**You are going to read the text aloud. You have 1.5 minutes to read the text silently, and then be ready to read it aloud.
Remember that you will not have more than 2 minutes for reading aloud.**

A coffeemaker or coffee machine is a cooking appliance used to brew coffee. While there are many different types of coffeemakers using several different brewing principles, in the most common devices, coffee grounds are placed into a paper or metal filter inside a funnel, which is set over a glass or ceramic coffee pot, a cooking pot in the kettle family. Cold water is poured into a separate chamber, which is then boiled and directed into the funnel. The single-serve or single-cup coffeemaker had gained popularity by the 2000s. Coffee is usually brewed immediately before drinking. Coffee is often vacuum packed to prevent oxidation and lengthen its shelf life.
