

No doubt that school is our second home. We spend a lot of time at school acquiring deep knowledge, which can help us to understand our life better. It plays an important role in our life.

This year I will finish my native school. Sometimes I am sad because I am finishing school but nevertheless I am very happy.

I used to think that the eleventh form will be the most difficult but, despite the upcoming exams, I was wrong.

The atmosphere of this period is positive and relaxed for me because I know that this is my last year of study. The fact that teachers are trying to help us finish our last form also gives me confidence.

Many students do not like the eleventh grade because of exams at the end of it. I think that their fears are groundless because if you prepare well, you can easily pass them and go into adulthood.

Of course, school is not only a place of education for me. It is a place where I make new friends. I can say that social life is of great importance for pupils, and in our school it is organized very well. At school I met a lot of new friends and other interesting people. So I go to school with pleasure because I like my school and my class. I am sure that School years will be the happiest time in my life.
