

Площади ФИГУР

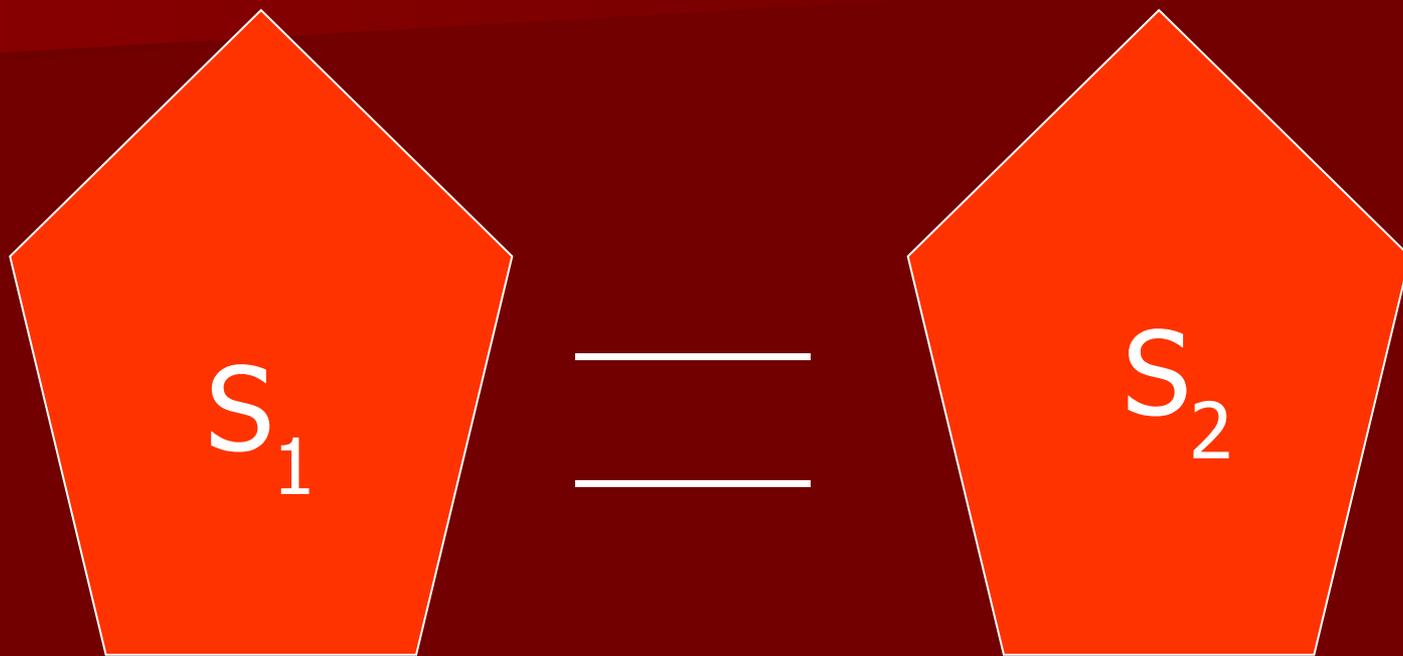

27.02.14

Тема урока :

**«Площадь
треугольника»**

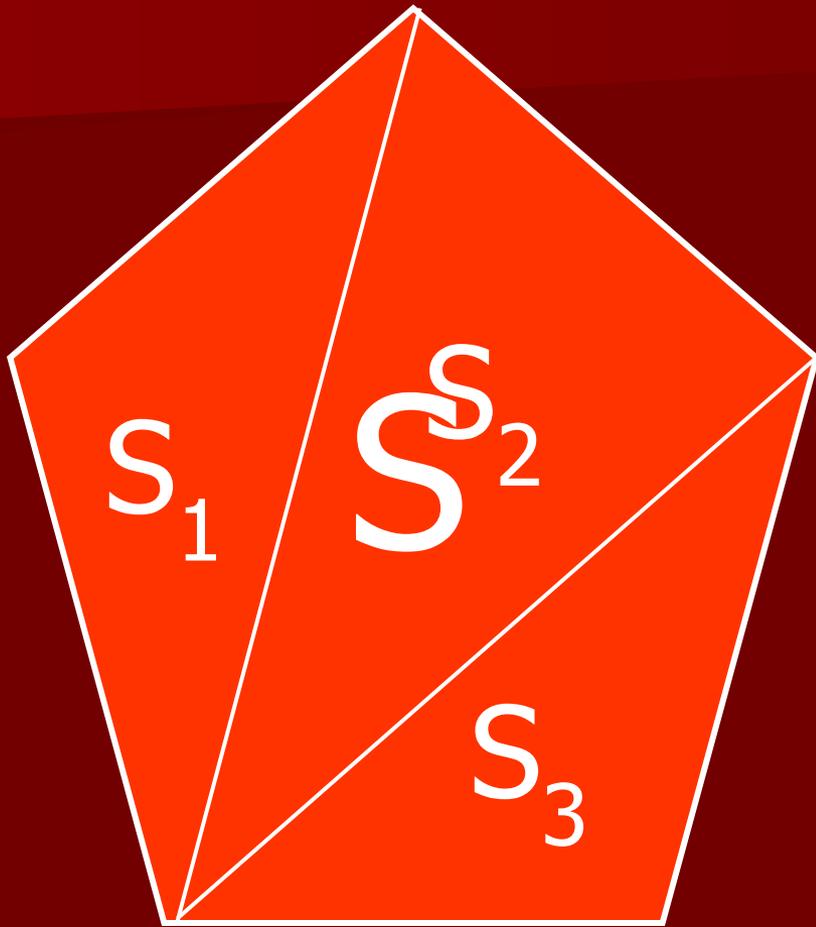

ПОВТОРИМІ!

Свойства площадей

$$S_1 = S_2$$

Свойства площадей

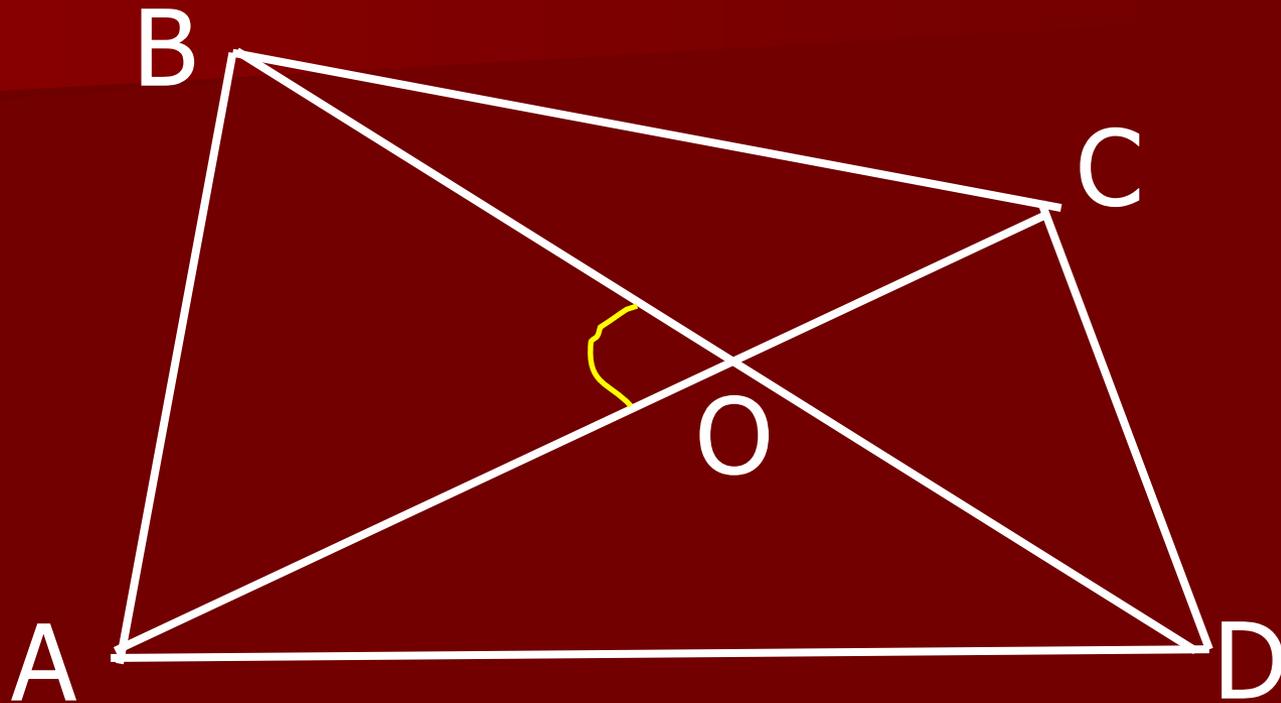

$$= S_1 + S_2 + S_3$$

Свойства площадей

$$S = 1 \text{ кв.ед.}$$

Площади четырехугольников

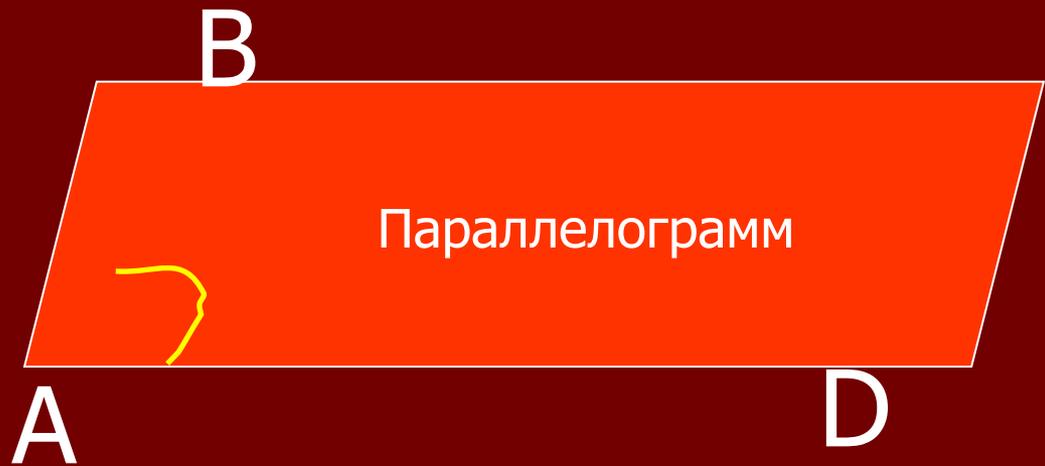

$$S = \frac{1}{2} AC \cdot BD \cdot \sin AOB$$

Площади четырехугольников

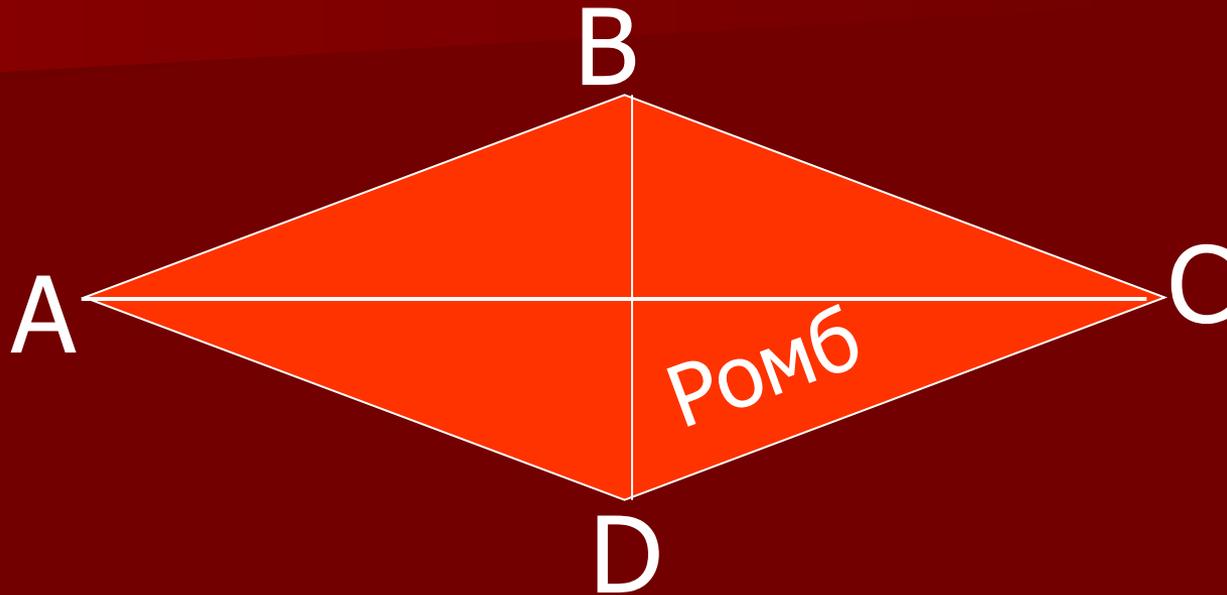

$$S = AD \cdot BH$$

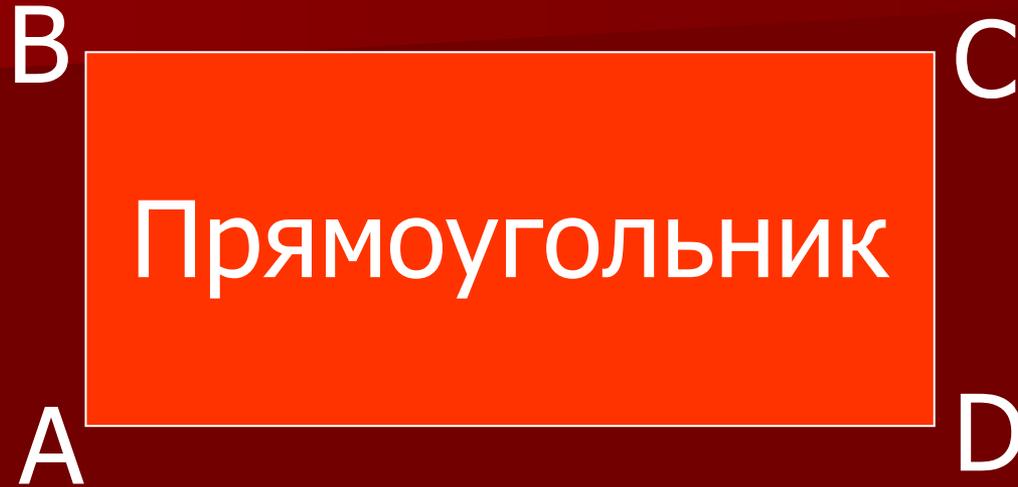

$$S = AB \cdot AD \cdot \sin A$$

Площади четырехугольников

$$S = \frac{1}{2} AC \cdot BD$$

Площади четырехугольников

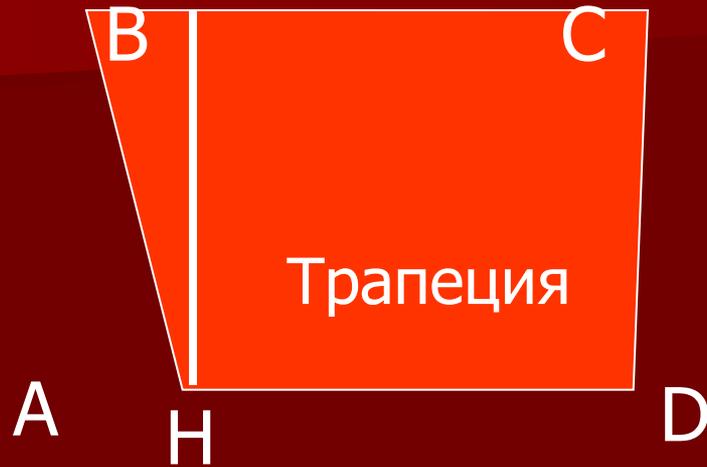

$$S = AB \cdot BC$$

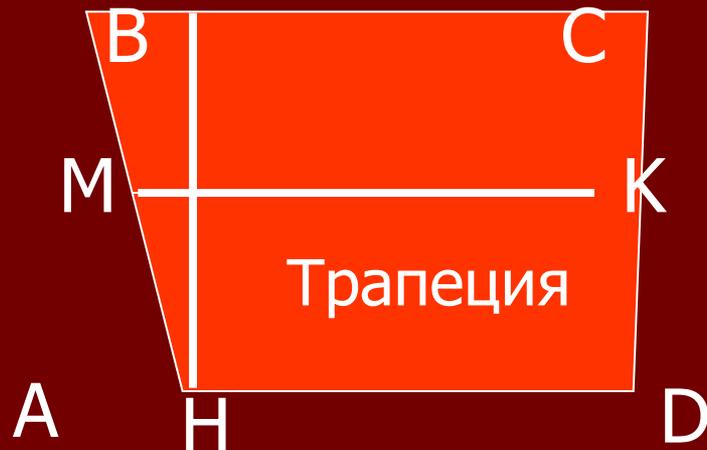

$$S = AB^2$$

Площади четырехугольников

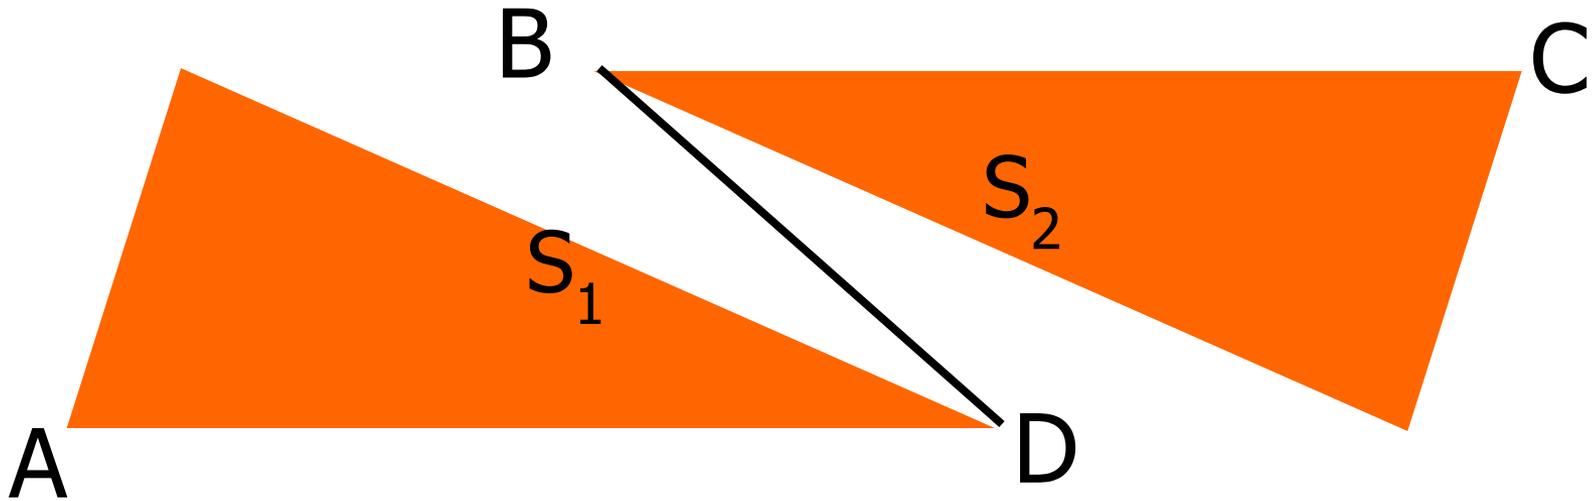

$$S = \frac{BC+AD}{2} \cdot BH$$

$$S = MK \cdot BH$$

Давайте
сверимся?!

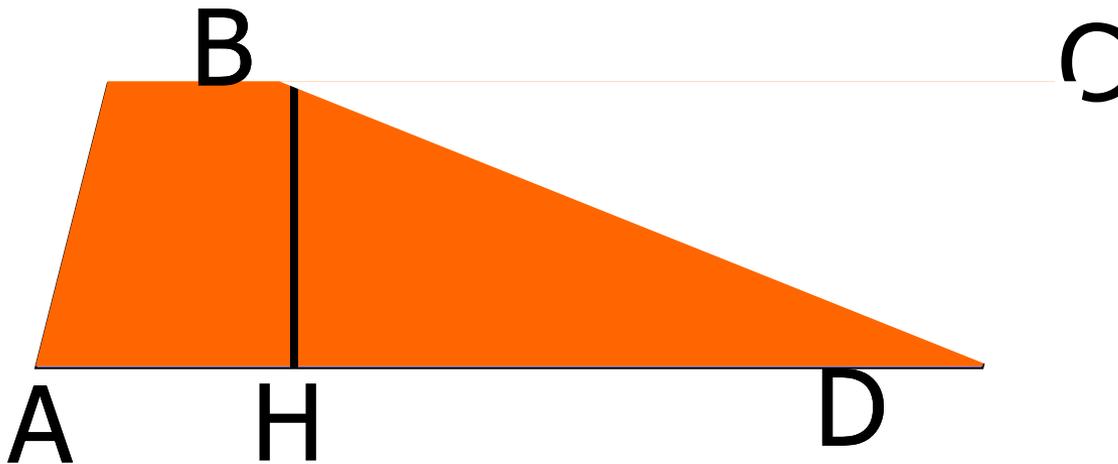

Площадь треугольника

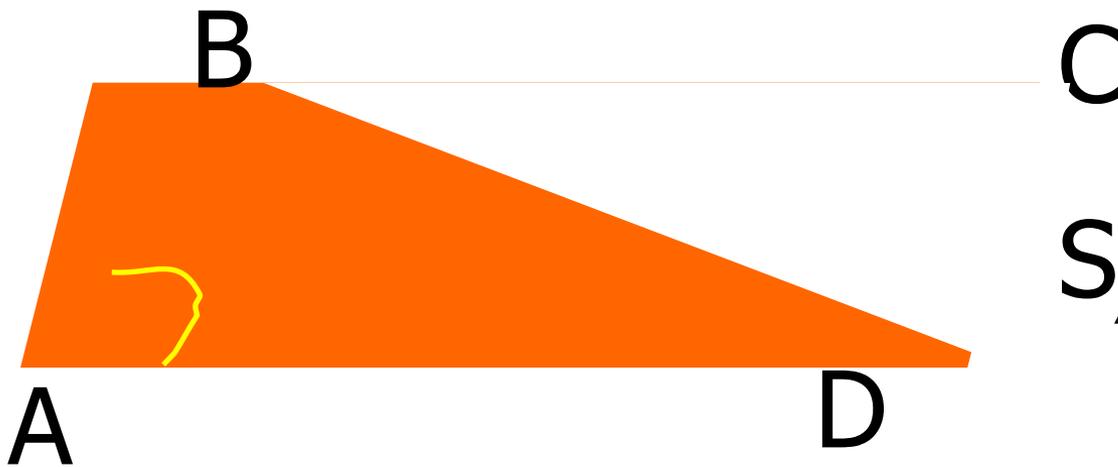

$$S_1 = S_2 \quad S_{ABCD} = S_1 + S_2$$

$$S_{\triangle ABD} = \frac{1}{2} S_{ABCD}$$

Площадь треугольника

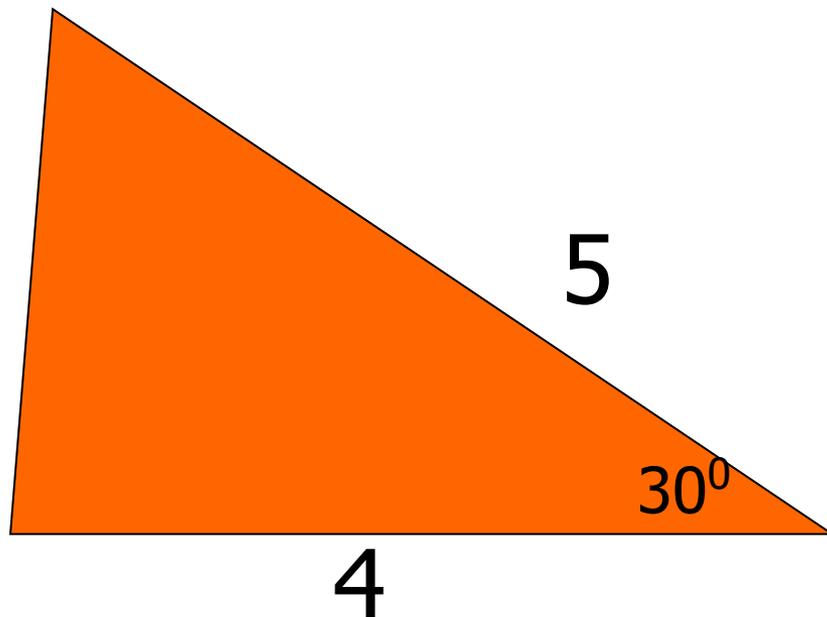

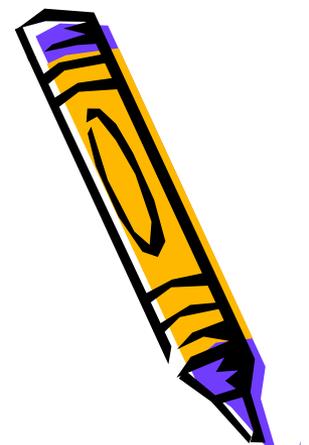

$$S_{\triangle} = \frac{1}{2}AD \cdot BH$$

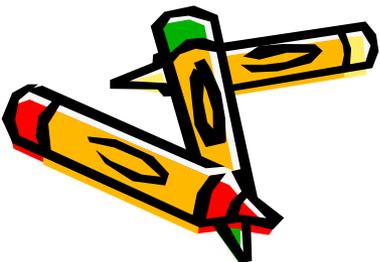

$$S_{\triangle} = \frac{1}{2}AB \cdot AD \cdot \sin A$$

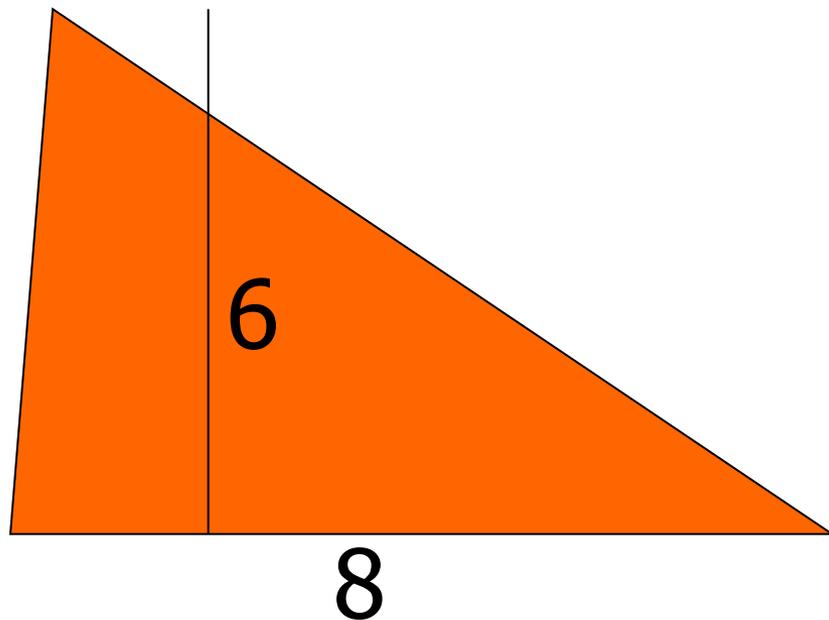

Задачи на готовом чертеже

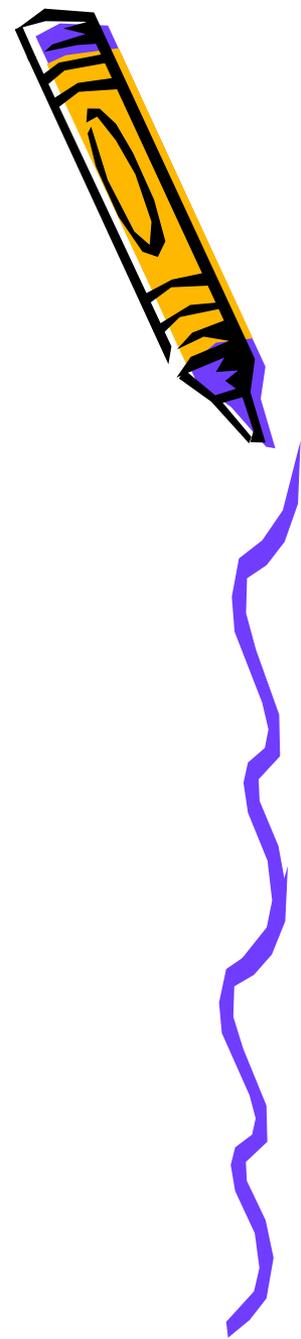

$$S_{\triangle} = \frac{1}{2} 4 \cdot 5 \cdot \sin 30^{\circ} = 5$$

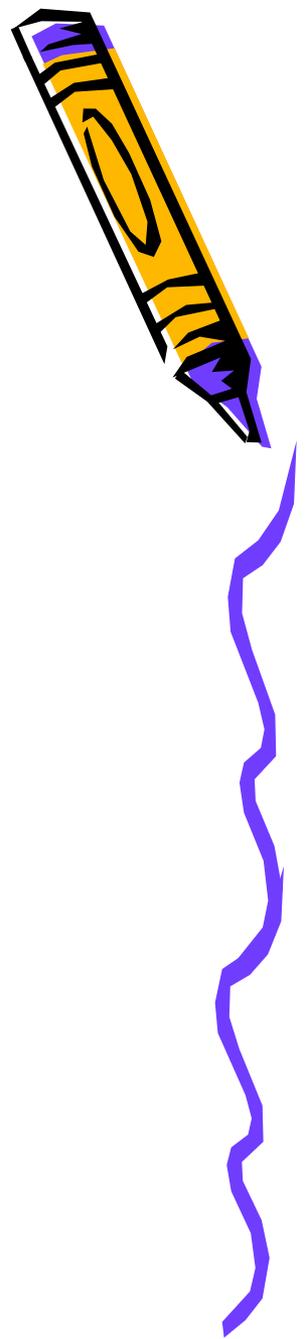

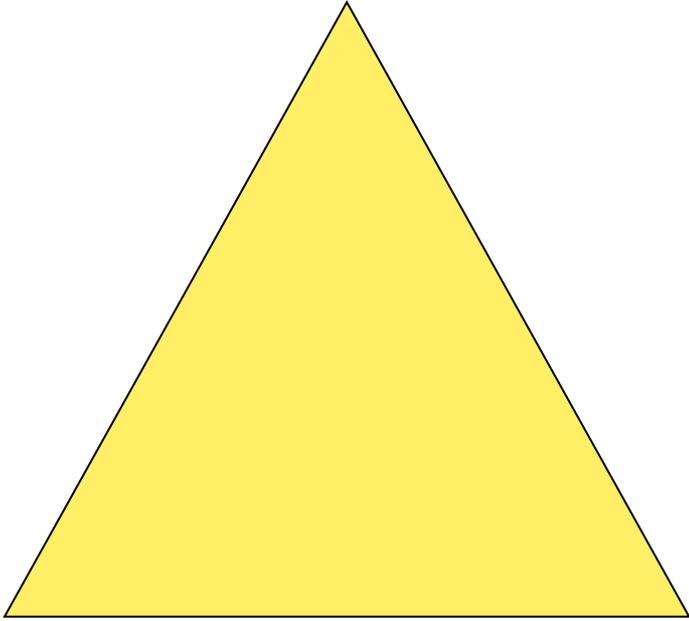

Задачи на готовом чертеже

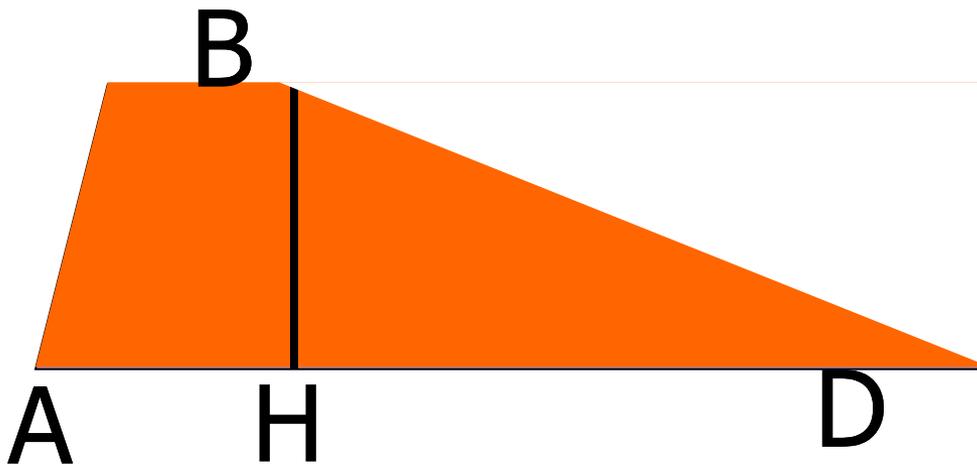

$$S_{\triangle} = \frac{1}{2} 6 \cdot 8 = 24$$

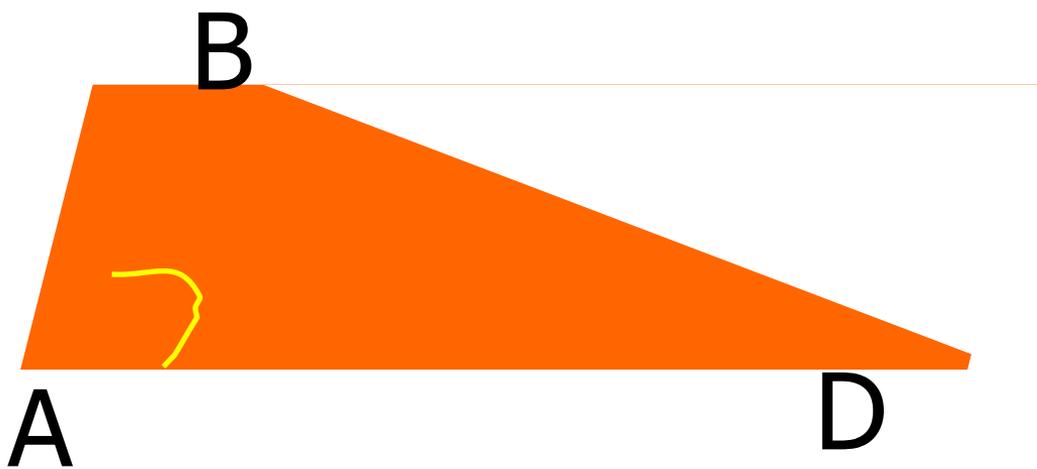

Задача №17

Площадь треугольника

$$S_{\triangle} = \frac{1}{2}AD \cdot BH$$

$$S_{\triangle} = \frac{1}{2}AB \cdot AD \cdot \sin A$$

Задание на дом

Пункт 124
