Environmental Protection

Suppose you get out of your house on an early sunny April day and see...
"Oh, what is it?" It is a yellow dandelion. It looks at you from the ground and says
"Protect me, please."

Do you know how much Russian people like it? The poet Anna Akhmatova and writer Vladimir Soloukhin devoted their verse to it. Faberge, a famous Russian jeweller, made a sophisticated figure of a dandelion.

Our land is full of beautiful flowers, plants, and trees which grow and blossom in the meadows, on the banks of the rivers and lakes, in the forests and in our gardens.

Many flowers have become rare and vanish. Our useful insects: bees, bumblebees, butterflies, dragonflies, grasshoppers, can't live in the atmosphere of chemicals and pesticides. Excessive radiation and transport are harmful to people and animals.

But industry is developing sometimes without any care of the environment.

We know that a great number of people all over the world are taking part in the policy of controlling the atmosphere, the water, the climatic changes, because of man's interference in nature.

These problems become very pressing, the subject of many scientific meetings. Let everybody remember: we live only once and not a very long life. We have one earth for all those who love it and who do not.

***There are another new words.
Let's read them.***

Protect nature - ?

Reduce pollution – сокращать загрязнение

**Destroy wildlife – разрушать дикую
природу**

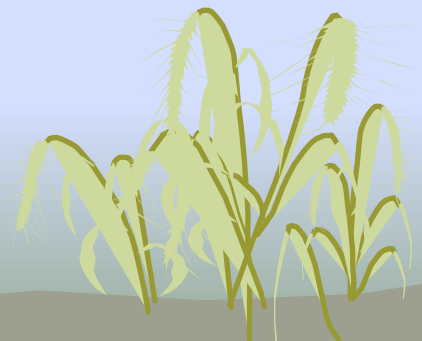

Damage nature – повреждать природу

Pollute nature - ?

Disturb wild animals – беспокоить ?
