

Module 5

World animals

Extensive Reading 5

Science. Insects.

At the lesson we will

know ...

new words

do ...

read ...

use ...

speaking about ...

'How much wood
would a woodchuck chuck
if a woodchuck could chuck wood?'

mosquito

wasp

butterfly

dragonfly

grasshopper

ants

fly

beetle

bee

ladybird

bug

caterpillar

What has the insect got?

- 1 How many insects are there in the world?
- 2 Where do they live?
- 3 Why are insects important?
- 4 What can bees do?

It's an insect's life!

There are about 10 million types of insects in the world. These little creatures live in our homes and gardens. Some live near water, others live in fields, parks, and forests. Some insects come out during the day while others come out at night.

Insects are really important. They keep our gardens clean because they eat dead leaves and other waste¹. They are also an important food for birds and other animals. Some insects, like bees, even make food – honey.

¹ unwanted things, rubbish

Answer the questions

1. **How many insects are there in the world?**
2. **Where do they live?**
3. **Why are insects important?**
4. **What can bees do?**

1. **About 10 million types of insects.**
2. **In our houses, near water, in fields, parks, gardens and forests.**
3. **They eat dead leaves and other waste. They are food for birds and other animals.**
