

Difference in education

Finland

Azerbaijan

Finland has the best education system
in the world

Finns are not sorted into classes of students, educational institutions according to their abilities and career preferences.

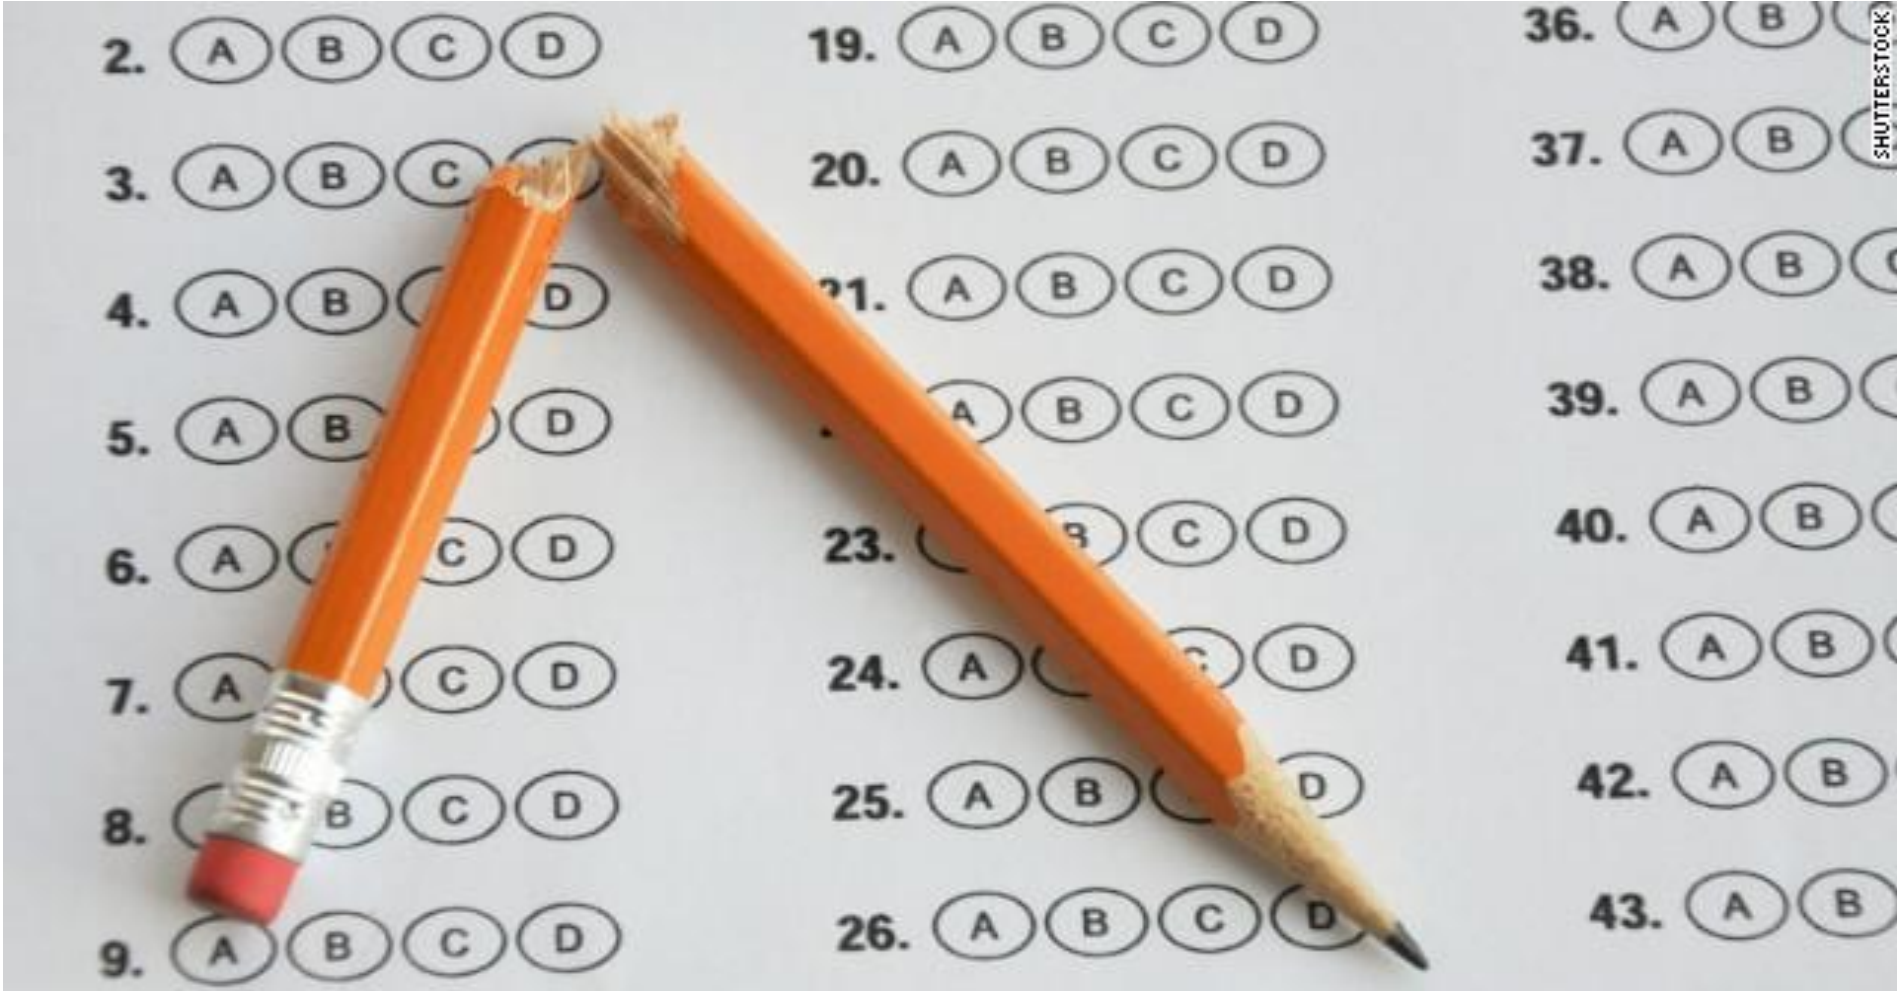

Also, there are no "bad" and "good" students. Comparison pupils with each other is prohibited. Children are ingenious and with a large deficit mental abilities are considered "special" and learn with them. In general, the team trained and children on wheelchairs. Finns are trying as much as possible to integrate into the society of those who require special treatment. The difference between the weak and strong students - the smallest in the world

Student transport is the transporting of children and teenagers to and from schools and school events. School transport can be undertaken by school students themselves (on foot, bicycle or perhaps horseback; or for older students, by car)

All students in Finland receive a free education from when they start at seven years of age until they complete their university studies. During their educational journey all pupils receive free school meals, resources and materials, transport and support services.

Currently we believe “more” is the answer to all of our education problems— everything can be solved with MORE classes, longer days, MORE homework, MORE assignments, MORE pressure, MORE content, MORE meetings, MORE after school tutoring, and of course MORE testing! All this is doing is creating MORE burnt out teachers, MORE stressed out students and MORE frustration.

Finland on the other hand believes less is more.

The Finnish system's success is built on the idea that: "less can be more".

THERE'S

No Homework In Finland

Extensive training is the basis for giving teachers the autonomy to work the way they want. The result is a highly prized profession and an education system always near the top in international rankings

Educational diplomas from Azerbaijan are recognized in more than 50 countries. Because of its unique geographic location between Europe and Asia, Azerbaijan has joined two of UNESCO's six committees on Education: the European Committee which includes 41 countries, and the Asian Committee which includes 37 countries. Many universities have chosen English as the instruction language as it is mainly the language of communication and science in the world.
