

Ecological Problems

План урока

- 1) Изучите материал презентации.
- 2) Перепишите в тетрадь стихотворение со слайда 3.
- 3) Выполните письменно упражнение со слайда 10.

**The fish in the sea are dying
From the pollution we create
We've got to stop polluting
Before it's too late.**

**Our planet is in trouble
It gets worse every day
We have to help our planet
In every possible way.**

**In the woods and forests
They're cutting down the trees
We've got to save the forests
Everyone agrees.**

**The hole in the ozone layer
Is getting bigger every day
We've got to stop air pollution
We have to find a way.**

Since ancient times Nature has served Man , being the source of his life. For thousands of years people lived in harmony with environment. But with the development of civilization man's interference in nature began to increase.

Large cities with thousands of smoky industrial enterprises appear all over the world today.

Every year world industry pollute the atmosphere with about 1000 millions tons of dust and other harmful substances.

Many cities suffer
from smog.

Gases cause acid
rains that lead to
the damage of nature

Vast forests are cut and burn in fire. Their disappearance upsets the oxygen balance.

As a result some rare species of animals, birds, fish and plants disappear forever, a number of rivers and lakes dry up.

The pollution of air and the world's ocean, the destruction of the ozone layer is the result of man's careless interaction with nature, a sign of the ecological crisis.

Fill in: pollute, harmony, scientists, interference, enterprises, ancient, reduce, environment, liquid wastes, air.

1. People try to live in ... with nature.
2. Chemical ... developed the economy of our region.
3. Factories and plants ... the air with harmful substances.
4. In ... times a man was closely connected with things which surrounded and influenced him.
5. Your ... didn't help us, the situation became worse.
6. Human activities can make the ... unhealthy.
7. Some factories produce ... that run into rivers.
8. Millions of people live in areas in which the ... is not safe to breathe.
9. Many ... study the environment looking for ways to stop the problem.
10. Scientists have helped to find ways to ... air and water pollution.

Environmental protection is a universal concern. That's why serious measures to create a system of ecological security should be taken. Some progress has been already made in this direction.

As many as 159 countries have set up environmental protection agencies. A number of conferences have been held by these agencies to discuss problems facing ecologically poor regions.

The international organization Greenpeace is also doing much to preserve the environment.

Its aim is to protect nature and save life on the planet not only for the sake of the present but also for the future generations.
