D. As symbols of respect and courage, knights turned out to be an intriguing mix of all the things that made males the best, as their education included the most effective sorts of exercises for the brain and the human body. Knight tournaments were a good way for the knights to try out the actual travails of fighting and never having to go through the pain and troubles of having to look after themselves, and of their kingdoms.

E. Were there any women pirates in Renaissance England? They were in the minority, but they were never the less there and very able. Lady Mary was a daughter of a pirate and married to a pirate. When her husband died, she recruited her castle staff and went to sea herself. Her luck ran out when she captured a German captain, who was a friend of Queen Elizabeth. So Lady Mary quit piracy ... and started selling stolen goods.

F. Russia is an amazing holiday destination. It should be visited during the festival season, as it reveals the rich cultural tradition and fascinating customs of its people. While the festivals come from the Christian legacy Russia shares with Europe and America, the manner of celebration is unique. Enthusiastic travelers suggest planning a Russian holiday during the festival time and to be sure that the memories will last a lifetime!

G. Normally very fine textiles are found in graves. Obviously, the quality of clothing worn in the Middle Ages would reduce with lower ranks, but even the slaves did not wear cloth as rough as people thought in the past and some still do today. Slaves would probably wear their master's clothes, which may have been very thin in places and not decorated. They would usually receive the underclothes to be worn as overclothes.

Your amazing brain

You carry around a three-pound mass of wrinkly material in your head that controls every single thing you will ever do. From enabling you to think, learn, create, and feel emotions to controlling every blink, breath, and heartbeat – this fantastic control center is your brain. It is a structure so amazing that in the foreword to *Discovering the Brain*, famous scientist James Watson wrote, “The brain is the most complex thing we have yet discovered in our universe. It contains hundreds of billions of cells interlinked through trillions of connections. The brain confuses the mind.” Obviously to understand brain function, we need to confront its complexity.

Imagine your kitten is on the kitchen counter. She’s about to step onto a stove. You have only seconds to act. Accessing the signals coming from your eyes, your brain quickly calculates when, where, and at what speed you will need to dive to intercept her. Then it orders your muscles to do so. Your timing is perfect and she’s safe. No computer can come close to your brain’s awesome ability to download, process, and react to the flood of information coming from your eyes, ears, and other sensory organs.

Your brain contains about 100 billion microscopic cells called neurons – so many it would take you over 3,000 years to count them all. Whenever you dream, laugh, think, see, or move, it’s because tiny chemical and electrical signals are racing between these neurons along billions of tiny neuron highways. Believe it or not, the activity in your brain never stops. Countless messages zip around inside it every second like a supercharged pinball machine. Your neurons create and send more messages than all the phones in the entire world. And while a single neuron generates only a tiny amount of electricity, all your neurons together can generate enough electricity to power a low-wattage bulb.

Neurons send information to your brain at more than 150 miles (241 kilometers) per hour. For example, a bee lands on your bare foot. Sensory neurons in your skin relay this information to your spinal cord and brain at a speed of more than 150 miles (241 kilometers) per hour. Your brain then uses motor neurons to transmit the message back through your spinal cord to your foot to shake the bee off quickly. Motor neurons can relay this information at more than 200 miles (322 kilometers) per hour.

Riding a bike seems impossible at first. But soon you master it. How? As you practice, your brain sends “bike riding” messages along certain pathways of neurons over and over, forming new connections. In fact, the structure of your brain changes every time you learn, as well as whenever you have a new thought or memory.

It is well known that any exercise that makes your heart beat faster, like running or playing basketball, is great for your body and can even help improve your mood. But large-scale efforts of scientists from a group of institutes from the National Institutes of Health have recently showed that for a period of time after you’ve exercised, your body produces a chemical that makes your brain more receptive for gaining new knowledge. So if you’re stuck on a homework problem, go out and play a game of soccer, then try the problem again. You just might discover that you’re able to solve it.

12 According to the text, the most distinctive characteristic of the brain is its ...

- A) ability to control the body.
- B) elaborateness.
- C) size.
- D) weight.

13 The claims that the brain is better than any computer because it ...

- A) processes more information.
- B) works faster.
- C) can download information from different sources.
- D) reacts to information more adequately.

14 According to the text, the work of brain neurons influences ...

- A) electricity production.
- B) our dreams.
- C) everything we do.
- D) character of messages we send.

- 15** The narrator compares the work of neurons to a pinball machine to ...
- A) show the character of brain work.
 - B) raise the awareness of the brain's nature.
 - C) stress the amount of information that the brain processes.
 - D) illustrate the shape of the neuron highways.
-

- 16** Comparing sensory and motor neurons, we can make a conclusion that ...
- A) motor neurons transmit information faster.
 - B) there are more motor neurons.
 - C) sensory neurons transmit information faster.
 - D) there are more sensory neurons.
-

- 17** The structure of brain changes when ...
- A) our memory fails.
 - B) new neurons appear.
 - C) we are riding a bike.
 - D) we acquire new knowledge.
-

- 18** Physical exercises proved to be good for ...
- A) the production of brain chemicals.
 - B) solving homework problems.
 - C) giving the brain a rest.
 - D) maintaining a good mood.

Раздел 4. Письменная речь

You have received an email message from your English-speaking pen-friend Sandra:

From: Sandra @mail.uk

To: Russian_friend@ege.ru

Subject: Food

*...I'm living alone now as my parents are visiting my elder sister and her new baby. I never thought we spend so much on food! Where do you usually buy food? What's the most expensive and the cheapest thing to eat in Russia? What do you prefer – to eat in or to eat out, and why?
This month I'm working as a baby-sitter for my neighbours...*

Write an email to Sandra.

In your message:

- answer her questions;
- ask **3 questions** about her experience as a baby-sitter.

Write **100–140 words**.

Remember the rules of email writing.

Pruffme	4

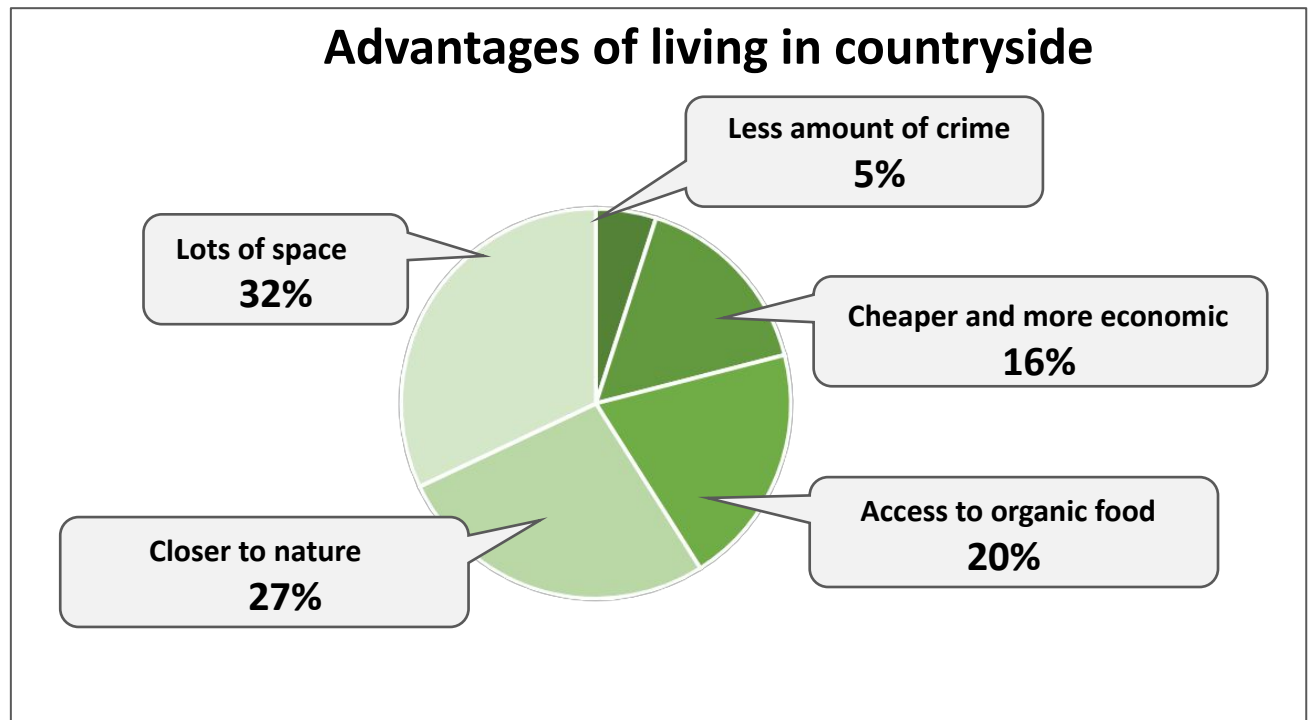

Write **200–250 words**.

Use the following plan:

- make an opening statement on the subject of the project;
- select and report 2–3 facts;
- make 1–2 comparisons where relevant and give your comments;
- outline a problem that can arise with distance learning and suggest a way of solving it;
- conclude by giving and explaining your opinion on the role of e-learning in schooling.

Imagine that you are doing a project on **advantages of living in the countryside in Zetland**. You have found some data on the subject – the results of the opinion polls (see the pie chart below).
Comment on the data in the pie chart and give your opinion on the subject of the project.

38.2

Write **200–250 words**.

Use the following statement on the subject of the project;

- select and report 2–3 facts;
- make 1–2 comparisons where relevant and give your comments;
- outline a problem that can arise with living in the countryside and suggest a way of solving it;
- conclude by giving and explaining your opinion on the best place for living for you.
