Social network Facebook

- Facebook is the largest social network in the world, founded in 2004 by Mark Zuckerberg and his Harvard University roommates, Dustin Moskowitz and Chris Hughes.

Chris Hughes

Dustin Moskowitz

History of creation

- The site was originally called Thefacebook and was only available to students at Harvard University. Since September 2006, the site has been available to all Internet users over the age of 16.

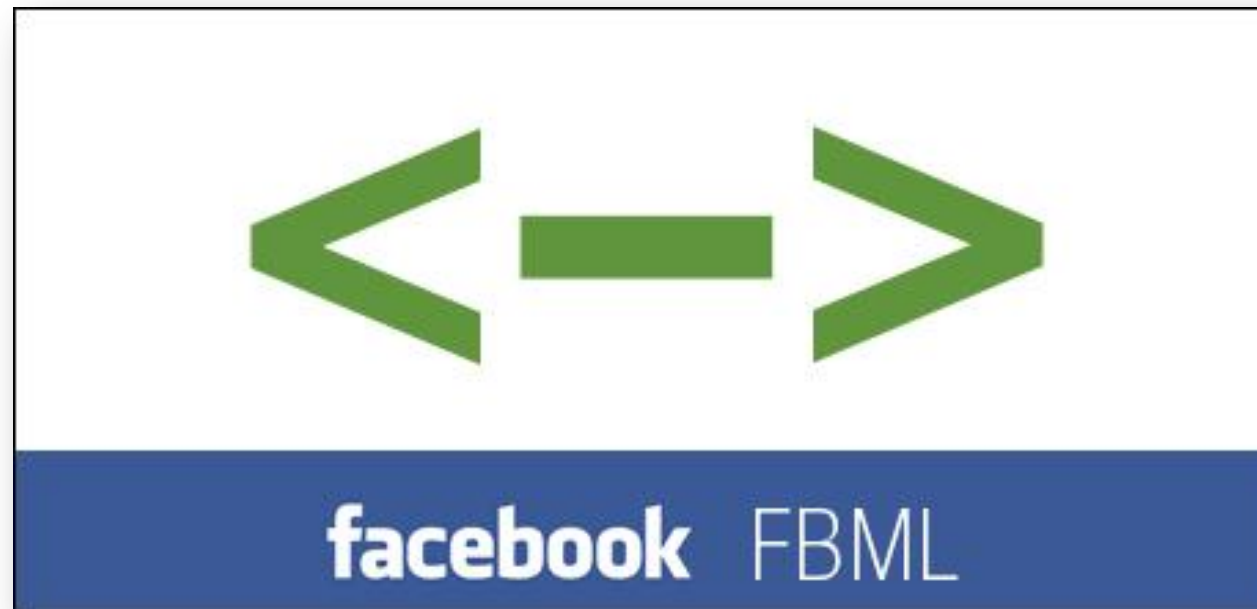

What was Facebook originally designed for?

- Facebook was originally created by Mark Zuckerberg to connect Harvard students with each other. Over a thousand people signed up the next day, and that was just the beginning.

languages when creating Facebook

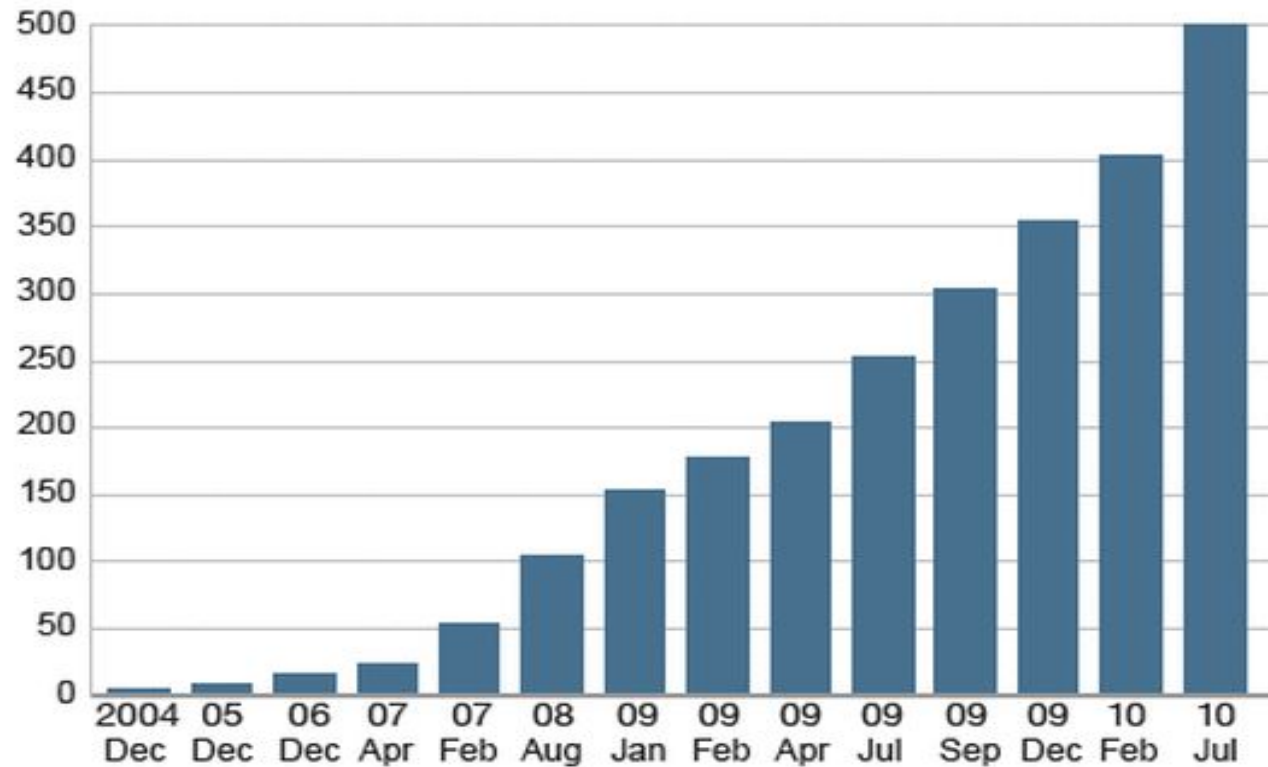

- When writing Facebook, the programming languages PHP, Javascript, ASP.NET, HTML, JQuery and many other languages were used.

- Facebook became the third largest web company in the US after Google and Amazon.

The rise of Facebook

Active users, millions
