About me

Good morning, ladies and gentlemen.
Let me introduce myself: My name is
Yaroslav. I am Seventeen years old. I was
born in the city of Pavlodar. I will be
Eighteen next September, yes, I'm old)

I'm a lazy person, but I made this presentation somehow, communicative, friendly, I'm a couch potato genius, inventive, all the qualities are too long to list. I am from the city of Pavlodar, it is located in the Republic of Kazakhstan, where I lived for 16 years, then moved to 17 and here I am, in Novosibirsk. About Pavlodar I can say that there was an elephant and that's all)

Let's talk about my family

I'm from a small family of 4 people, I have a mother, a father and a younger brother. let me just clarify that I also have many more siblings, but they are they're not my family.

Now it is worth paying attention to my education

I finished school at the age of Fifteen in Pavlodar, then finished the 1st year at the Innovative Eurasian University, studied there as an architect, then moved and because of the late arrival got to the Novosibirsk College of electronics and computer technology and began to study there again from the 1st year. I did well in both school and College. But I'm not doing well in English

It's time to talk about my activities and Hobbies

I don't believe I have a hobby because I just do everything I'm interested in, drawing, doing various martial arts, loved studying biology, dancing (breakdancing). I'm good at computers, and maybe something else.

In the future I will continue to study to develop my skills with networking. In the future I will continue to study to develop my skills with networking. Thank you for listening to my presentation, I can send your questions to which I probably will not answer.
