

Горы и вулканы

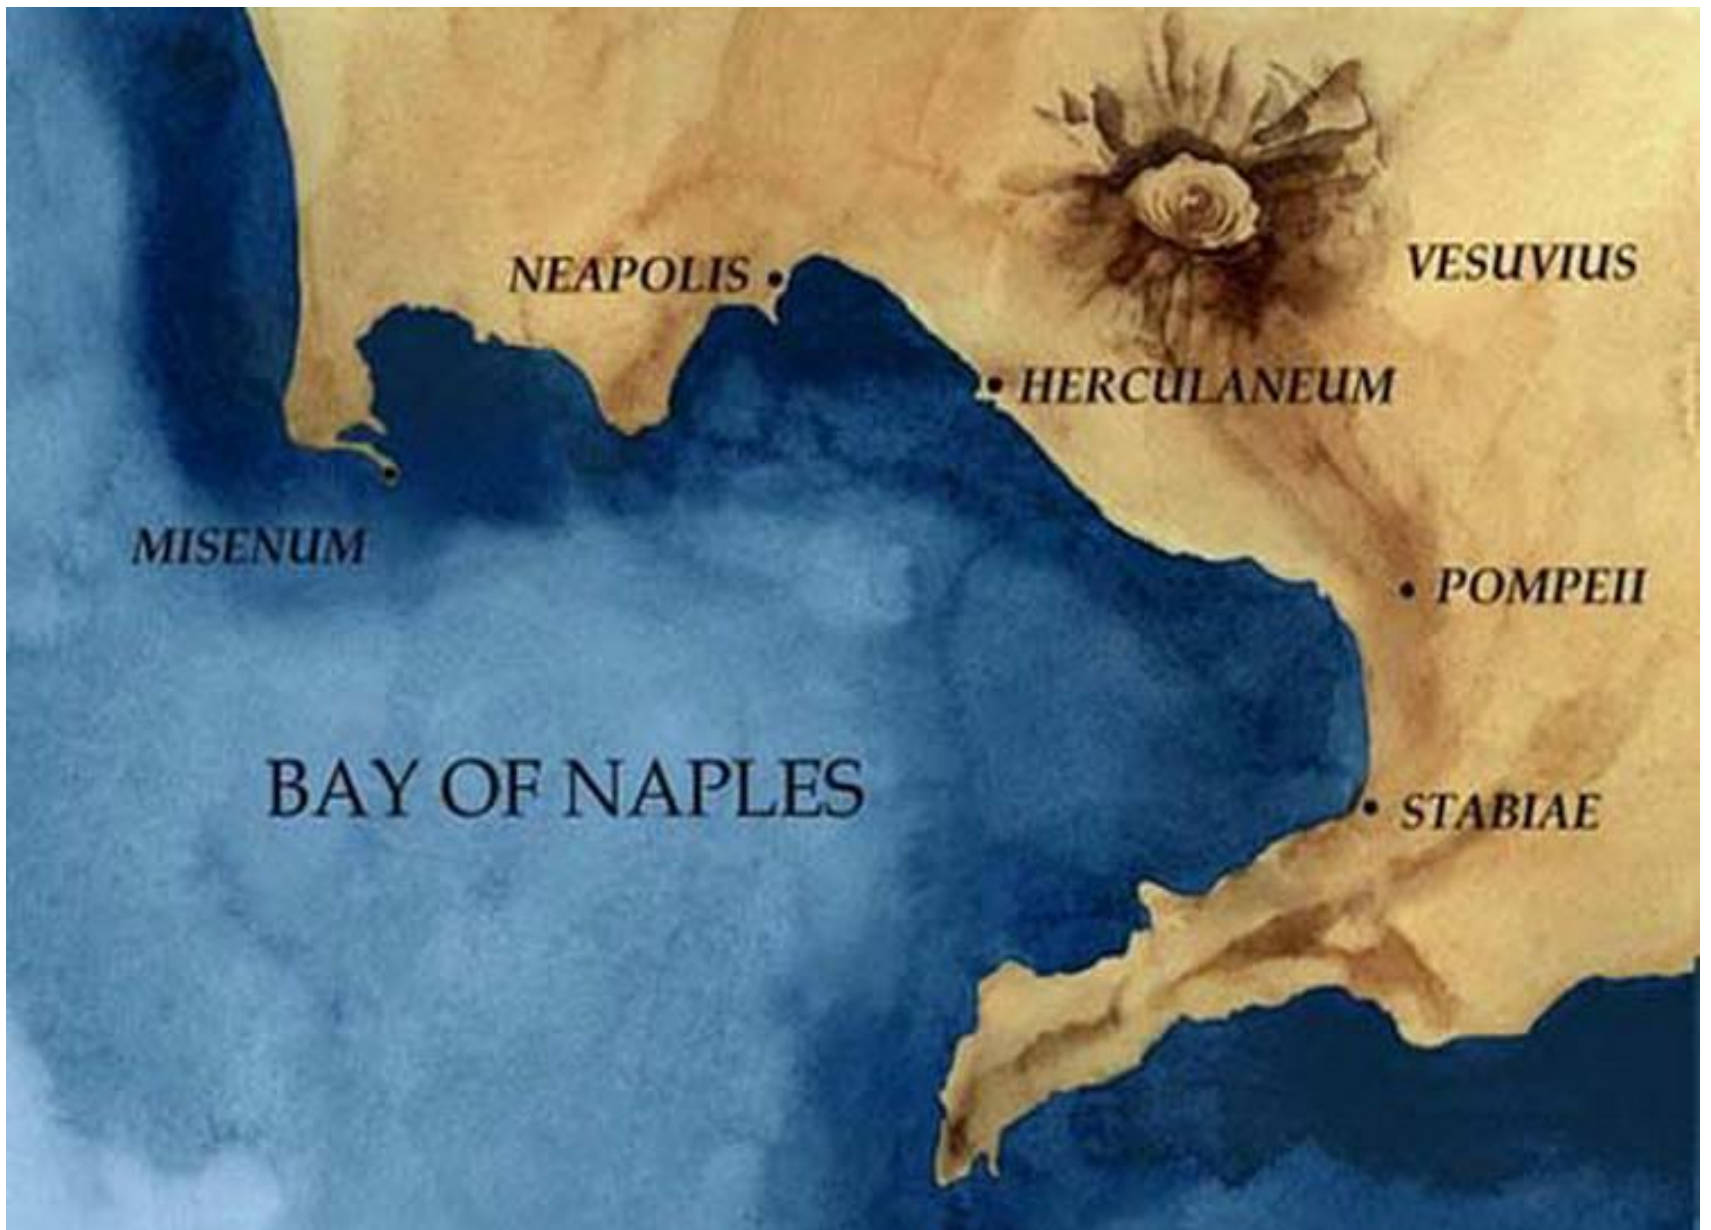

Кратер

A cross-sectional diagram of a volcano. At the top, a crater is shown with a plume of grey smoke rising from it. Below the crater is a dark, jagged line representing the vent. The interior of the volcano is filled with a large, glowing mass of magma, colored in shades of red, orange, and yellow. The outer slopes of the volcano are brown and rocky. The background is a blue sky with white clouds.
