

The Digital Trading Company

THE NEW WAY TO TRADE TRADITIONAL ASSETS USING MODERN
TECHNOLOGIES

Road Map

1. AI Algorithmic Trading on Binance exchange.
2. Proposing of commodities to the local existed Trading and Maritime trading companies. (200+ Maritime trading companies in Panama).
3. Selling of Offshore Security Company.
4. Networking presentation events
 - Seed investors presentation
 - Mass events (conferences) with partners.
5. Other commodities opportunities (forest, etc.)

Corporate Structuring

- Trading Company
- Blockchain
- GPT
- Partner Banks
- Investors
- Partners
- Legal Services
- BRC-20
- Alternative Energy Department
- Team
- Marketing
- Networking presentation
- Concepts
- Cashflow
- Academic Department
- Special Economic Zone
- Smart Contracts
- Global Disaster Preparedness

Trading Company

- 99% of commodity buyers or sellers are trying to scam, so by using partner corporations and issuing blockchain from approved buyers and sellers and using bulletproof smart contracts 100% trust is created for all parties.
- Creating a trading company for food commodities, as a co-operative there will be the opportunity for all players to share data about products used in a secure network.
- Construct a website that has a secure member login area that proves your status as an owner within our company to establish credibility. With future growth expected to include an inbuilt trading platform for both commodities and crypto.
- Digital Embassy – for creating an alternative digital Chamber of Commerce. Membership passports as NFT's or Soul Bond Tokens.
- Cabins will be shared between all the friendly embassies which ensures a healthy investment environment. A co-operative location much like the ISS.

AI Algorithmic Trading on Binance exchange

- Trading companies using algorithms for buying/selling on Binance.
- By using Telegram we can reach the just over 100,000 users who trade in crypto on that platform alone.
- We can have our connected lawyers send videos and letters to explain that everything is correct and above board.

AI Algorithmic Trading on Binance exchange

- Our fundraising strategy is to use and popularize existing trading solutions in the market. This model will allow building a huge infrastructure of users thanks to the referral system.
- By creating a partnership cell between the parent company and the end user (stock trader), we act as an authorized representative and popularize the cryptocurrency trading service.
- The basis for getting started will be a website with a description of the principle of operation and a visual video example in various languages.
- - Web site– Crypto bloggers– Mass mailing of crypto users in telegram
- Profit calculation example: \$10,000 ~ 800,000 crypto user telegram messages
- Based on the fact that at least 1% will become a client of the services, we get the following figures: $800,000 / 100\% = 8,000$
- Suppose the average investment of a participant is \$100 (more in practice).
- $8,000 \times \$100 = \$800,000$ collective pool of investors.
- Where we get 50% of their profits every month.

Custom Enzymes

- Custom Enzymes is an industry leading supplier of innovative enzyme formulations. Our products give you the scientific edge needed to increase yields, greater profitability, and protect your investments.
- We serve an array of industries such as;
- Agriculture Sugar Wastewater Oil Animal Feed Ethanol Biofuels Breweries
- Our success can be attributed to our policy of providing innovative, effective high-quality products and solutions to meet specific customer needs with continuous research and product development.
- At Custom Enzymes, we are driven to provide high quality products with international standards with the desire for cutting-edge innovation as defined by our best in class research laboratories and state of the art manufacturing facilities across the world. Our production teams' mechanisms are handled by well-qualified and highly motivated personnel and follow stringent control protocols and in-process quality assurance procedures.
- Environmental concerns will always be our primary concern while carrying out our business activities which, reflects in our products that are 100% biodegradable with no harm to animal, plant, or human life.

Fernergy International Corporation

- Fernergy International specializes in multi-disciplinary activities, including but not limited to Turn-Key Integrated Projects, involving products, services and technologies from various partners and suppliers. Fernergy operates in close co-operation in the Latin America Region through its group of partners from USA, Europe and Asia, with a holistic co-ordination and thus facilitating a “one stop-shopping” opportunity to our customers.
- Fernergy undertakes projects based on its international experience and with capabilities in the fields of:
- Oil Production and Hydrocarbon Technologies Applications;
- Project Integration Management;
- Procurement, Logistics and Commissioning;
- Executive Consulting and Technology Applications.
- Fernergy's project capabilities extend from pre-planning, feasibility studies to design, supply, installation, and commissioning. A combination of in-house professional services, such as architecture, mechanical and electrical engineering, as well as experience in hard and software applications, enables Fernergy to translate the functional and operational requirements of the client into detailed technical specifications.

HOI Global Trading S.A.

- In our company, we have identified a market opportunity in commercial development sponsored international. Created a solid and profitable business model which we want to share with you.
- We currently have signed alliances with factories and we only await purchase orders from customers who currently work with us, which shows that there is an existing demand for our products and services.

HOI Global Trading S.A. Cashflow

País	Población disponible	Contenedores vendidos	Beneficio neto anual	Beneficio neto en 5 años total	ROI
Ecuador	14.5 millones	3.625	\$516,200.00	\$2,581,000.00	19.50%
Venezuela	28.4 millones	7.1	\$1,014,320.00	\$5,071,600.00	38.80%
Colombia	50.2 millones	12.55	\$1,796,640.00	\$8,983,200.00	67.10%
México	84.9 millones	21.2325	\$3,035,752.00	\$15,178,760.00	111.50%
Chile	19.1 millones	4.775	\$682,080.00	\$3,410,400.00	25.80%
Brasil	138.8 millones	34.695	\$4,955,640.00	\$24,778,200.00	167.20%
Perú	32.2 millones	8.05	\$1,152,800.00	\$5,764,000.00	44.80%

Año	Contenedores vendidos	Beneficio neto anual	Beneficio neto acumulado	ROI
1	0.706	\$100,957.00	\$100,957.00	7.40%
2	1.412	\$201,914.00	\$302,871.00	14.80%
3	2.118	\$302,871.00	\$605,742.00	22.20%
4	2.826	\$403,828.00	\$1,009,570.00	29.60%
5	2.826	\$403,828.00	\$3,038,570.00	22.20%

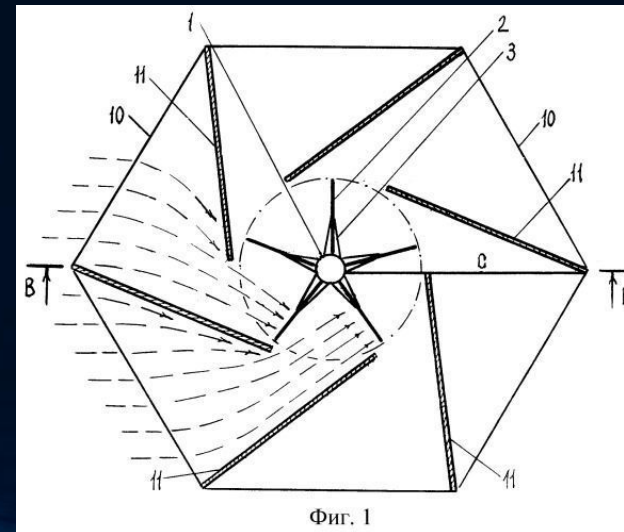

Blockchain

- Blockchain Incubator where digital nomads and Blockchain Developers can live and work in a Panama Hotel. With cafeterias, restaurants, bars, gym, casino, and co-working environments.
- Our crypto DAO fund can give loans to our participants at a 0% interest rate, because the investor funds are frozen for a year within the system.
- Using a blockchain investor pool we can manipulate the price of commodities passing through the blockchain, it is possible to buy larger quantities and to resell to our approved buyers at lower prices.

Alternative Energy Solutions (Green Energy)

- 1. Plastic trash recycling factory.
- 2. Plastic trash to Fuel recycling plant.
- 3. Slop Oil project. Collection and Recycling of toxic wastes, before the ships are crossing Panama Canal.
- 4. High Efficiency Vertical wind turbines.
- 5. Ocean Thermal Energy Conversion (OTEC): The Future of Baseload, Dispatchable Renewable Energy.
- 6. Algaes Sea Farms.

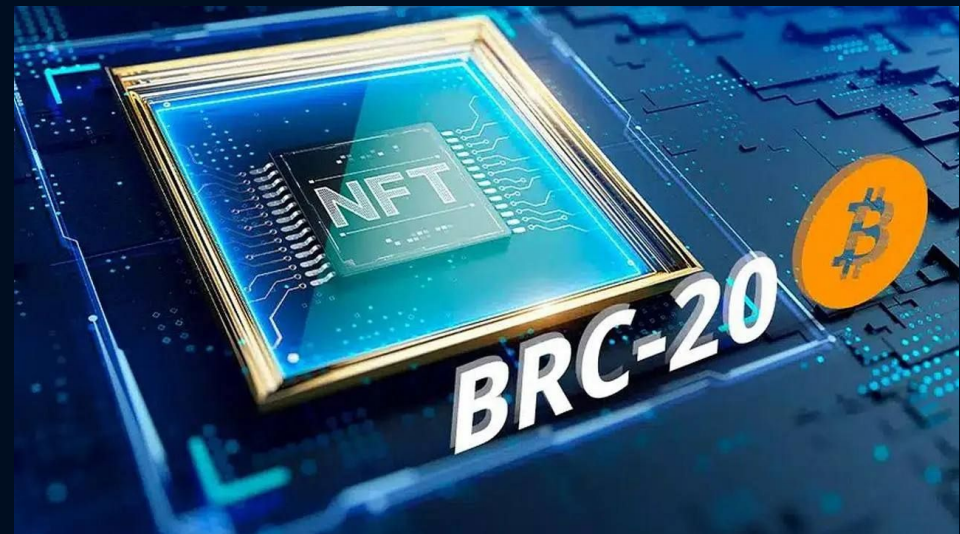

Our Unique Users Advantages

- Using decentralized satellite communications networks, the possibility of being hacked is vastly reduced, in addition to our cloud servers using the latest version of redhat, myphp and server security that is only matched by the NSA security systems.
- Digital DAO Fund Ecosystem on Space Satellite
- Quantum PC (Institute Relocation)
- Portative Nuclear Reactor

BRC-20

- BRC – 20 Protocol starting a new chapter in Bitcoin history. Using technology of Smart contracts we are able to issue Not changeble trading contracts as LOI, FCO, ICPO, IMPFA, NCNDA, Commission Commission contract and so on.
- BRC-20, or Bitcoin Request for Comment 20, is modeled after the Ethereum protocol called ERC-20 (Ethereum Request for Comment 20) and was introduced in March 2023 by an anonymous developer known as Domo. BRC-20s are basically (with some major caveats like a lack of smart contracts) Bitcoin's version of ERC-20s.
- That said, there haven't been other "BRC" numbers as Bitcoin changes actually go through a process called BIP, or Bitcoin Improvement Proposals. So there hasn't been a BRC-1 or BRC-2 and so on.

Marketing

- It will be possible to sell or share digital assets between world blockchain funds. For example, the vessel is an instrument that can be traded.
- Using the model of IP we can sell or share this concept with Special Economic Zone partners all over the world.
- Concept for presentations is everyone has an invitation in the style of a Letter of Intent. With a QR code to open your metamask and receive an already created NFT.

GPT

- The GPT department will allow us to automate almost all the processes described here.
- Our headline partners

Partner Banks

- The partner banks will be able to issue letters of credit as a trading company based on the crypto coin holdings. Credits and loans can also be issued to participating partners.
- -

Other Concepts

- Living in the floating city will be much more efficient and cheaper, thanks to the use of modern tech.
- Once an investor buys a cabin your money will be leveraged and re-invested to work for you, reducing food costs, recycling, growing our own food, and there will also be zero corporate income tax.
- Combining several existing industries that are trading now, from energy companies to Enzyme companies that have products to increase crop yields and reduce pest problems.
- Cabins will be shared between all the friendly embassies which ensures a healthy investment environment. A co-operative location much like the ISS.
- Using a blockchain investor pool we can manipulate the price of commodities passing through the blockchain, it is possible to buy larger quantities and to resell to our approved buyers at lower prices.
- The floating city cruise ship will become the model of how this new system can be implemented globally.

Funding Requirements

- Website – design, build, deploy maintain
 - Apps – design, build, deploy, maintain
 - R&D
 - Assets – vessels etc
 - Legal Charges
 - Miscellaneous
 - Marketing
- \$150,000
 - \$100,000+
 - 250,000+
 - Invite ship owners, daily running costs change.
 - \$50,000

Partners and potential partners

- Custom Enzymes
- Fernergy
- HOI Global Trading S.A.
- Cruise vessel owners
- Atlas Bank / BNI
- Binance
- Exclusive Traveller Club
- Vyperlabs
- Govt entities
- Tosh Clarke Foundation
- Parabolic Digital (crypto rails)
- GPT: Maxialatam, Learning Villa Panama (3 more options)
