

БЕЛАРУСКІ ДЗЯРЖАЎНЫ УНІВЕРСИТАТ

THE BELARUSIAN STATE UNIVERSITY

A group of graduates in blue gowns and black caps are celebrating in front of a large, multi-story building. Many are throwing their caps into the air. The building has a sign in Cyrillic that reads "БЕЛАРУСЬСКАЯ ДАДАВАЎСЬКА-НАУКАВАЯ УНІВЕРСІТАЭТ" (Belarusian State University).

I chose BSU because it is the best university in Belarus. There is a unique specialty associated with mathematics, mechanics and information technology at the same time. (P.S. by Marina)

BSU is the best university in the country for many reasons:

- Firstly, you can find a huge number of specialties here: from psychology to physics. All university specialties are in demand and well paid.
- Secondly, BSU has the opportunity to study with professors and doctors of sciences.
- Modern education and unique learning technologies are available here.
- BSU is ranked in one percent of the best universities in the world.

BSU provides an extensive scientific and practical base. Students are taught to work independently and instill an interest in their chosen profession. Employers appreciate that all graduates have a wealth of knowledge and are able to organize their activities.

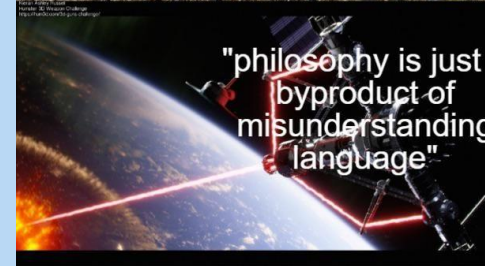

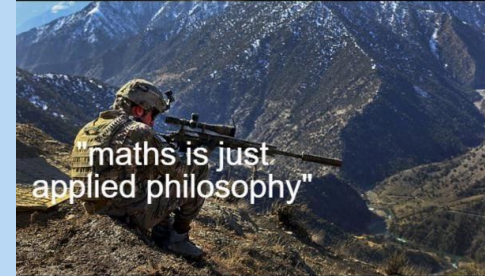

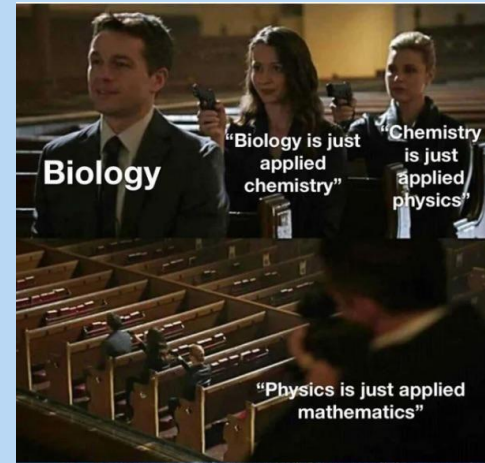

The founding of BSU became a significant event in the life of the Belarusian people. Our university has provided people with such an opportunity.

BSU was founded in 1921. It was a significant event for the entire Belarusian people. V. I. Picheta is the first rector of the university.

Since the beginning, there have been 5 faculties here: agricultural, physical and mathematical, medical, social sciences and working.

In the pre-war period, the university developed. New faculties were opened and the number of students increased.

The Great Patriotic War is a difficult period in the life of the university. Many professors and students went to the front, and therefore the work of the university was suspended.

For ten years, BSU has been recovering from these events. Many educational institutions from Russia helped BSU: they sent textbooks, equipment and everything necessary for studying. Unfortunately, many people never returned from the war. Their memory was honored with the creation of a memorial complex. Today, the university is actively developing and expanding its scientific base.

There is an opportunity to get bachelor's and master's degrees at BSU. The bachelor's degree is four years long. Each year is a separate course, which is divided into two semesters. There are vacations in between, when students can relax.

Me after the university

The beginning of the semester is the easiest time for students. It is enough to go to couples, do homework and read notes. A session awaits all students at the end of the semester. It is necessary to prepare for all tests and exams. During the session, students forget what sleep is. After the successful end of the session, you will have a long-awaited vacation.

Besides studying at BSU, you can find a lot of interesting things. Firstly, sports activities are developed here. Students can attend sports clubs and participate in competitions.

Secondly, every student has the opportunity to engage in scientific activities. The university has all the necessary equipment for this.

Today, BSU has twenty faculties and institutes. The largest faculties are: Law, Economics, Applied Mathematics and Computer Science. At the moment over twenty thousand students study at the university, of which three thousand are foreigners. All students find something special in this place and can develop their talents here.

BSU has the largest number of international treaties in the republic. Today, BSU cooperates with 30 universities in China, Turkey, Africa, and Latin America, and cooperation with universities in the Russian Federation is also developing.

BSU is a coordinator from the Republic of Belarus in the University Network of the Central European Initiative (CEI UniNet). Joint student training activities with partners from abroad are also actively developing. For example, in 2017, a Joint DPU-BSU Institute was opened.

The university has 26 sports improvement groups, the council of young scientists, the primary trade union organization of BSU students, the student union, the creative union, and many other associations.

In the future, students may have the choice of studying at home by using technology such as computers or television or of studying at traditional schools, universities. Which would you prefer?

- I would prefer to study at traditional universities, they provide basic social skills that everyone needs.

Goes to University daily

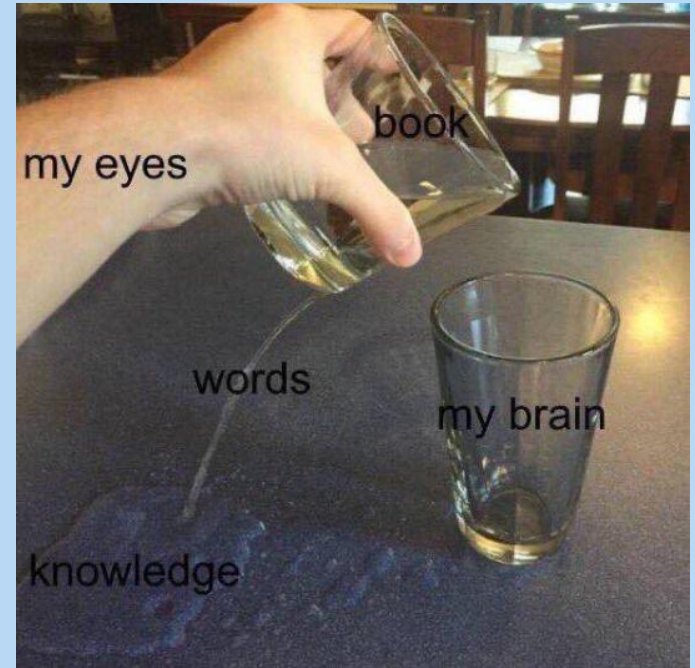

Forgets to wear ID card 1 day

University Guards :-

Students at universities often have a choice of place to live. They may choose to live in university halls of residence (dormitories), or they may choose to rent a flat or a room. What are the advantages or disadvantages? Where would you prefer to live?

- It depends on the conditions of the hostel and on the person as a whole. Sometimes living in a student dormitory is much more fun than living alone, but many people still need more personal space.

What was your strongest fear before you began your freshman year of university?

- Like all freshmen, I was afraid of not making friends with my classmates, making a mistake with my specialty, or not coping with my studies. But every day there are fewer and fewer fears.

What's the best advice you would tell a brother/sister or friend who is now entering university?

- Go to all pairs, choose important subjects, take notes and don't be afraid of anything.

What is the biggest difficulty in being a university student?

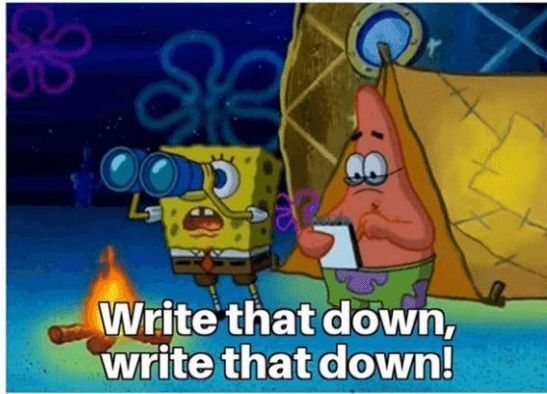

- For me, the biggest difficulty is independent living and everyday life.

Where can University graduates work?

- BSU has many faculties and graduates of this university work in completely different fields from programming to biology.

Professor: "Good morni..."

Freshmen:

Many of the University graduates have become famous scientists and writers, statesmen and public figures, haven't they?

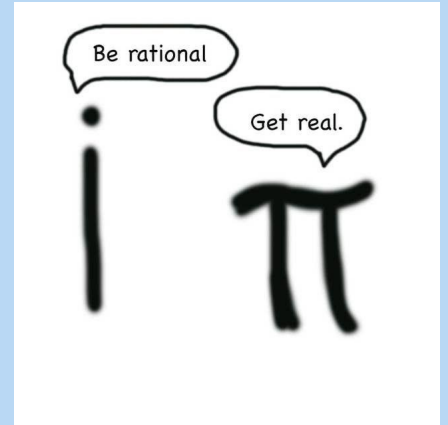

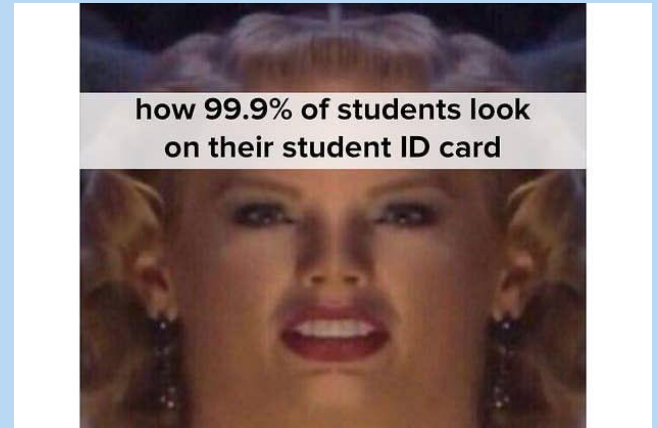

- Many of the University graduates have become famous scientists and writers, statesmen and public figures, haven't they? BSU has a huge number of famous graduates, among them: deputies, doctors of sciences, professors, academicians, and this is only a small part.

Do our students have to finance their own studies?

- The majority of BSU students study at the expense of the state.

Do all students get grants to study at our University?

- It depends on the CT score, and some students have to pay tuition.

And remember
