food waste is collected for biogas production.

SCC works with reducing climate footprints through sustainable procurements

Health care contributes to CO₂ emissions as can be seen from these examples of annual impact

Product	Consumption	Climate impact
Gloves	100 000 000	2 500 ton CO ₂ -eq
Protection apron	12 000 000	1 750 ton CO ₂ -eq
Garbage bags	4 000 000	800 ton CO ₂ -eq
....		

Solution renewable material

- For example SCC influences suppliers with use of procurement to produce sustainable innovative solutions

Social responsibility

- The County Council has ethical guidelines for healthcare,
- a code of conduct for suppliers, and regulating collaboration between healthcare and the pharmaceuticals industry.

Areas of priority:

- to combat discrimination and promote equality
- access for people with disabilities
- SER in supply chain

Future environmental program is under development. The new program will be valid for 2017-2021

Some examples of areas that may be considered in the future plan:

- Climate calculations
- Life cycle analysis of for example textiles
- Mobility
- Sustainable procurement

SCC collaborates with health care organizations regarding sustainability questions

HEALTH SYSTEMS AND HOSPITALS ARE INVITED TO JOIN GGHH AND THE 2020 CHALLENGE!

SCC's Green Bond Framework

The proceeds are earmarked to support Green projects as defined in SCC's Green Bond framework, comprising investments in:

Sustainable public transportation

Sustainable buildings

Waste management

Water management

- SCC provides transparency through annual investor letters published on our webpage
- SCC offer investors to participate in field studies on site
- To secure prudence the Green Bond framework received a second opinion from the

Roslagsbanan expansion programme

The Roslagsbanan expansion programme aims to develop and strengthen the capacity of a historical line that is of great importance for public transport in the north-western parts of Stockholm county. Creating the opportunity for passengers to travel on public transport by train is more convenient and enjoyable than travelling by bus, but demands significantly better bus driving conditions.

The overall goal of the programme is to:

- Increase the capacity of Roslagsbanan and allow a regular or minute service frequency for the majority of routes
- Reduce the number of buses in traffic
- Keep as much of the line as possible included in the infrastructure bill for new transportation of citizens
- Adapt stations and existing carriage for accessibility

The Roslagsbanan expansion programme covers a total of 140 km, with 100 km to be financed from the public transport fund provided by the Län's Council. Budget cuts have significantly reduced the number of routes per weekday, which means overall the best CO₂e per available passenger-kilometre travelled for car (DCK/SEA) average per day compared to Roslagsbanan is 40% lower, energy efficiency 17% people, instead 100% (1/30).

In addition to providing sustainable travel, the programme includes a large number of environmental objectives.

Some examples of environmental work in the programme:

SCC's Green Bond Framework

- To secure prudence the Green Bond framework received a second opinion from the independent research center CICERO

Extract from CICERO:s second opinion on SLL:s Green Bond Framework:

"SLL takes a broad view of climate change impact in its environmental policies, incorporating life-cycle analysis and suppliers"

"Management system certified to ISO 14001 to evaluate performance with respect to its environmental objectives"

- SCC Green Bond is fully compliant with Green Bond Principles

CICERO

What is Miljöbyggnad Gold?

- An environmental certification system for buildings
- A building can achieve the grade bronze, silver or gold
- SCC aims to certify new hospital buildings at the highest level ("Gold")

What is examined?

▪ Energy:

- Energy consumption
- Heat power
- Solar Heat Load
- Energy source

▪ Materials:

- Documentation of building materials
- Phase-out hazardous substances
- Decontamination of hazardous substances

▪ Indoor environment:

- Moisture safety
- Thermal climate winter
- Thermal climate summer
- Daylight
- Legionella
- Radon
- Ventilation Standard
- Nitrogen dioxide

Miljöbyggnad gold, Careful scrutiny of the documents to verify compliance

- Self-check of the application
- Formalities check by Sweden Green Building Council
- Third-party assurance
 - Third-party assurance
 - Objects if there is various information, such as different U-values of windows, airflow, energy use, LT-value, etc.
 - Checks that the calculations are correct
 - Makes sure that the annexes and supporting documents are linked to the building of interest

Miljöbyggnad Gold, important examples for healthcare buildings

- 65 % of legal demands on energy use
- 100 % renewable energy
- Safe and healthy indoor environment with daylight, good thermal comfort and no harmful emissions
- Documentation of all building materials
- No uses of harmful substances

SCC's Green Bond transaction 2014

- Issued a 6 year SEK 1.1 billion Green Bond on 12 May 2014
- Two projects have been included in the bond:
 - Roslagsbanan expansion programme (train)
 - Construction of Södertälje hospital, consistent

Gold

- Develop and strengthen the capacity
- 45 000 travelers per weekday
- Saves around 80 tons of CO2 per weekday

- Expanded and modernized hospital to be more efficient and flexible, according to Miljöbyggnad certification Gold
- Energy balance calculations
- Environmental audits

SCC's Green Bond projects 2016

Eligible projects 2016	Sector
New Karolinska Solna	Building
Södertälje Hospital	Building
Red Metro Line	Transportation

*These are main part of eligible projects for 2016. Use of proceeds are closely linked to pace of investments, therefore there may be change of projects. However, all projects are in accordance to SLL:s green bond framework.

Eligible projects 2016

New Karolinska Solna

- Climate neutral, 50% less energy consumption compared to standard hospital
- The mission is to be the world's leader in environmentally friendly applications to a world class university hospital
- The hospital will provide highly specialized healthcare and conduct basic research, patient-focused clinical research and education according to Miljöbyggnad certification Gold and LEED Gold
- In September 2015 the last construction phase was approved
- A provisional certificate can therefore be issued for the whole facility after an extensive third-party audit
- Part of the hospital open in 2016

Södertälje hospital

- At least 30% less energy consumption compared to Swedish standard (Boverket)
- Sweden Green Building Council's certification level Gold
- Södertälje Hospital is being expanded and modernized
- The project is intended to meet the estimated increased need of care capacity in the immediate area by 2020.

Climate Neutral Local Production

Eligible projects 2016

Red Metro Line

- An upgrade of the red metro line
- 25 percent higher capacity during rush hours
- New depot
- New subway trains
- New traffic control system and control center
