# Планет Ы

# Комет а

A photograph of a comet streaking across a dark night sky. The comet's tail is visible, and the foreground shows the dark silhouettes of evergreen trees against a slightly lighter, starry background.

Состоит из льда, газов,  
твердых частиц

A field of asteroids in space. A large, dark, irregularly shaped asteroid is prominent in the foreground on the left. The background is filled with numerous smaller asteroids of various sizes and shapes, scattered across a dark blue and black space. The lighting is dramatic, with bright blue and green highlights on the asteroids, suggesting a distant light source or a nebula. The overall scene is a dense field of rocky celestial bodies.
