

The natural world is in  
danger!!!

# Air pollution

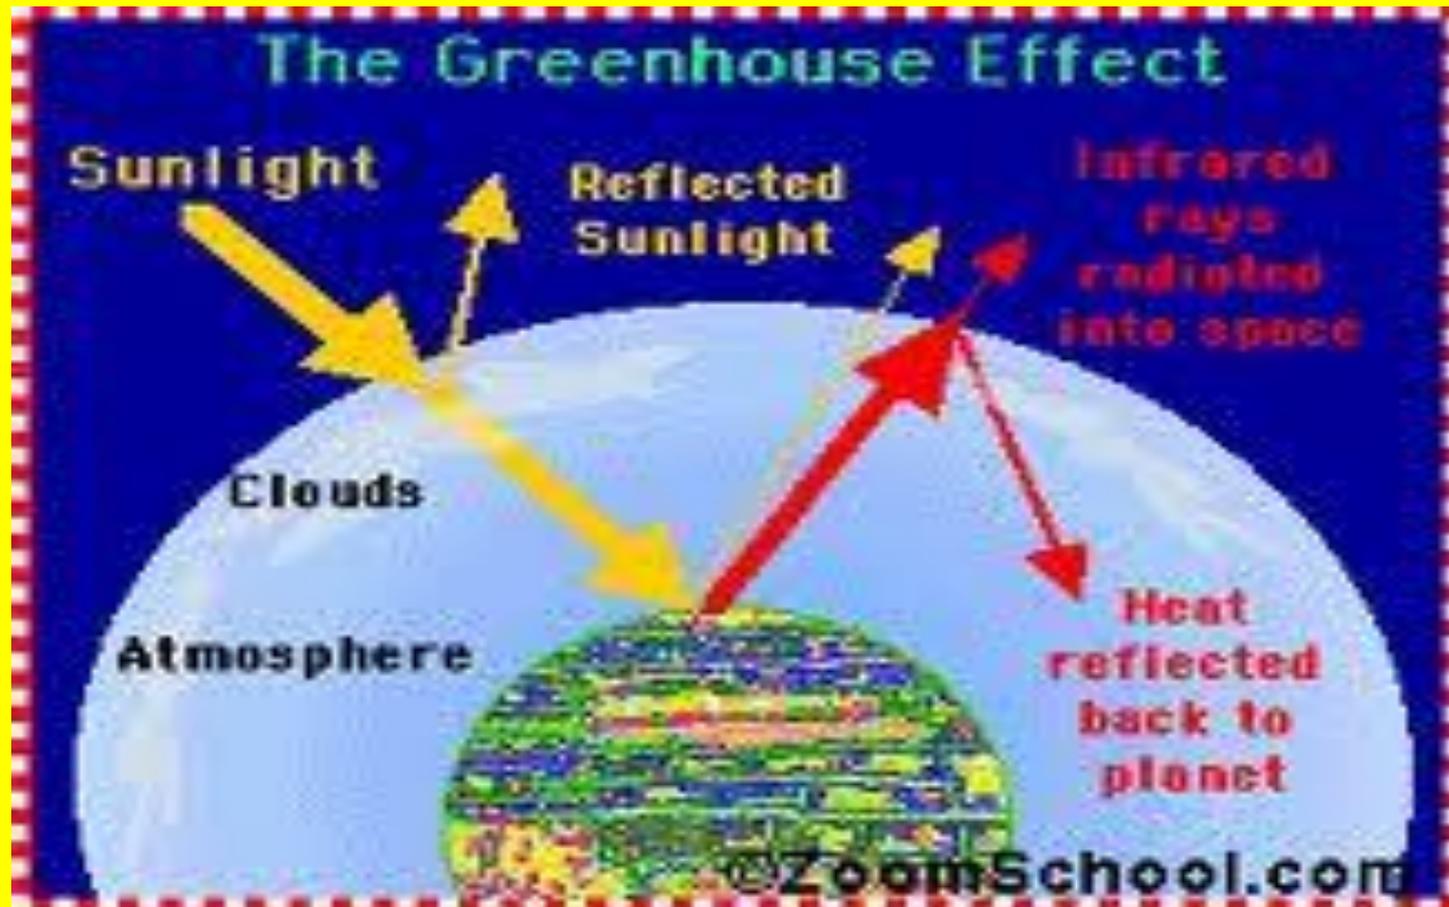

A stylized illustration of a factory with two tall smokestacks. The smokestacks are purple and white, and they are emitting thick, dark smoke that fills the upper part of the image. The background is a light blue sky with white clouds. The overall style is simple and graphic.

Every year people are becoming more and more air pollution. This is because of factories, cars and other activities. To prevent this problem people should to put filters.

# Greenhouse effect.

- 
- Greenhouse effect works like this: sunlight gives us heat. Some of the heat warms atmosphere, and some of the heat goes back into space. Nowadays the air surrounding the earth has become much warmer because the heat can't go back into space.

# Greenhouse effect. The theme.

# Ozone holes.

## Ozone holes.

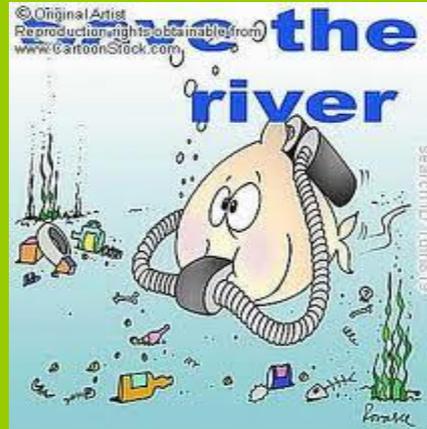

- Ozone holes are becoming from pollution of the air. People burn things, factories throw chemicals into the air. It has an influence on our environment. Because of the ozone holes we have got an ultraviolet rays. They burn our planet. Ultraviolet radiation can cause skin cancer.

# Oxygen and carbon dioxide.

- During the last 100 years people have produced a lot of carbon dioxide. people and animals breathe in oxygen and breathe out carbon dioxide. we produce carbon dioxide when we burn things. trees produce oxygen. human cut down big areas of trees. it means that it is become more carbon dioxide.

# Water pollution.

- Every year people pollute water. there are no river or sea which is't used sa a dump. our water is poisoned because factories pour waste into rivers. water creatures can not live in such water and they forced to leave thei habitat or die.

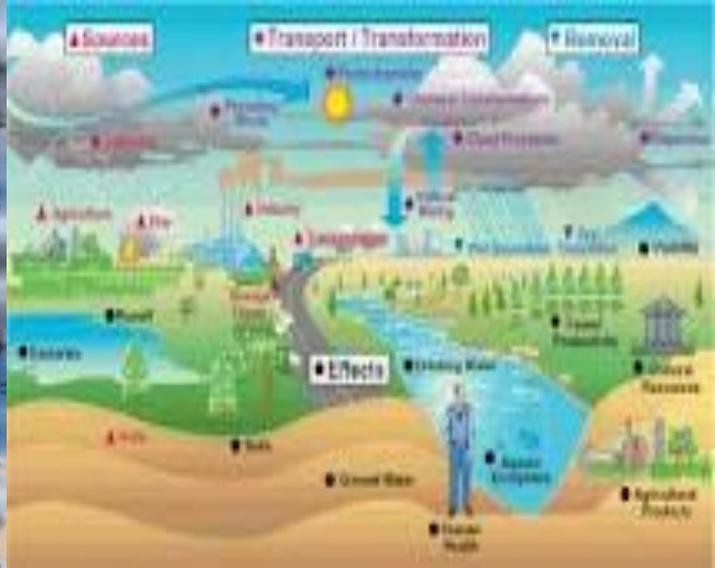

**Water pollution**

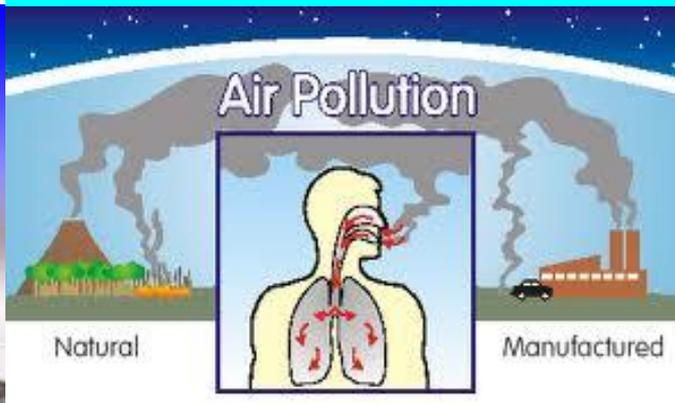

# People became cleverer!!!))))

- people began to realize their mistakes. They started to save our world from pollution. I hope that we can do it together))

Air pollution

The end)))

Let's save the world !!!)))
