# BBMA ZERO LOSS ZONE

- YOU MUST CHECK REENTRY IN DAILY AND WEEKLY ONLY NOT IN SMALLER TIME FRAME YOU HAVE 28 PAIRS SO EACH WEEK YOU GET MANY SIGNALS
- MY WAY OF SEEING REENTRY IS DIFFERENT CHECK RSI 3 IN DAILY OR WEEKLY IF RSI 3 IS ABOVE 80 LEVEL AND MA50 NEAR THEN IT IS SELL ZONE ONLY

# BBMA ZERO LOSS ZONE

- If rsi 3 is below 20 and m50 near then it is sell zone ma 50 should be near then it is more valid lets see next slide few example

- NOW MOST IMPORTANT SL AND TP AND MONEY MANAGEMENT AND RISK MANAGEMENT
- Your risk reward will be 1.2 not more than that not less than that 1.2 is the best risk reward with good accuracy of 90 percent if you follow all rules you win rate will be 90 percent do not place stoploss above candle high only amateur trader place stop loss above high and market maker will hunt sl easily first check your tp if your tp is 100 then your sl will be 50 pips you risk only 5 percent per trade if you win 10 trade its enough for month your account will grow 20 percent so risk low and get some money in your account if you want more money increase your equity money 1000 deposit 200 will be your month profit many traders think deposit 100 risk more and then make 200 dollar in 1 trade so only many traders loss within 2 weeks

# BBMA ZERO LOSS ZONE

- I will show my trades in future how to spot trades sl and tp hope I explained what I now in this presentation so pray for me and my health and family
- Thank you
