Let's start with the first set of slides

*Quotations are commonly printed as a means of **inspiration** and to invoke philosophical thoughts from the reader.*

This is a
slide title

- Here you have a list of items
- And some text
- But remember not to **overload** your slides with content

You audience will listen to you or read the content, but won't do both.

Big concept

Bring the attention of your audience over a key concept using icons or illustrations

You can also
split your
content

White

Is the color of milk and fresh snow, the color produced by the combination of all the colors of the visible spectrum.

Black

Is the color of coal, ebony, and of outer space. It is the darkest color, the result of the absence of or complete absorption of light.

In two or
three
columns

Yellow

Is the color of gold, butter and ripe lemons. In the spectrum of visible light, yellow is found between green and orange.

Blue

Is the colour of the clear sky and the deep sea. It is located between violet and green on the optical spectrum.

Red

Is the color of blood, and because of this it has historically been associated with sacrifice, danger and courage.

A picture is
worth a
thousand
words

A **complex idea** can be conveyed with just a single still image, namely making it possible to absorb large amounts of data quickly.

Want big impact?

Use big image.

Use charts to
explain your
ideas

And tables to
compare
data

	A	B	C
<i>Yellow</i>	10	20	7
<i>Blue</i>	30	15	10
<i>Orange</i>	5	24	16
