$$(x+y)(x-y) = x^2 - y^2$$

Устная работа:

1. Сформулируйте правило сложения отрицательных чисел.
2. Сформулируйте правило сложения чисел с разными знаками.
3. Может ли при сложении отрицательных чисел получиться положительное число, нуль?
4. Как сравнить два отрицательных числа?

Историческая справка

Индийский математик **Брахмагупта** (7 век)

представлял себе положительные числа как «имущества», отрицательные числа как «долги».

Излагал правила сложения:

- «сумма двух имуществ есть имущество»;
- «сумма двух долгов есть долг»;
- «сумма имущества и долга равна их разности»
